

The background of the slide features a close-up, slightly blurred image of green leaves and a bowl of white rice. The rice is in a woven basket, and the leaves are scattered around it, creating a natural, agricultural theme. The entire image is overlaid with a semi-transparent green filter.

COMPANY PROFILE

PRESENTATION BY

PT HARVEST GEMILANG INDONESIA

PT HARVEST GEMILANG INDONESIA

About Us

We are from PT. HARVEST GEMILANG INDONESIA located in Medan, North Sumatera, Indonesia. Our company has been producing and processing cassava into quality Native Tapioca Starch.

Tapioca Starch from our company is the result of cassava extraction. By using modern technology operated by experienced experts and strict quality control, we produce the best quality and Halal tapioca starch.

PT HARVEST GEMILANG INDONESIA

Tapioca starch is a product derived from cassava roots. Apart from direct consumption, tapioca starch has many other uses in the food industry. Tapioca starch is an ingredient in seasoning powder (MSG) and sweetener products, and has many uses in other industries, including the paper and textile industries.

Cassava has many names across many continents. The English word is cassava, but in South America in the area around Brazil it is called mandioca. In Africa where French is spoken it is called manioc. In Spanish-speaking countries it is called yuca. Here in Asia we call it tapioca.

PT HARVEST GEMILANG INDONESIA

Tapioca starch, also known as tapioca flour, is a versatile ingredient derived from the cassava root. It has a wide range of applications in the culinary, industrial, and even medical fields.

Here are several uses of tapioca starch:

Food & Beverage Industries

Enhancing textures and thickening consistency in various culinary applications.

Sweetener Industries

Contributing to the production of natural and gluten-free sweeteners.

PT HARVEST GEMILANG INDONESIA

Textile Industry

Providing a sustainable alternative in fabric finishing and sizing processes.

Glue Industry

Acting as a key component in adhesive formulations.

Paper Industry

Improving the strength and quality of paper products.

Plywood Industry

Enhancing the binding properties of plywood manufacturing.

PT HARVEST GEMILANG INDONESIA

MSG & Lysine Industries

Playing a crucial role in the production of food additives and nutritional supplements.

Medical Industry

Utilized in pharmaceutical formulations for its unique properties.

Charcoal Briquette

Offering a sustainable binder for charcoal production.

Biodegradable Materials

Supporting the development of eco-friendly packaging and products.
