WELCOME TO

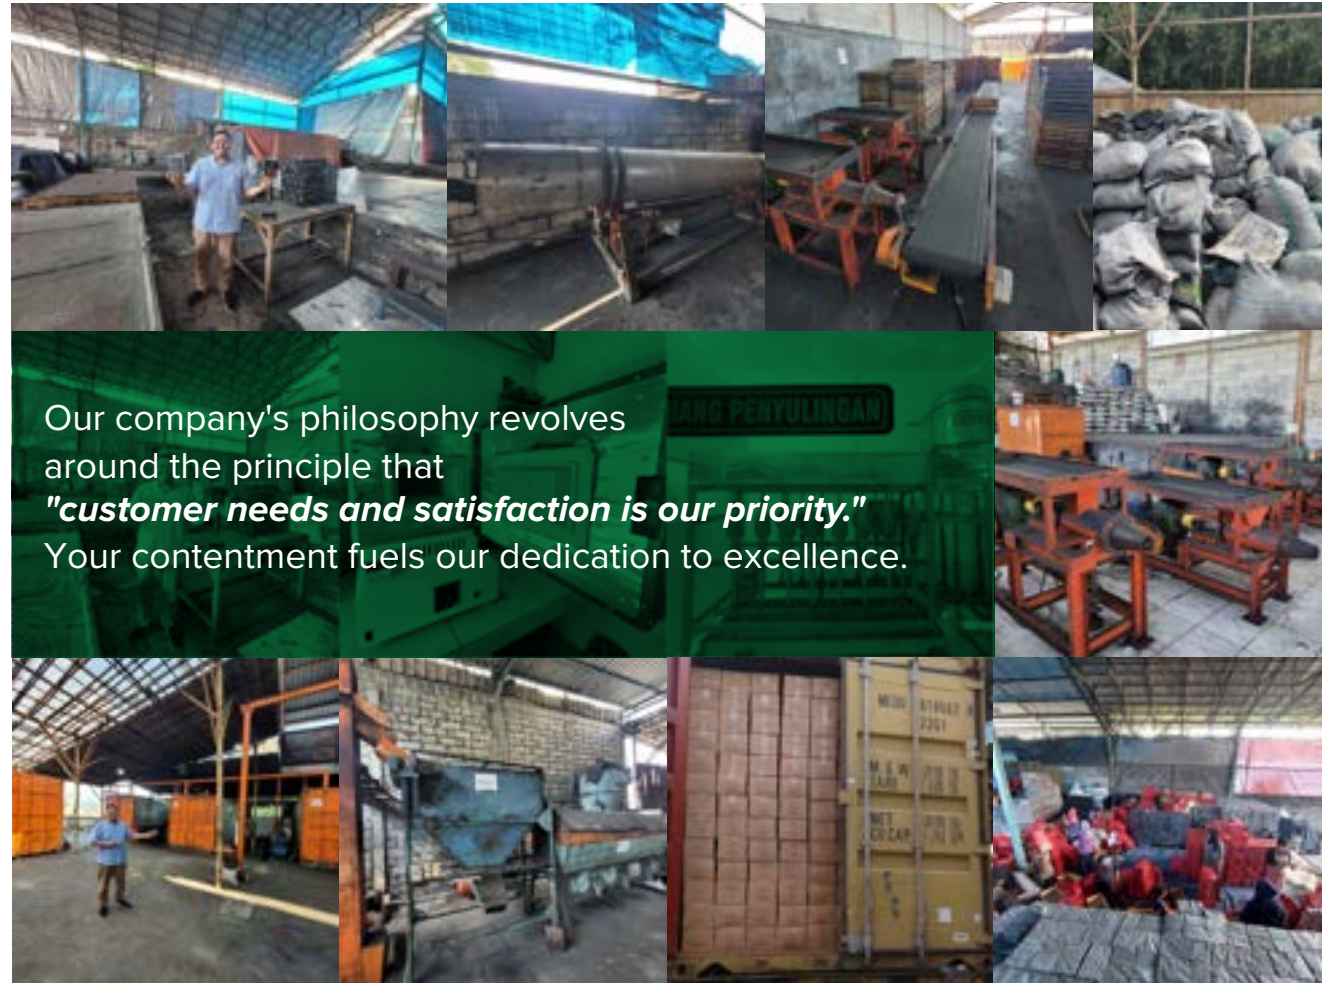

**PT SABRI AGRO
INTERNATIONAL**

PT. SABRI AGRO INTERNATIONAL

we are a leading exporter of high-quality briquette charcoal from Indonesia, Our commitment is to provide you with the finest briquettes of charcoal, meticulously crafted from premium coconut shells.

We adhere to the highest standards, ensuring unparalleled quality. From factory audits to production licenses, our dedication to quality control is unwavering.

We welcome customers who wish to witness our production process, embodying transparency and trust.

VISION

Being the primary international producer of Indonesian coconut charcoal

MISSION

**to produce a product of high quality
to maintain the product's consistency,
quantity, and quality
to provide the client with the finest services
and prices affordable**

SPECIFICATION DETAIL

Sourced from the abundant coconut plantations of Sumatera Island, our raw material is matured, high-quality, and 100% natural coconut shell. Utilizing sophisticated agricultural technology, we transform these shells into premium briquette charcoal at our Sukabumi (West Java) facility.

Our briquettes boast 100% high-quality and matured coconut shell content. Crafted with eco-friendly components, our charcoal is sulfur-free (0.0% sulfur), ensuring prolonged burning for up to 2 hours, depending on usage conditions. The meticulous manufacturing process results in odorless, smokeless, and spark-free charcoal. Its high density, achieved through precise pressing, guarantees a consistent, long-lasting burn.

At PT. SABRI AGRO INTERNATIONAL, we are dedicated to offering our customers the best services at the most competitive prices. Our focus remains on customer satisfaction, ensuring that you receive top-notch products and exceptional service every time.

OUR PRODUCT

CUBE 22/25/26

- Calories : >7000
- Moisture : < 6%
- Fixed Carbon : > 79%
- Ash Content : < 2,2% (lights)
- Odorless and Smokeless
- Burning Time : 1.5 - 2 hours
- 100% Natural chemical free
- Environmentally Friendly
- Raw Material : 100% using the finest, high quality and matured coconut shell

HEXAGONAL

- Size : 2,2 x 2,5 x 4 - 6 cm
- Calories : >7000
- Moisture : 5 - 6%
- Fixed Carbon : > 79%
- Ash Content : > 2,5% (light)
- Odorless and Smokeless
- Burning Time : 1.5 - 2 hours
- 100% Natural chemical free
- Environmentally Friendly

MANGROVE CHARCOAL

- Fixed Carbon : >73%
- Calories : >7200 Kcal/Kg
- Moisture : 3 - 7%
- Ash Content: 5 - 8%
- Volatile Matter: < 16%
- Burning Time : 3 - 5 hours/kg
- Shape : Lump or Stick
- Environmentally Friendly

PILLOW SHAPE

- Calories : 6500
- Moisture : 8%
- Fixed Carbon : > 60%
- Ash Content : < 20% (light)
- No Smell and Good Density
- Burning Time : 1.5 - 2 hours
- Environmentally Friendly

"These raw material are using 100% high quality and matured coconut shell."

MIX HARDWOOD CHARCOAL

- Size : 5 - 15 cm
- Volatile : 16%
- Moisture : Max 7%
- Fixed Carbon : > 73%
- Ash Content : > 3 - 6%
- Environmentally Friendly
- Impurities : Max 1%
- Burning Time: 3 - 4 hours/Kg
- Odorless and Smokeless
- Shape: Mixed lump & stick

TAMARIND CHARCOAL

- Size : 8 - 20 cm
- Calories : 7400/Kg
- Moisture : 8%
- Fixed Carbon : > 73%
- Ash Content : > 3,7%
- Burning Time : 3 - 4 hours/kg
- Material : 100% Tamarind
- Environmentally Friendly

HALABAN HARDWOOD LUMP CHARCOAL

- Volatile Matter : <16%
- Heat : 7000 kcal min.
- Moisture : < 8%
- Fixed Carbon : > 73%
- Ash Content : < 3,5%
- Sparkless and Smokeless
- Burning Time : 3 hours/Kg
- Fraction Size: 40 - 200mm
- Environmentally Friendly
