

CABLE PROTECTORS

Cable Protectors protect cables. Moreover, they create areas that are easy to walk and drive over. These can secure events, construction sites, and more. Cable Protectors protect in two ways. First, they guide cables and hoses of various designs across the terrain in orderly paths and cover them securely. Secondly, this type of covering opens up edge-free areas for pedestrians and vehicles alike. You can walk and drive over these areas without any problems.

Areas of application:

Mobile crane sites

Heavy-lift transport

Mobile logistics

Wind power generator construction

Temporary walkways

Road construction and access roads

Line construction

Concerts and events

Mobile parking lots
