Phonics- 'all, oor and aw' and "January"

Today we will look at the second 3 main patterns of the 'or family' and we can play some games to help us consolidate these. Don't forget to practise the tricky word- "January"

Game 1. 4 Corners

Write the digraphs 'all', 'oor', 'aw' and Tricky Word "January" nice and big on a piece of A4 paper. Place each piece of paper in a corner of your garden or front room. Ask another person to say a word eg floor and you go and run and stand next to the alternative digraph that you think it belongs to. Repeat to cover all examples.

Game 2. Bingo!

Make a 'or family' word bank and write down 15 different words on 15 slips of paper containing the 'or family'. Now ask another person to choose 5 of those words and write them down on a separate piece. You choose 5 words and also write them down on your separate piece of paper. Now carefully fold the 15 pieces in half and pop them in a container. Mix them up and take it in turns to close your eyes and pull a word from the container. If you have it then cross it out and take it in turns until you or your adult has crossed off all 5 chosen words.

Game 3- [Twinkl game click the hyper link.](#)

Don't forget to write a sentence and include tricky word Mr. Eg. "The cat used its paws to jump from the wall to the floor."

Fluency - Solve these addition and subtraction word problems. Remember to use objects at home to help you.

1. Colin has a pack of eight pencils. Colin takes two out of the pack. How many are left?
2. Coco eats 7 crackers then eats 3 more. How many crackers has she eaten altogether?
3. Colin jumps over 4 daises. He then jumps over 4 more daises. How many daises has he jumped over in total?
4. Coco builds a tower using 10 cuboids. Colin builds a tower using 8 cuboids. What is the difference between the number of cuboids they use?

Create your own problems using addition and subtraction facts.
