

Prime numbers

Remember, prime numbers only have 2 factors—1 and itself

Do it

Circle the prime numbers in each set of numbers:

1) 5, 6, 7, 8, 9

2) 10, 11, 12, 13

3) 16, 17, 18, 19

4) 1, 2, 3, 4

5) 12, 13, 14, 15

Secure it

Mr Pajak thinks that 1 is a prime number.

Explain why he is incorrect.

Deepen it

The answer is 36

Add prime numbers together to make the total.

Do it in several different ways.

Solve it with two numbers.

Solve it with more than two numbers.
