

**Key Learning Point**

Recall and use multiplication facts for the 4 times table.

**I S G**

Do it

Calculate:

1)  $4 \times 4 =$

2)  $4 \times 6 =$

3)  $7 \times 4 =$

4)  $9 \times 4 =$

5)  $\underline{\quad} = 12 \times 4$

6)  $\underline{\quad} = 3 \times 4$

Secure it

Coco thinks that

$$4 \times 8 = 34$$

Do you agree?

Draw a picture to prove it.

**Key Learning Point**

Recall and use division facts for the 4 times table.

**I S G**

Do it

Calculate:

1)  $12 \div 4 =$

2)  $20 \div 4 =$

3)  $28 \div 4 =$

4)  $\underline{\quad} = 36 \div 4$

5)  $12 = 48 \div$

6)  $\underline{\quad} = 16 \div 4$

Secure it

Coco thinks that

$$20 \div 4 > 20 \div 2$$

Do you agree?

Explain your thinking.

Deepen it

Find the missing digits.

$$\square 6 \div 4 = \square$$

$$\square = 2 \square \div 4$$

$$\square \square \div 4 = \square$$

$$4 = \square \square \div \square$$

Solve each problem in several different ways where possible.

Solve all the problems together using the digits 0, 1, 2, 3, 4, 5, 6, 7, 8 and 9 once each.

Deepen it

Always/ Sometimes/  
Never True

Multiples of 4 are even.
