Making Energy Transition

Sveriges
Ingenjörer

A Subsidiary of PETRONAS Chemicals Group

Industry: Specialty chemicals

Location: Malmö

Looking for: Master's thesis / Bachelor's thesis,
Summer job, Opportunities abroad, Full-time
position, Remote / distance work

Website: <https://www.perstorp.com/>

LinkedIn: [https://www.linkedin.com/
company/perstorp-group/](https://www.linkedin.com/company/perstorp-group/)

6

”Thoughtful Chemistry – We believe in doing good with chemistry. So we are here to lead change towards chemistry that advances everyday life for the better.

Perstorp is a global specialty chemicals group, owned by Petronas Chemicals Group. We are a market leader in polyol and oxo chemistry. Perstorp is a Swedish company founded in 1881 and we have around 1,700 employees and 8 production sites worldwide. We are a frontrunner in green chemistry.”

7

ALFA LAVAL

”Alfa Laval is a global leader in heat transfer, separation, and fluid-handling technologies, serving a wide range of industries including energy, marine, food, and water. For more than 140 years, we have helped customers optimize processes, improve energy efficiency, and reduce environmental impact through innovative engineering solutions. Our mission is to accelerate success for our customers, people, and planet—driving sustainable progress through reliable, high-performing technologies.

Industry: Industrial Machinery Manufacturing
(Engineering, Energy, IT, Food and Water, Marine)

Location: Lund

Looking for: Master’s thesis / Bachelor’s thesis,
Summer job, Trainee program, Full-time position,
Part-time position

8

At Alfa Laval, students and graduates join a company where innovation, collaboration, and continuous improvement are embedded in our culture. We value curiosity, technical excellence, and a strong commitment to sustainability. With ongoing projects in energy efficiency, decarbonization, digitalization, and circular solutions, you’ll have the opportunity to contribute to meaningful global challenges.

Whether you’re interested in R&D, engineering, supply chain, business development, or digital technologies, Alfa Laval offers hands-on experience, mentorship from experts, and the chance to develop your skills in an international environment.

Students choose Alfa Laval because they can make a real impact from day one, working with advanced technologies that shape a more sustainable future.”

FOI

Totalförsvarets
forskningsinstitut

Industry: Defence, Research, Engineering,
Location: Stockholm, Linköping, Grindsjön, Umeå
Looking for: Master's thesis / Bachelor's thesis,
Full-time position, Praktikjobb

Contact: Se exjobbskatalogen

Website: <https://www.foi.se/>

LinkedIn: [https://www.linkedin.com/
company/foi/](https://www.linkedin.com/company/foi/)

”Totalförsvarets forskningsinstitut (FOI) är en statlig myndighet som bedriver världsledande forskning inom försvar och säkerhet till stöd för Sveriges militära och civila försvar. Med ett fokus på att förstå, förklara och förändra tillhandahåller vi ny kunskap och expertstöd. Många gånger sker arbetet tillsammans med olika allierade inom Nato. Forskningen tillämpas både inom försvarsmyndigheter och hos civila aktörer och spelar en avgörande roll i att bygga en relevant och effektiv försvarsförmåga.

Verksamheten spänner över hela totalförsvaret och omfattar bland annat: Undervatten, cyberförsvar, rymd, telekrig, sensorsystem, civilt försvar, CBRNe (kemiska, biologiska, radiologiska, nukleära och explosiva ämnen), militära plattformar inklusive vapen och skydd samt säkerhetspolitiska analyser.”

GRAPHIC PACKAGING INTERNATIONAL

Graphic Packaging

INTERNATIONAL

”At Graphic Packaging International, we produce the paper cup for your morning coffee, the basket that transported those bottles of craft beer you enjoyed last weekend, and the microwave tray that heated your gourmet meal last night. As one of the largest manufacturers of paperboard and paper-based packaging, we serve some of the world’s most recognized food, beverage, household, personal care, and pet care brands.

With over 130 facilities worldwide we deliver innovative packaging solutions that help brands stand out in a competitive market. Our portfolio focuses on renewable, recycled, and recyclable materials, reflecting our commitment to our customers, 24,000 employees, and environmental sustainability.

For over 100 years, legacy companies have shaped Graphic Packaging International. While our name has evolved, our dedication to innovation, quality, and service remains constant.”

JM JOHNSON Matthey

We're proud to say that for over two centuries, we've helped tackle some of the world's biggest challenges. And we're continuing to do so today, using our advanced metals chemistry expertise and technology solutions to enable the world's leading energy, chemicals and automotive companies to decarbonise and reduce harmful emissions.

With global challenges of climate change, energy supply and resource scarcity more pressing than ever before, we're making it our purpose to catalyse the net zero transition for our customers, and millions of people every day.

Joining Johnson Matthey as a graduate provides an extraordinary opportunity to play a key role in developing sustainable solutions.

We're Johnson Matthey

Catalysing the net zero transition

WHAT WE DO

Develop and manufacture pharmaceuticals, medical devices, and combination products in line with regulatory and industry standards.

Produce safe, effective, and high-quality products that add value for our customers.

OUR EXPERTISE

With extensive experience in polymer-based delivery systems, we stand out for our unique (co)-extrusion capabilities, readiness to manufacture investigational medicinal products for clinical trials, and ability to handle high-risk drugs safely. We have also submitted several patents for new drug delivery systems and manufacturing methods.

SAFETY, HEALTH AND ENVIRONMENT

We prioritize safety and environmental responsibility. Through continuous improvement and prevention measures, we minimize risks to employees and ensure our production activities have minimal impact on the environment.

At Sever Pharma Solutions, your work truly makes a difference—locally and globally.”

17

TOPSOE

Making Energy Transition

Committed to finding answers, together
We're problem solvers who believe impossible is just a state of mind and that challenges are there to be overcome. Together, we apply our knowledge to shape the future of sustainable energy and create solutions that make a real difference – just as we've done for decades by tackling some of the world's toughest challenges. In every corner of our business, in every role and office, you'll find people committed to finding answers. Let's go solve.

Industry: Energy

Location: Copenhagen

Contact: Website

Website: topsoe.com/

LinkedIn: [linkedin.com/company/topsoe/](https://www.linkedin.com/company/topsoe/)

Founded on a belief in better

Over 80 years ago, our founder laid the foundation for a company built on curiosity, innovation and the belief that challenges are there to be solved. This mindset still inspires us as we push the boundaries of what's possible to shape a sustainable future.

A community of problem solvers

Solving the world's toughest challenges requires collaboration and diverse perspectives. That's why we foster a culture where everyone is respected, ideas are welcomed from anywhere and we work together to turn ambition into action.

Experts with purpose

Across engineering, operations, and business roles, we share a passion for excellence and a commitment to accelerating decarbonization and delivering measurable impact. At Topsoe, we don't just talk about change – we make it happen.”

AAK

”About AAK

Everything AAK does is about Making Better Happen™. AAK specializes in plant-based oils that are the value-adding ingredients in many of the products people love to consume. We make these products better tasting, healthier, and more sustainable, with more than 150 years of experience. Sustainability is at the heart of our purpose Making Better Happen™. Our sustainability work is embedded in all parts of the AAK value chain, from the crop all the way to the brand on the store shelf. Making Better Happen from plant to brand.”

BIOGLAN AB

BIOGLAN

REIG JOFRE

"Bioglan AB is a contract development and manufacturing organization with more than thirty years of experience in research, development, manufacturing and marketing of pharmaceuticals.

We develop, produce and market pharmaceuticals and medical device. We also provide support for pharmaceutical healthcare and life science companies in all aspects of development and manufacturing of semi-solids and liquid products. We collaborate with companies of all sizes, from the smallest start-up to the leading pharmaceutical companies.

Our manufacturing authorization from the Swedish Medical Product Agency allows us to produce non-sterile semi-solid and liquid products, both at pilot scale for clinical trials or a full-scale to supply a large commercial market. Our quality system fulfils the EU GMP requirements as well as the ISO13485 standard for Medical Devices.

Bioglan constantly strives to improve and contribute to a good environment and a sustainable society by:

- Preventing negative environmental impact by taking environmental considerations into account when making decisions and reducing the risks of releases of active substances (API) into the environment.
- Reducing the environmental impact from our facilities, transport, services and products.
- Bioglan runs on electricity that comes 100% from renewable energy.

Bioglan is environmentally certified according to ISO14001."

DOW

Discover Your Future with Dow!

Dow is a global science and technology leader with 35,000 employees working across diverse industries—from adhesives and paints to textiles and advanced materials.

Here in Landskrona, about 35 passionate colleagues produce polymer emulsions for paint and adhesive customers across Northern Europe.

What makes Dow exciting?

- We’re driving sustainability forward—investing in CO₂-neutral crackers, recyclable plastics, and bio-based raw materials.
- Our products in Landskrona are water-based and we’re innovating with recyclable paper barrier coatings.
- We prioritize water reuse and aim for zero discharge to the environment.

At Dow, you’ll find a workplace where science meets purpose. Whether you’re looking for a summer job, planning your master thesis, or dreaming of a career in sustainable innovation, we offer opportunities to learn, grow, and make an impact.

Join us—and help shape a better tomorrow!

Industry: Chemical and Process Engineering

"Geberit in Sweden is part of the Geberit Group, market leader in Europe in sanitary ceramics, both sales, production and logistics areas.

Geberit has a strong local presence in many European countries, which provides a unique added value regarding sanitary technology and bathroom ceramics. Geberit is best known in Sweden for the Ifö brand, which has a long tradition of ceramic manufacturing linked to Bromölla, north-eastern Scania next to the Lake Ivösjön. Here, Geberit has one of the two most technologically advanced production units in the world for ceramic casting. Geberit refines the product from raw materials, all the way to assembly and delivery at the end customer.

Product development, chemical and production processes around clay, slip and glaze as well as our development projects are focus areas for the function in daily production. Since 2015, Ifö is owned by Geberit with headquarters in Rapperswil-Jona in Switzerland.

Geberit is the only company that produces sanitary products made of porcelain in the Nordics and in the coming years we may recruit Chemical Engineers and Mechanical Engineers to our plant in Bromölla, one hour by train up north from Lund.

Geberit Group is constantly searching for talents. Our development program "Operational Development Program" where we offer candidates, with right competence and ambition, to develop as an individual in leadership, through exciting projects and contributes step by step, during a four years international program and then to return to a production facility, in a leading position and develop both individual and together with Geberit.

You are welcome to apply via our career page www.geberit.se/karriar/

29

ORS CONSULTING

”Founded in 2009, ORS Consulting is a risk and safety consultancy helping industrial asset owners prevent process-related accidents and improve uptime across sectors such as oil and gas, chemicals, power, aquaculture, defence and renewable energy.

Our mission is to deliver clear, actionable advice that supports decision-making and optimization. We provide services in technical risk management, process safety, functional safety, system reliability, ICS/OT cybersecurity and barrier management, supporting clients throughout the project lifecycle, from concept to decommissioning.

Guided by our principles of one team, to the point and client-oriented, we strive to be the preferred risk-based industrial advisory partner.

At ORS, you will join a dynamic consultancy where safety and autonomy are key, and your growth is a priority. From day one, you will work on real projects that develop your technical, commercial and business skills. Through the ORS Academy, you will be assigned a mentor who will actively support your journey. You will build a strong network of industrial safety specialists and collaborate with clients across diverse industries and global locations.

If you are looking for excellent development opportunities and a career that impacts industrial safety and reliability worldwide, ORS is the place to start.”

”VA SYD is one of Sweden’s largest water and waste organizations that invests heavily in sustainable wastewater treatment and pushes for environmentally smart solutions in community building. Our business is open 24/7, has more than half a million customers and a turnover of more than 1,5 billion kronor per year. We are in everyone’s everyday lives and we are seen in so many different ways; tap water, flush the toilet, take a shower, sort the waste, garden waste and we make room for the water. We are an important player in society.

What do we do? We purify, quality assure and supply drinking water and take care of what is flushed down our sewers to care for the sea and watercourses. We manage rainfall by creating creative solutions for the water’s path and collect waste for recycling. We motivate and inspire our customers to make smart environmental choices.

Together with the member municipalities, VA SYD works with a long-term perspective to enable growth and contribute to a more sustainable society. This is why we are now building MAX-IMA – a robust wastewater treatment system that meets the needs of a growing population, stricter purification requirements, and climate change. Overall, a shared wastewater treatment system provides greater benefits at a lower cost.”
