

CARROT & PEA

Inspired by the book *Carrot & Pea: An Unlikely Friendship*, we are going to build our own **towers**, **bridges**, **seesaws**, and **slides**!

Below are ideas for materials to collect to make structures. We hope this list will inspire you to look around your space creatively and gather some materials that you would like to test out.

peas (things that roll)

Collect some objects that roll, like different kinds of balls or even limes. Try to find objects that are the **same size** but **different weights**.

more ideas

Tape, scissors, drawing materials, and construction paper can help transform everyday objects into characters.

carrots (building materials)

Make your own Colin the carrot using things like cardboard boxes or sheets, poster board, blocks, books, cardboard tubes, cutting boards, container lids, and other everyday materials.
