

Project Designer for Labflex

We are currently experiencing a robust period of growth and are looking to expand our UK organization.

Labflex Limited are one of Europe's leading suppliers of Laboratory solutions to the Industrial & University Laboratory market. With over 60 years' experience the business has its headquarters in Denmark and UK.

We are seeking a talented Project Designer to join our dynamic team based primarily in our Sheffield Project Office. This role reports directly to the Project Director and is integral to the successful execution of laboratory projects nationwide.

As a BIM/Revit Project Designer, your main responsibilities will include:

- Working with BIM and Revit software
- Assisting Project Managers on a range of duties mainly focused on Design
- Occasional site visits
- Engaging with project stakeholders to ensure smooth project execution
- Assisting in maintaining the Labflex BIM families

QUALIFICATIONS / REQUIREMENTS

- Degree or equivalent qualifications in BIM and Revit
- Experience working with BIM and Revit
- Experience working with Microsoft Office Word / Excel / Project

YOUR PROFILE

- You have a positive attitude and find it natural to build good working relationships both with colleagues and external partners
- You take responsibility and can work both can independently and as part of a team, structured and systematic approach to tasks
- You thrive on challenges, while recognizing the necessity of the routine tasks in a busy production environment
- In daily life, perceived you as a loyal, committed and responsible

WE OFFER

- An exciting and challenging job in a growing organization
- A dynamic and informal environment supported by a highly motivated team
- Salary & benefits according to experience & qualifications
- Full training will be given

LOCATION

Full time job primarily based in the Labflex Sheffield Project Office with a degree of Hybrid working
