

IN PURSUIT OF KNOWLEDGE

**You are going to start your first project.
What do you do?**

You know very little about the project topic.
Where do you look for information?

- Do you ask an AI chatbot?
- Search broadly on Google?
- Check the reading list?
- Ask a fellow student or your lecturer?
- Use the library?
- Or... ?

1

**Your project must include references
and a reference list. Why?**

You are working on your project and have found a
lot of literature.

- When should you cite this literature?
- Why should you cite it?

2

**An AI chatbot gives you a good answer –
How do you use it?**

You have asked for background information for
your project. The answer is convincing and well
written.

- Do you use the answer as it is?
- Or...?

3

**You search for project literature on
Google. Why look any further...?**

Google gives you a lot of results quickly and
easily.

- Do you search elsewhere?

4

**You've found a lot of sources for your
project. When is a source reliable enough?**

Which of these sources would you use at
different stages?

- A Wikipedia entry
- A newspaper article
- A blog post written by an expert
- A scholarly article
- An answer from an AI chatbot

5

**Your educational institution has a library –
Can you use it?**

How do you imagine using the library during your
studies or project?

- As a place to sit and work
- To borrow a book
- To ask a librarian for help
- To search for scientific literature
- Or?
