

Candida Albicans, Yeast, Anaerobic Pathogens

- Antibiotics overuse
- BCPs
- Stress
- Glyphosate
- Prednisone

Glucose Pathway

Pyruvate

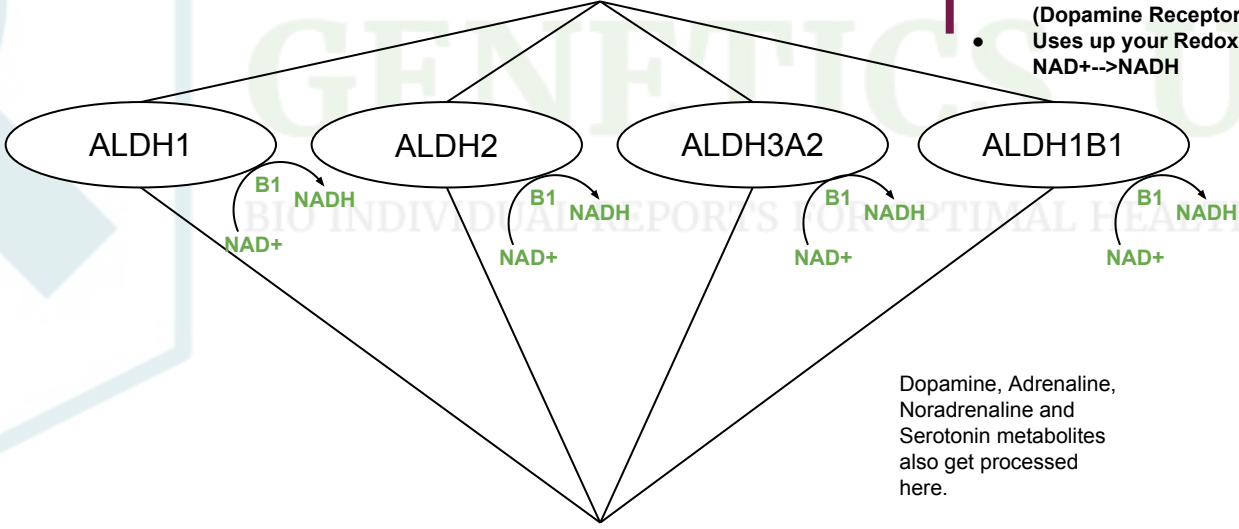

Ethanol

Acetaldehyde

- B5 depletion (contribution to adrenal dysfunction)
- Methylation inhibition
- Weakens intestinal permeability
- Addictive like behaviour via DRD2 (Dopamine Receptor) stimulation
- Uses up your Redox potential: $\text{NAD}^+ \rightarrow \text{NADH}$

Dopamine, Adrenaline, Noradrenaline and Serotonin metabolites also get processed here.

Acetate
