

SPECIFICATIONS

HOSE RAMP.

DESCRIPTION:

- Ideal for temporary or semi-permanent use
- Suitable for hoses and large cables
- Heavy duty rubber moulding
- Two open channels (up to 75mm diameter)
- 300mm width. For example a 3m length would require 10 pieces
- Reflective strips
- The Hose Protector reduces traffic speed
- Quick and easy to put in place – pieces easily join together
- Recommended maximum speed 5mph
- Suitable for HGV use
- The Purpose of Hose Protectors

If you're working on a project that involves hosing or cables, the last thing you want is for your equipment to be run over. This can be especially important if you're using such equipment to work in a high traffic area.

Weight: 15kg
