## SPECIFICATIONS

### RUBBER CORNER GUARD.

#### DESCRIPTION:

Constructed from high impact resistant rubber  
Includes reflective yellow strips for visibility  
Designed to protect the corners of a building from damage  
Works great inside and outside  
Minimizes damage caused to vehicles upon impact  
Resistant to extreme temperature variations, UV light, oils and moisture  
All weather maintenance – won't rust, chip, crack, crumble, corrode or need repairing  
Easy installation and durable product  
This corner guard not only protects the structure and appearance of a building but also prevents scratches and dents to the vehicle

#### Applications:

Ideal for parking structures, industrial and commercial buildings  
Rubber corner protectors provide maximum protection in storage spaces, parking garages and loading docks.  
This corner guard can be used on corners inside or outside and won't chip, crack, rust or corrode.
