- Quick and easy to set up
- 2 channel
- Dimensions: 1000mm (L) x 255mm (W) x 45mm (H)
- Weight: 5kg

What is the purpose of the Cable Cover?

Protection of electrical cables in the workplace is a major concern, and that's why the cable cover was developed. On an average day, many people traffic over cables without even giving it a second thought. However, if these cables were exposed, they could cause serious health hazards, both to the people passing over them and the building in general. Cable covers provide a safe and affordable way to keep cables secured and safe from fraying due to excessive traffic. They also present a very visual warning to people to be careful when walking around the cables so as not to trip themselves up.
