OUR MISSION

“Eton Safety aims to lead the road, highways, private and personal protective equipment industry in designing, supplying, and marketing in-spec/on-time head-to-toe innovative products and services; In so doing, enhance safety, help protect lives and property in Nigeria and help improve public confidence”

COMPANY PROFILE:

With thousands of solutions installed across Nigeria, we're helping to save lives every day. Established in 2010 to provide traffic calming solutions to protect residential streets, Eton Safety has since become a market leader and innovator.

Eton Safety Equipment is the brand name of Eton Consulting Limited, a Private Limited Liability Company incorporated in Nigeria, the company corporate head office is at 7, Augusto Close, Off Rasaq Balogun Street, Off Adeniran Ogunsanya, Surulere Lagos.

Our dynamic line of products have evolved to include a complete line of approved rubber traffic calming solutions include speed humps, speed cushions, speed tables and flexible curbing while we also have a wide range of cones barriers for different uses on the road.

Many of our customers are repeat buyers who have made Eton Safety solutions a part of their strategy to create safer, more viable roads. In fact, Eton Safety solutions have been installed in more locations than any other solution in Nigeria.

SAFETY BOOTS

STERLING STEEL SAFETY BOOT

Black buffalo grain leather chukka boot. Padded collar for added comfort. Steel toe cap and steel midsole protection. Dual density polyurethane outsole. Anti-static. An entry level lightweight safety boot for most industries.

EURO SIZE: 37 38 39 40 41 42 43 44 45 46 47 48 49 50

EAR PROTECTION

Peltor Optimel II H520A ear defenders headband version

3M Peltor Optime II Passive Ear Muffs H520A. Headband option. Developed for demanding noisy environments, particularly suited for noise levels dominated by low to medium frequencies. The sealing rings in the ear defenders are filled with a unique combination of liquid and foam. The result is an optimum seal with low contact pressure, which provides agreeable comfort even during long-term use.

Colour: Black
Type H 34/M 29/L 20, Sound Noise Reduction (SNR) 31 dB, weight 210 g.
Conforms to: EN352-1

SAFETY VEST

- *Conforms to EN471 Class2 *Fabric:100% polyester tricot / knitting *Tape: Hi-Vis Reflective Tape (120G)
- *Color: Fluorescent Yellow / Orange *Size: S-3XL *Closure: Zip *MEAS: 100PCS/CTN/48*32*48cm

PRODUCT DESCRIPTION

1. High visibility clothing for day & night use.
2. Extremely comfortable to wear.
3. Available in highly visible fluorescent Yellow or Orange.
4. Reflective tape enhances visibility.
5. Also available in EN 471 certifications.
6. Various options of branding on vests available.
7. This lightweight material is breathable and cool in hot weather yet durable enough for the construction industry.

APPLICATIONS

It can be used in construction, painting, utilities, and law enforcement occupations, as well as for all general safety needs in an indoor or outdoor workplace.

- *Conforms to EN471 Class2 *Fabric:100% polyester tricot / knitting *Tape: Hi-Vis Reflective Tape (120G)
- *Color: Fluorescent Yellow / Orange *Size: S-3XL *Closure: Velcro *MEAS: 100PCS/CTN/48*32*48cm

PRODUCT DESCRIPTION

1. High visibility clothing for day & night use.
2. Extremely comfortable to wear.
3. Available in highly visible fluorescent Yellow or Orange.
4. Reflective tape enhances visibility.

3M 9322 PARTICULATE RESPIRATOR DUST MASK

Standard EN 149:2001 FFP2

Protects against dust, mist and metal fumes

Suitable for welding fumes, grinding & sanding

Valved for additional comfort

Fold flat mask

SAFETY GOGGLES

- Clear lens or Smoked Anti Glare Lens spectacle with contour design & flexible frame
 - Good versatile fit
 - Extremely lightweight & comfortable
- Conforms to EN166.1.F

SAFETY EARPLUG

1 Pair Moldex Rockets Corded Reusable Ear Plugs With a handle built in for easy insertion and extraction, these Moldex earplugs are incredibly easy to wear. They are reusable earplugs, made from a soft material to ensure comfort during long-term wear. Their bright colours make them ideal for wear at work, as they can be easily spotted during a compliance check. Ideal for those wanting to reduce the noise surrounding them instead of blocking it out.

The air bubble in the tip provides cushioned comfort for all-day wear. The soft, flexible flanges provide a superior seal and fit most size ear canals. These earplugs come with a pocket pack for storage and a cord that makes keeping hold of your earplugs easy. The Rockets are also washable with mild soap and warm water.

Black Base PVC Traffic Cone | America & Australia Model

Our PVC Traffic Cones are made from 100% recyclable high density base, with a coat of orange fluorescence colour to provide high visibility protection. Also, the pre-applying of the 3M high-intensity cone collar increases the durability and life span of our product. Finally, complying to the world-wide standard, the circle interlocking system (CIS) technology is applied to our PVC Traffic Cones to interlock the base and the cone into a single piece.

Our retractable Traffic Cones are provided to be easily noticed, very compact and an easily stored safety tool, which helps the user to convey conveniently by having small volume.

Our Retractable Traffic Cones are made of water proof (Basket weave) oxford material, and can also be equipped with other gadgets such as warning lights and belt bars.

Our retractable Traffic Cones share the same advantages as the traditional cones and practically serve the same purpose but easier to convey numerical volume.

Retractable Traffic Cone Topper

The Red and White diagonal stripes belt is designed to conveniently fit over most standard traffic cones.

With its 4 way connectivity, it is easy to use and it has been proved to be the quick and effective way to restrict access.

Speed Hump

Yellow EPDM Rubber Embedded

Molded Yellow Rubber Piece for Longer Service Life!

*In the past most speed humps are glued with Yellow reflective Tapes, which then causes the reflective tape to only last about a years or two.
But we at Eton Safety Product Ltd has gone as far as embedding the yellow EPDM rubber into speed the hump through a special process, which then prevent the colour from fading or cracking under any weather condition or environment.
Further, Eton Safety Product provides 5 years quality assurance for all [Yellow EPDM Rubber Embedded] Speed Humps.*

DII-PSP-1	3000mm	250mm	25mm	11Kg	360x250x310mm	20Tons

Easy Installation, No Screws/Adhesive Needed.

Highly visible and reflective at night.

Usable in all weather conditions.

Can withstand any size of Vehicle/Car.

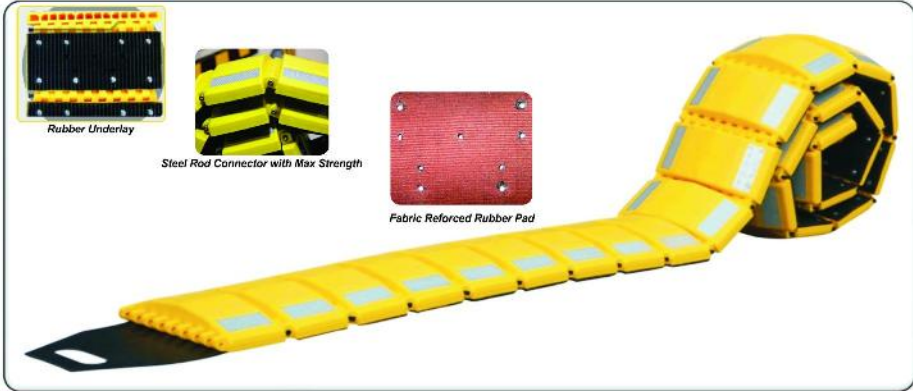

Easy to remove and roll up back to it's bag.

Polyurethane Raw Materials.

Portable Speed Hump | PP Materials

The highly visible system is designed for temporary speed control application where it is desired to slow traffic speeds to 40km/hr. The secret behind the success of this particular system, is its unique 'waffle-style' rubber underlay which maximizes adhesion to the road surface as vehicles traverse. It has been designed for use around highway work zone to assist in reducing speeds.

Model No	Max Length	Width	Height	Weight	Roll Up Size	Bearing Wight
DH-PSP-2	3000mm	250mm	45mm	13Kg	540mm Diameter	10Tons

Easy Installation, No Screws/Adhesive Needed.

Highly visible and reflective at night.

Usable in all weather conditions.

Can withstand any size of Vehicle/Car.

Easy to remove and roll up back to it's bag.

Polyurethane Raw Materials.

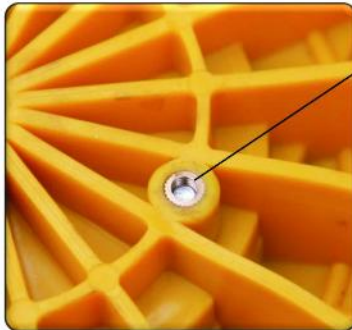

Round Solar Speed Hump

This highly visible system is designed for temporary or permanent use, it is made from Yellow Polyurethane with 6 pieces of flashing LED. It is perfect for all road use.

Model No	Diameter	Height	Weight	Reflector	Bearing Wight
DH-RSP-2	300mm	45mm	1.0Kg	6 Solar Flash LED	20Tons

Pre-Molded Nut for fixing the Solar Stud Easily.

Highly visible and reflective at night.

Usable in all weather conditions.

Made of the mos durable Polyurethane.

Anti Slippery Surface Pattern Design.

3 Flashing LED light Each Side.

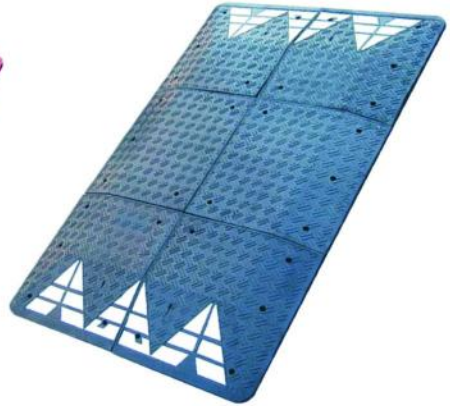

Rubber Speed Cushion

Rubber Speed Cushions are made from recycled rubber tires. Rubber is lighter and easier to work with than asphalt and concrete, significantly minimizing the number of hours that is needed to install the solution. Embedded reflective material increases visibility and safety during day or night.

Installation Accessories:

Rubber Pedestrian Crossing

- Completely made of vulcanized rubber movable modular parts.
- The upper surface have a non-slippery surface raised stud.
- Fixed to the ground by expansion screws and Bone Connector.
- The particular size of the modular parts can be use to meet any road standard
- High-Intesity reflective pedestrian crossing sign provides better visibility at night

Model	Part	Dimension	Weight
PC-B	Black Middle	500x500x70mm	17.00Kg
PC-W	White Middle	500x500x70mm	17.00Kg
PC-E	End Cap	500x500x70mm	12.00Kg
PC-E	End Cap	500x500x70mm	11.00Kg

The pedestrian crossing speeds up the running vehicles, giving them a vertical acceleration as strong as the vehicle speeds, this characteristics will push the drivers to limit their speed, avoiding dangerous situations, especially for motorcycles and other road users.

Traffic Lane Separator System

Model No	Part	Length	Width	Thickness	Post Height	Weight	Colour

Stainless Steel Retractable Crowd Control Barriers

Retractable belt stanchions, also known as Crowd Control Barrier, widely used in daily life, whether in the airport, banks, post offices, hotels, and enterprises are widely used in isolated areas. Isolated zone can be isolated from the crowd to meet the practical needs of the region. It provides large-scale crowd control, queuing order control and directional crowd flow must be the queue facilities and scientific planning!

Base Material: Metal cover with cement and rubber, has stronger ability against the wind and floor scuffing. Crowd control barriers with important safety features such as retractable belt braking and locking button. Retractable belt barrier can be used for large-scale crowd control, queuing order control and directional crowd flow control. Retractable belt stanchions are widely applied in shopping center, hotel, bank, hospital, station, airport, supermarket, theater, etc.

Fabric Cable Cover

Simple solution for covering cables on rugs.

Specifications

Model No	Width	Max Height	Standard Length	Available Colours
DH-FCR-1	100MM	35MM	1500MM	Yellow, grey and Black

Fabric Cable Cover is a cost effective, lightweight simple solution for covering cords and cables on loop pile carpets.

Made from tear and abrasion resistant heavy duty nylon canvas and high grade hook fastener, our cable covers are machine washable, can be tumble dried, won't rot, stain or leave sticky residue on your cords and cables.

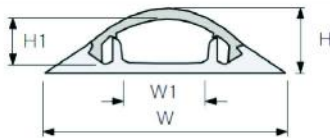

Simply lay it over the offending cord and the hook grips the carpet giving you an effective low profile solution for hazardous cords and cables.

The heavy duty nylon fabric is wear and abrasion resistant and it grips so well that it can be vacuumed over without movement. When you've finished with it, simply peel it off, roll it and store it in it's own convenient drawstring bag.

Cable Floor Duct

Size Specifications

All Size Of Wall Protector

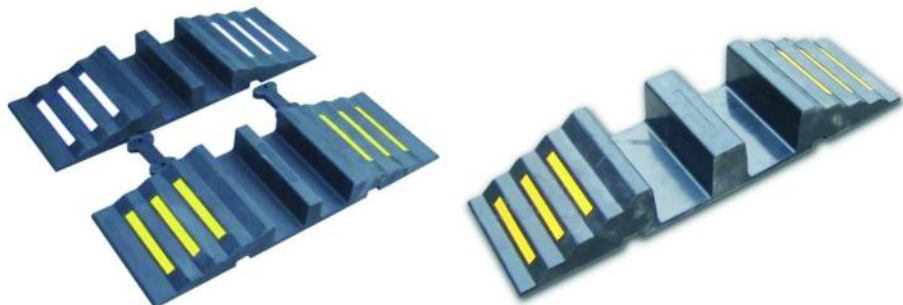

Model No	Frame Width [W]	Frame Height [H]	Channel Width [W1]	Channel Height [H1]	Length
DH-CFD-2	30mm	8mm	11mm	6.5mm	1 Meter
DH-CFD-3	50mm	13mm	20mm	9mm	1 Meter
DH-CFD-4	70mm	17mm	20mm	13mm	1 Meter
DH-CFD-5	90mm	19mm	25mm	15mm	1 Meter
DH-CFD-6	120mm	25mm	30mm	21mm	1 Meter

Cord cover have a removable cover for wire access
Self adhesive backing for easy installation
Paintable PVC so as to blend into the colour of your choice.

Wall cord covers are affordable, functional and attractive answer for wire enclosure applications in commercial, industrial and residential surroundings. The floor cord cover kit includes a full complement of accessories such as pre-applied adhesive backing, fittings and inside and outside corners so your wire management systems can be completely customizable. Use Floor Cord Covers to cover unsightly wires, anyone can benefit from using Floor Cord Covers, they are also a great solution for perimeter and open-office cable routing in working areas as well as in the Home Theater Business. They are designed to maintain proper bend radius control for high performance copper and fibre-optic cabling.

Cable/Hose Ramp

Cable/Hose Ramp is used for protecting hose and electric conduit runs with this effective, durability and long lasting product. Use to provide temporary or permanent hose and conduit runs from traffic, it is also used to protect temporary ramp into driveways during construction along curbs. Lightweight and flexible, it conforms to contours of road surface. Economical and built to last longer. Cable Hose Ramps withstand over 2000 PSI pressure. It can be easily transported and it's install fast.

Reflective Kerb Ramp

3 Different
Height
For Your Options

Model No	Part	Length	Width	Height
DH-UP-1	Middle End Cap	600mm 300mm	300mm	100mm
DH-UP-2	Middle End Cap	600mm 360mm	360mm	150mm
DH-UP-3	Middle End Cap	600mm 450mm	450mm	200mm

Why Using Kerb Ramp:

It is use for bicycle, wheelchair and Car (Roadway/Sidewalk).

Easy to install/move and sustain performance of strength force up to 20 Tons.

High performance of face grip and high brightness reflective sheet on the product.

Black Rubber Kerb Ramp

Why Use Kerb Ramp:

It is use for bicycle, wheelchair and Car (Roadway/Sidewalk).

Easy to install/move and sustain performance of strength force up to 20 ton.

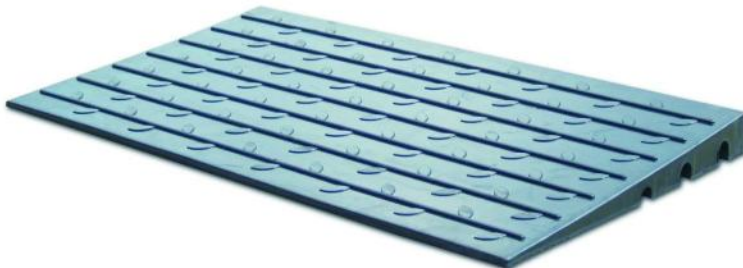

High performance of face grip and high brightness reflective sheet on the product.

Model No	Part	Length	Width	Height	Weight
DH-UP-4	Middle End Cap	600mm 250mm	250mm	100mm	8.0Kg 2.5Kg

Model No	Part	Length	Width	Height	Weight
DH-UP-5	Middle	500mm	300mm	140mm	12Kg
DH-UP-6	Middle	500mm	420mm	110mm	14Kg

Model No	Part	Length	Width	Height	Weight
DH-UP-7	Middle	400mm	300mm	110mm	12Kg

Rubber Threshold Ramp helps you move through entryways by eliminating bumps to go over. To provide a smooth and secure transition, position the Rubber Threshold Ramp against the door threshold.

Rubber Threshold Ramps for wheelchairs and scooters makes the transition from inside to outside simple and they can be used on any type of surface.

Portable Kerb Ramp with Reinforced steel Bar

Made of durable HDPE;
7 Piece Steel Bar Reinforced;
Suitable for 0-20CM Height Curb;

Dimension (cm)	Weight	Weight Capacity	Length (mm)	Width (mm)
130*70*8.5cm	13kg	500kg	700	1300

Perfect for temporary working grounds or construction site temporary wheelchair access

Light Duty Portable Kerb Ramp is an easy way to move trolleys with light loads over kerbs and steps without jostling the cargo or causing strain to the operator.

Highly visible safety yellow

Lightweight for easy portability

Strong high-density polyethylene ramp has non-slip surface to provide excellent traction in all weather conditions

Carrying handles allow the ramp to hang in the delivery van or truck for easy storage

Fold Down Parking Posts – Keyed

The folding car park posts can easily restrict access to your parking spaces

Highly visible yellow or black parking posts that can be locked in the upright position using the supplied key.

Each post has a unique key i ideal for restricting users to designated parking bays 102mm (H) ground clearance when lowered.

*Made of Plastic + Steel Insert;
Tube Size: 60mm;
Include 2 HI Reflex Tape;
Fold Height: 10 -70CM;
Include Keys;*

Plastic Convex Mirror

Made from PC Mirror and ABS Back.

1. Suitable for shops, big supermarkets and parking lot
2. Firm, long time usage and anti-crash
3. Clear and definite mirror image, easy and convenient installation
4. It have light weight and can be use safely.

Indoor Type

Model No	Diameter

Stainless Safety Mirror

Made from Stainless Steel Mirror.

Benefits of Stainless Safety Mirrors

- Best-quality, premium products.
- Stainless material has no change of visibility (spots and cloudiness of mirror's surface).
- 3600mm curvature radius meets the standards of the Ministry of Construction and Transportation.

Model No	SCM-60	SCM-80	SCM-100
Mirror Diameter	600mm	800mm	1000mm
Curvature Radius	2200M	3000M	3600M
Distance for visibility	<40m	40-60m	>60m

Panoramic Dome Ceiling 4 Way Mirror

The dome mirror is widely used to eliminate blind spots and improve surveillance in all types of retail stores, parking lots, warehouses, offices and can be installed at different locations according to your needs. The mirrors are made of high quality PMMA (Acrylic). PMMA is strong and it is not easy to scratch on the surface. Installation is very simple, it can be installed under the ceiling directly by screw, or hung by rope when the ceiling is very high, such as a warehouse.

Half Mirror Dome

Half size, ideal for putting against walls or pillars
Maintenance free
Easy to install
Pre fitted mounting clips
Lightweight
Provides security and safety

Measurements
Mirror Materials : PC
Base Materials: ABS
Length – 84 cm (33")
Height – 40 cm (15")
Depth – 28 cm (11")

Eton Safety half dome mirror is an excellent security mirror to view down aisles, hallway intersections, entrances and as a safety mirror to see around corners. A half dome provides 180 degree view. They are a great security mirror to discourage theft in retail stores and will prevent collisions when used as a hallway mirror for 3 way intersections. May be paired with quarter dome mirrors for use as a safety mirror in warehouses and a security mirror in production areas.

Quarter Dome Safety Mirror

This acrylic quarter 800mm (32") diameter safety mirror has a viewing distance of approx. 5 meters. The shatterproof lightweight acrylic ensures easy installation direct to ceiling or can be suspended. Our dome safety mirrors are also available as quarter, half or full size.

Our quarter dome mirrors are excellent corner security mirrors to see around blind spot areas, down aisles and corridors. They are a 90 degree mirror most commonly used in warehouses and industrial facilities as a corner security mirror for two-way intersections to avoid forklift accidents. Offices and hospitals needing a corner safety mirror for hallways and patient rooms prefer a quarter dome mirror as it allows for safe navigation and enhanced visibility.

Barrier Fence Mesh

Safety fence is also known as warning and snow fence. The main colour is orange, it is designed for warning. It adopts PE as major raw material with UV added during its manufacturing through plasticizing. It is featured with high strength, ageing resistance, anti-corrosion, softness and portability. The main mesh is rectangular and oval. The width range from 1m to 1.80m. Many different mesh sizes and specifications are available for these products and multiple diverse products can be customized as per customer's requirements.

Model No	Height	Length	Mesh Size	Weight/SQ.M	Total Weight
BR-114	1.0 Meter	50 Meter		120g	6.0Kg
BR-124	1.2 Meter	50 Meter		120g	7.2Kg
BR-154	1.5 Meter	50 Meter		120g	9.0Kg
BR-184	1.8 Meter	50 Meter		120g	10.8Kg

It adopts PE as major raw material with UV added when manufacturing through plasticizing. The main colour is orange, it is designed for warning.

Plastic Road Stud

DH-RS-6	115mm	184mm	70mm	4 Flash LED	0.50Kg	White/Yellow

Non-Reflective Pavement Marker

Non-reflective pavement marker that provides tactile feedback to drivers when they move across designated travel lanes. Made of durable ABS plastic. Formed protrusions on base helps provide greater bonding surface.

Model No: DH-RS-10

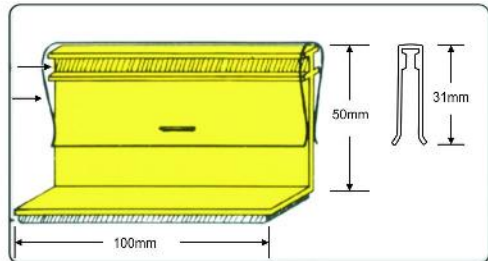

Diameter: 100mm

Height: 20mm

Materials: ABS

Colour: Yellow/White and any other preferred colour

Temporary Road Marking

Temporary Road Markers are the most economical choice for temporary lane markings. This markers can be installed quickly and easily by a worker without any equipment providing huge time saving and cost minimization.

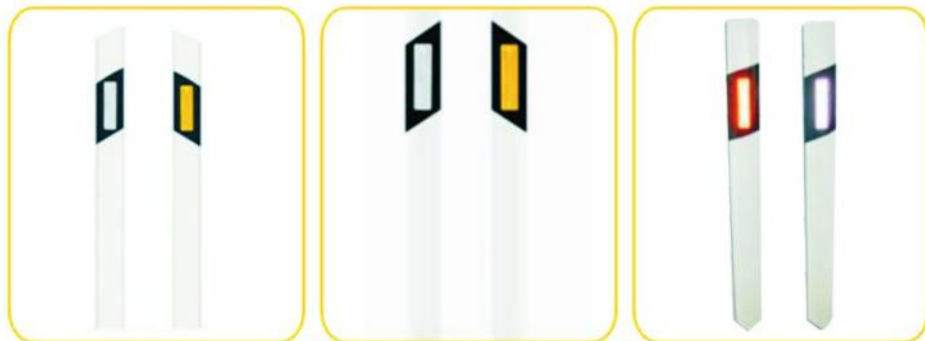

Guard Rail Reflector

PC-10	10mm	54x39mm	25Meter/Roll	5.2Kg	Red/White

Traffic Flag

Bunting Traffic Flag Line With Rope

Reinforced warning flag promotes safety with high-visibility.

- (1). Nylon traffic flag features plastic reinforcement to stay unfurled and enhance its visibility with a wooden handle.
Flag Size: 46cm(18Inch) / 61cm (24Inch), Hold with 61cm(24Inch) / 76cm(30Inch) Wood Staff.
- (2). White nylon rope cord with 45pcs 26x18cm for range vinyl flags, UV stabilised rope 30m per roll.

LED Traffic Baton

Rugged Design. Shock & Weather Resistant.
Rubber "O" Ring Battery Compartment Seal.
1 Mile Visibility at Night + Low light Conditions.
53cm Total Length / 3cm Diameter Lens
240g Only With Batteries Installed.
Red Flash Solid On & Glow Mode.
Drive by 1pcs D battery.

Steel Retainer Corner Guard

Any Other Colour of Embedded Strips are Available!

All Sizes Of Rubber Corner Guard

Model No	Wing Width	Thickness	Standard Height	Yellow Stripes Width	Weight
DH-ECG-1	100mm	20mm	1000mm	20mm	2.5Kg

Manufactured 600mm, 800mm, 900mm, 1000mm, 1200mm Standard Height, Custom Heights Available.

Stainless Steel Retainer is fastened directly to the wall while the EPDM cover is easily snapped on, allowing it to be easily replaced.

Provides superior impact resistant with a cost-effective steel retainer that is nearly four times stronger than Rubber Corner Guard.

Top and bottom caps makes it's installation professional.

The Yellow Stripes with no Fall Off/Fade in any weather conditions.

EVA Foam Corner Guard

LIGHT WEIGHT, LOW COST & FREIGHT, EASY TO INSTALL

AVAILABLE IN ANY COLOUR

Made of EVA Foam Flexibility Material without toxic smell.
It protects the concrete corner both in Indoor and outdoor use.
Various specifications and colours are available.
Non-Toxic, durable, cold/hot resistant, anti-bumping, shockproof and it's easy to clean.
Easy installation with pre-glued double size 3m adhesive tape.
Widely used in parking lot, hospitals, hotels, schools and airport.
Light weight and it's affordable.

Sizes of EVA Foam Corner Guard

Model No	Length	Width	Thickness	Corner	Weight
DH-VCG-1	800mm	100mm	10mm	Square	155g

KEY TO MATERIAL CODE TYPES

All roadworks signs are zinc coated steel.
/T = Sign plate only
/TF = Sign in painted steel frame

Roadworks Signs

Our roadwork signs are very sturdy and durable, they provide an excellent and cost effective solution to your temporary traffic sign requirements. If you can't see exactly what you are looking for here, just give us a call and we will be happy to help.

All signs shown here are available in exterior grade sign frames if required.

Manufactured in steel, this weatherproof frames are robust and stable.

TRAFFIC LIGHTS

Product Brief Features

LED Products Adopt Semi-conductor light emitted diode as light source up to 85% energy saving over traditional incandescent, single wavelight source providing unique and consistence colours, High efficiency and high brightness with little attenuation.

Power Factor >90%, Total Harmonic Distortion:<20%

USA Ge's UV resistance polycarbonate crust and lens. UV resistance silica gel sealed ring.

Wide work voltage:AC 100~277V & 50Hz (adapt to AC 110V, DC12V or DC24V)

Stable reliable auto-vibration and adapts to wide temperature ranges between -30 centigrade to +60 centigrade.

Adopts AXT/HP/Taiwan LED light source which are low power consumption, long life more than 60000 hours, service life is up to 7 years, adopted PWM constant current power, protect the LED's efficiently.

Modern design and distinctive quality, double silicon rubber sealing in dust and water prevention, fine in workmanship, convenient installation.

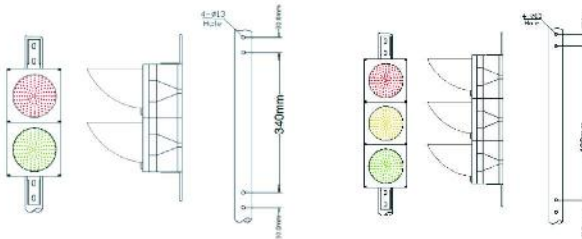

Ø 100mm Parking Traffic Light (PC housing)

SPECIFICATION (R/G two lights, R/Y/G three lights)

Model	Colour	LED Qty	Luminous Intensity (cd)	Wavelength	Power (W)	Voltage Range	Packing (mm)	N.W	G.W
NBJD100F-R	Red	45	100cd	625±5	4	85V~26V AC	170*210*370 (Two lights)	1.2KG	1.6KG
NBJD100F-Y	Yellow	45		590±5					
NBJD100F-G	Green	45		505±2			170*210*520 (Three lights)	1.6KG	2.5KG

Setup Instructions

Ø 200mm Cobweb Cover Vehicle Traffic Light (IP65)

Features/Benefits:

90% reduction in power vs incandescent
Long life up to 10 times than incandescent
uniform non-pixelated illumination and
incandescent look.

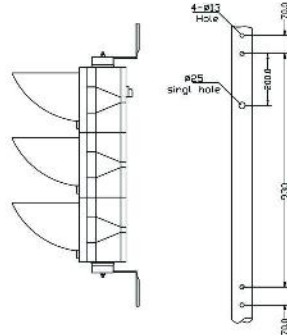

Expanded view radiation pattern suitable
for span wire

Easy to install into existing signal
enclosure.

Specifications:

Operates at -30c to +60c
UV stabilized scratched resistant shell
Fuse and transient suppressor
incorporated for line and load protection
Power factor greater than 0.9
Operation Voltage Range: 100~277v. AC
Total Harmonic Distortion <20%
Meet Fcc Title 47. Subpart B section 15
Regulations for Electrical Noise.

Parameter:

Model	Colour	LED Qty	Luminous Intensity (cd)	Wavelength	Power (W)	Voltage Range	Packing (mm)	N.W	G.W

Studying Method LED Traffic Countdown Timer

Model: NBDJS513-RYG

Model: NBDJS188-RYG

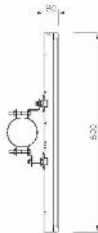

Model: NBDJS888-RYG

- Application: Time begins counting down when a call is initiated and the remaining time continuously displayed on the equipment. (Applicable to fix cycle mode)
- Maintenance free, environment friendly, highly efficient, low power consumption.
- Thunder proof system.
- 6 ports of loop detecting.
- Aluminum or armor plate cover (Crust Material), extra slim.
- Operating Voltage: AC 80~280v @ 50Hz/60Hz (adapt to 220v or AC 110V can do).
- Power Consumption: <42W *Distance View: >200m, Light Intensity >400cd/m², Colours: Red/Green/Amber
- Related Approvals: Produced according to Chinese GB14887-2003 standards and related international standards.
- Robust Design: Shock and vibration resistant.
- Ip54: High grade waterproof function design
- High brightness with little attenuation adopted the PWM constant current power protects the LED's efficiently.
- LED Drive: Constant voltage linear power, Stable reliable, auto-vibration and adapts to wide temperature ranges between -40 centigrade to +8- centigrade.
- Specialized designed optical system results in wild diverge and chroma well-distributed.

Characteristics

Sketch Map of Installation

Solar Warning Traffic Light

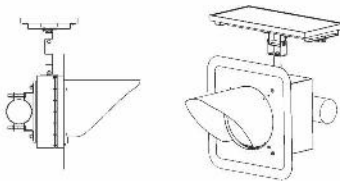

Model: NBSFL200

Model: NBSFL300

- Light Source: 5mm Super Bright LED.
- Dimensions: 200mm/ 300mm, various polygon.
- Display colours: Yellow, Red, White.
- Life of battery: 12V7AH, 12V12AH, 2 years.
- Working mode: Flashing all day/Flashing at night.
- Flashing frequency: 35 2time/minute.
- Protection Grade: IP54.
- Luminance intensity: >4000 cd/m²
- LED Visual angle:60
- Material: Polycarbonate (PC)
- Reted Voltage: DC12V.
- Light/Dark contrast: 1:5
- Power consumption:<3W(7W).
- (Dimension: 250mm 250mm 98mm, 350mm 180mm)
- Used for warning road users at crossings or dangerous areas where wiring not easy. Adopt solar power environment friendly, specialized in designing optical system resulting in wide visual angle and well distribution of light.
- Convenient installation, no wire to embed underground.

Setup Instructions

Application

Solar LED Traffic Light System

- **FEATURES:** Solar Traffic System use solar panel, wireless control system, battery: 12V traffic light
 - Solar modules are fully encapsulated to resist harsh weather conditions
 - Low voltage lead disconnect
 - Sealed lead acidic battery designed for deep discharge cycling
 - NEC code compliant over current protection and safety disconnect
 - Temperature compensated battery charging
 - Corrosion resistant control/batter enclosure
 - Installation, operation and maintenance documentation
 - Solid state electronics that improves efficiency and reliability
 - Pre-assembled, pre-wired systems minimized field installation time and eliminate wiring errors
 - Low maintenance and operating costs
 - Complete systems reduce specifying and buying time
 - Quality components assure long system life
 - Full system and performance warranty available on prepackaged systems.
- **CONTROLLER:**

The controller features full protective functions for overcharging, low battery state of charge (SOC), over current, over voltage, and over temperature. Status LEDs displays battery SOC and system status. In addition, the control algorithm utilizes voltage, temperature and amp-hour measurements to enable and accurate determination of the SOC, the most critical system parameter, and adjusts charging current and voltage for the temperature, capacity and age of the battery.
- **BATTERY:**

Completely sealed, valve regulated lead acid (VRLA). Absorbed glass mat (AGM) technology, maintenance free, never needs water, non-hazardous, non-spillable and recyclable. Thick positive plates designed for long life. Wide operating temperature from -40F (40C) to 160F (72C).

Intelligent Traffic Light Controller

Model: NBTL-10,NBTL-14

Model: NBTL-20,NBTL-28

Functional Features:

- 1. Plug-in the control system. More stable and reliable.
- 2. The all-weather outdoor box equipped with device of lightning arrester and power filter.
- 3. The machine adopted the design of module, easy to maintain and extension.
- 4. 32 channels of independent output and 3A operation current.
- 5. RS-232, RS-485 excuse to expand with higher plane of communication.
- 6. On-line adjustment, check and setup.
- 7. 99 operating stages for workdays and weekdays respectively.
- 8. 28 programmable operating menus.
- 9. 88 step for each programmable menu and 1 to 255 seconds for each step.
- 10. The flashing status of each signal lamp can be set while the frequency and the time of flashing is adjustable.
- 11. Yellow flash time at night can be set freely and the frequency is adjustable.
- 12. It has access to the emergency state at any time.
- 13. Manual control can realize single step operation at random and specified menu and there is yellow lamp blocking.
- 14. Auto power trip protection and the operation parameters can be stored for above ten years.
- 15. Auto test the green conflict, the yellow flash is automatic when the green conflict come up.
- 16. Simulation crossing is convenient to operate the machine.
- 17. Standards: Up to national standard GA47-2002
- 18. Export-driven capabilities: Ability for drive: each loaded power is 600W.
- 19. Working Voltage: AC80V-270V 50+2HZ
- 20. Ambient temperature: -40°C ~ + 75°C
- 21. Ambient RH: 5% ~ 95%
- 22. Insulated intension: above 100M₂
- 23. Resist Voltage: AC1500V
- 24. Anti-Shock: can bear the natural shock in transport.

SMD3528 Series EPS Tube Light

High Power LED Street Light

SPECIFICATIONS:

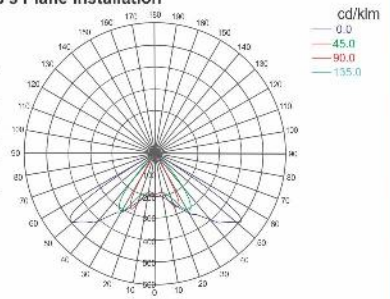

Item No	SL-56
Suggested Light Replacement	150w SON Lamp
LED total power	67w
Lamp total power	73w
LED luminous efficiency	100 - 110 lm/w (cool white)

Illumination:

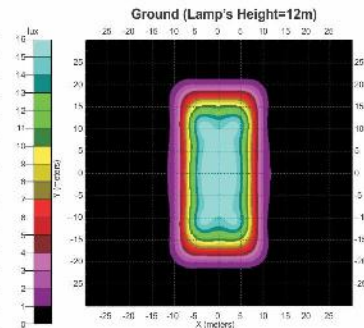

Colour temperature	Cool white: 4500 - 7000 k Warm white: 2700 - 3500 k
Colour rendering index	More than 78
Beam angle	130° x 65°
Beam pattern	Rectangular beam pattern (Asymmetric bat wing)
Input voltage	85-264VAC
Working environment	-30 ~ +60°C 10% - 90% RH
Lamp body & lamp housing material	Cat aluminum and aluminum alloy
IP rating	Ip65
Net weight	6.9Kg
Product size	8Kg
Product size	500 x 315 x 80(mm)
Package size (mm)	570 x 380 x 160(1pc)

Lamp's Plane Installation

Lamp's Plane Installation

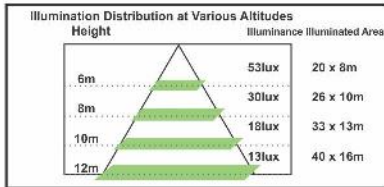

High Power LED Street Light

SPECIFICATIONS:

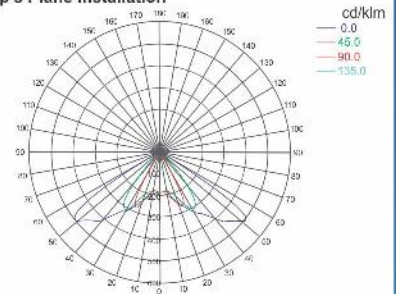

Item No	SL-56
Suggested Light Replacement	150w SON Lamp
LED total power	112w
Lamp total power	135w
LED luminous efficiency	100 - 110 lm/w (cool white)

Illumination:

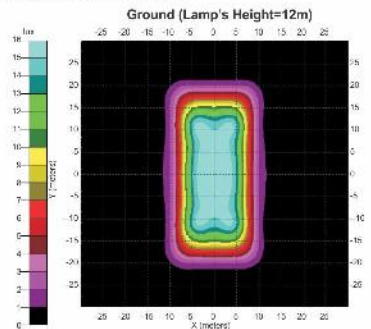

CCT	Cool white: 4500 - 7000 k Warm white: 2700 - 3500 k
CRI	More than 78
Beam angle	130° x 65°
Beam pattern	Rectangular beam pattern (Asymmetric bat wing)
Input voltage	85-264v ac, 47-63Hz
Working environment	-40 - +50°C 10% - 90% RH
Lamp body & lamp housing material	Cat aluminum and aluminum alloy
IP rating	IP65
Net weight	9.5Kg
Gross weight	11Kg
Product size (mm)	625 x 315 x 80(mm)
Package size (mm)	685 x 380 x 160(1pc)

Lamp's Plane Installation

Lamp's Plane Installation

VARIABLE MESSAGE SIGNS (VMS)

VIRABLE MESSAGE SIGNS (VMS)

A Variable Message Sign (VMS) is a traffic control device that is capable of displaying a variety of messages to inform motorists of unusual driving conditions. This capability is achieved through elements on the face of the sign that can be activated to form letters or symbols. The message is limited by the size of the sign (usually three lines with eight characters per line). A VMS is housed on a trailer and can be deployed quickly for meeting the temporary requirements frequently found in work zones or accident areas.

PRODUCT DESCRIPTION

The VMS can be deployed at short notice allowing high quality information to be displayed to critical points of congestion.

The easily transportable unit is designed for use when temporary events are likely to bring traffic problems; for road works and in-line works on contra-flows.

The display, which can operate on solar power, is mounted on a hydraulic powered column for raising and lowering and is capable of showing both pictograms and text.

A number of different options are available. It is simple to operate and uses a touch screen user-friendly Operator Interface with various options for remote control, GPS location reporting, radar speed detection, number plate recognition, and PC/ PDA operation.

It displays a full range of TD49/03 pictograms including warnings, speed restrictions, and lane closure 'wickets'.

Alternative modes of operation are possible, from static mode, radar mode, scheduled mode, cyclic mode, and bespoke, thus ensuring you can control the sign to suit the application.
