Lego

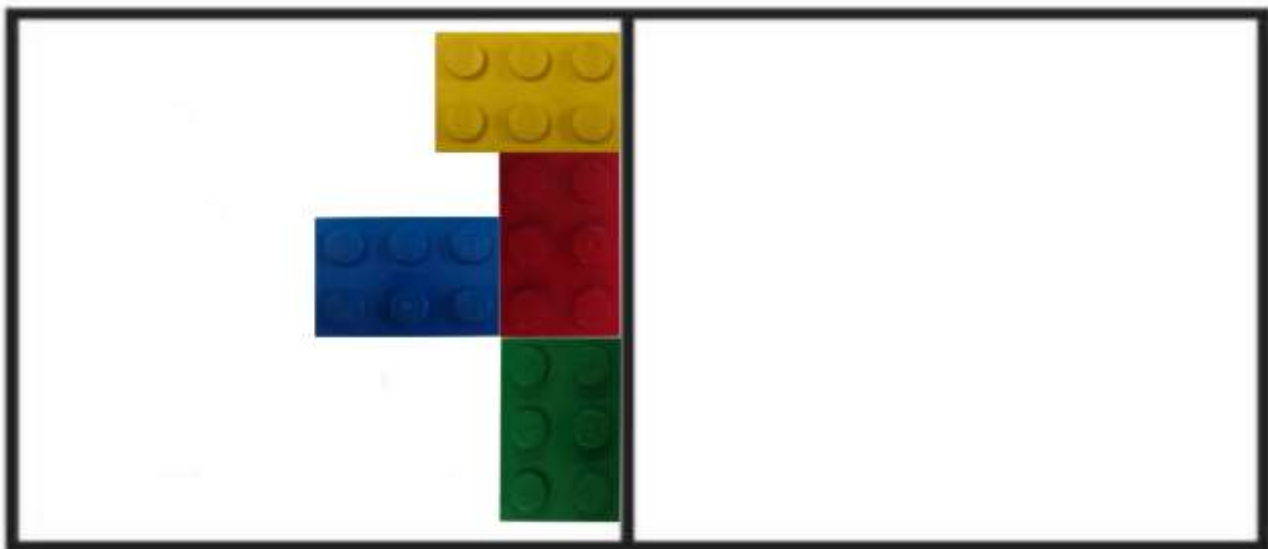

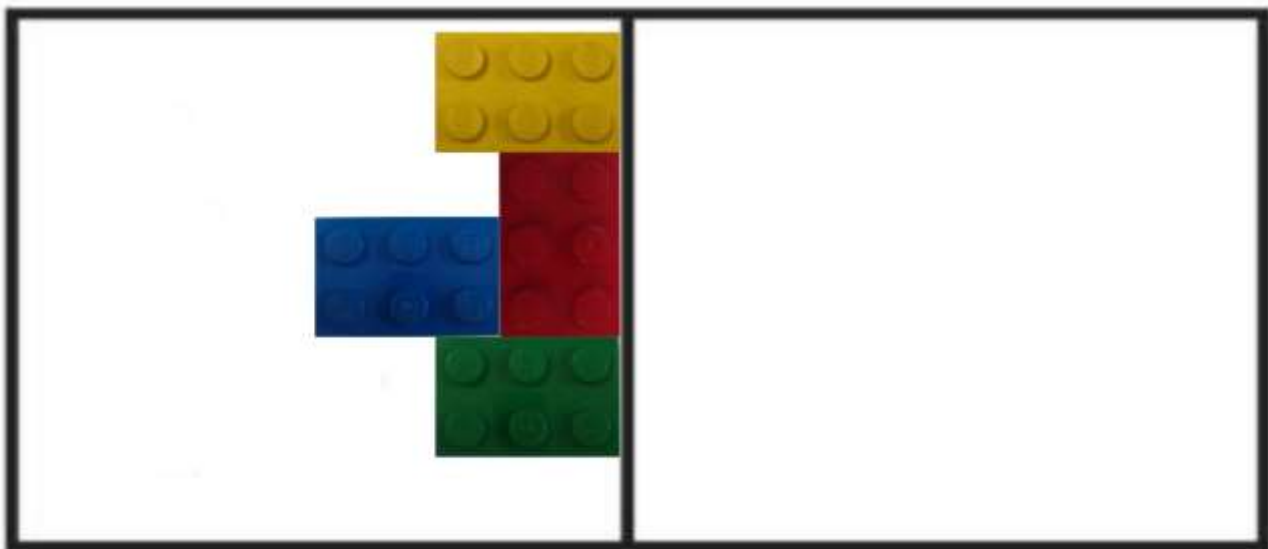

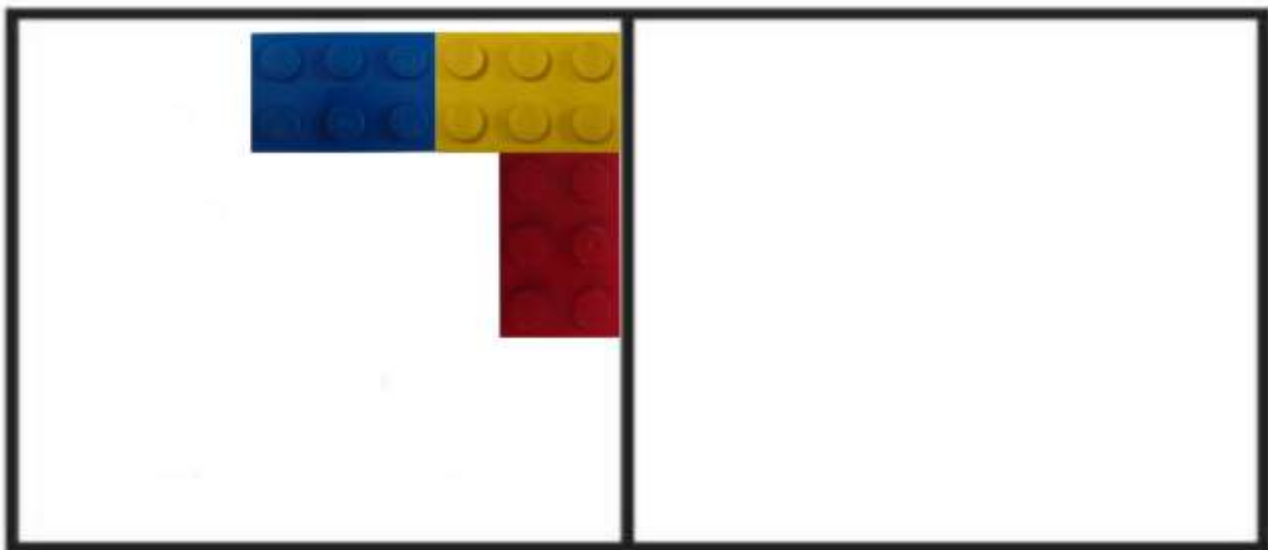

Spegling

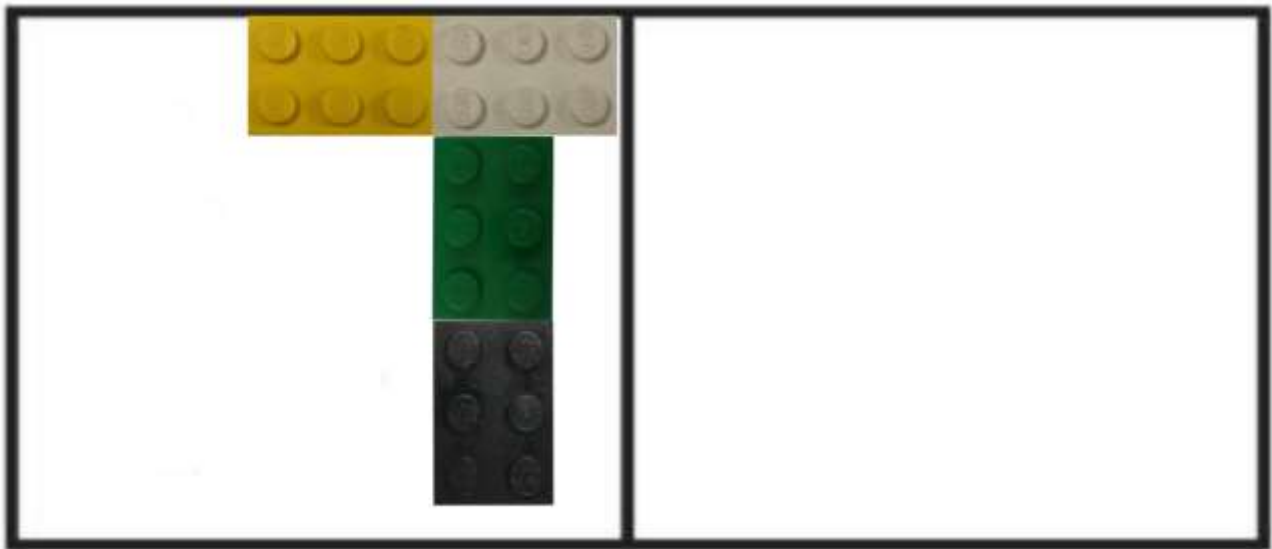

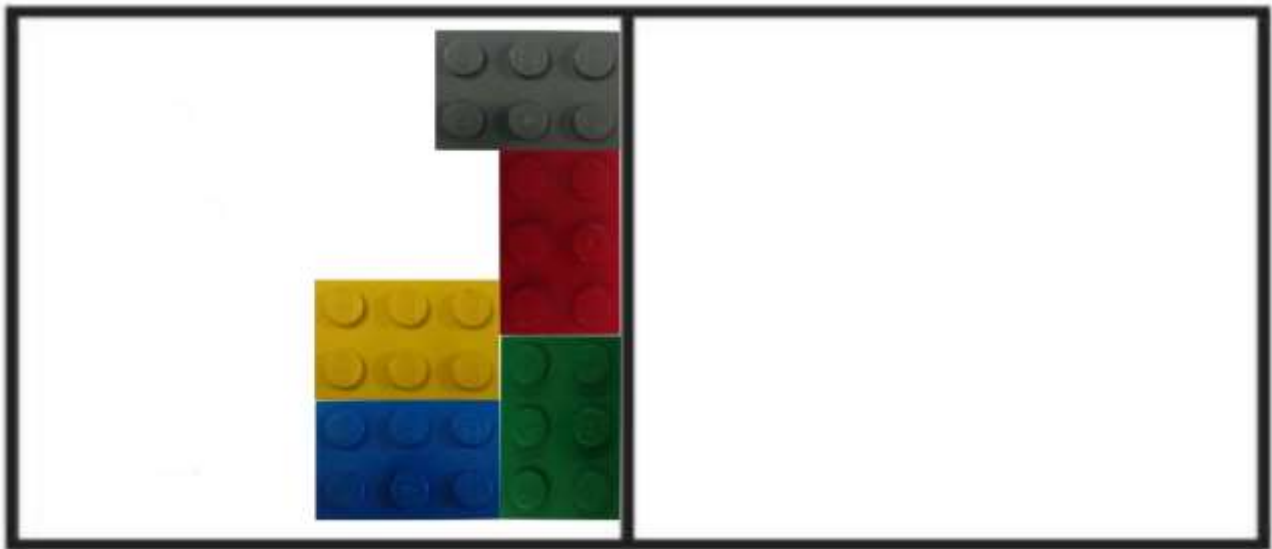

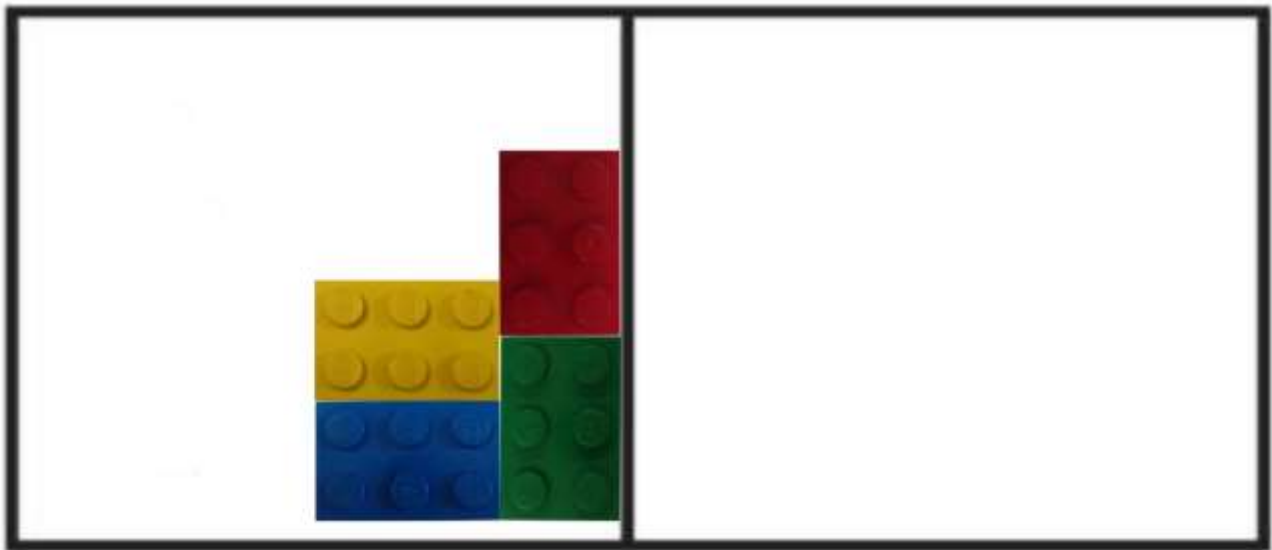

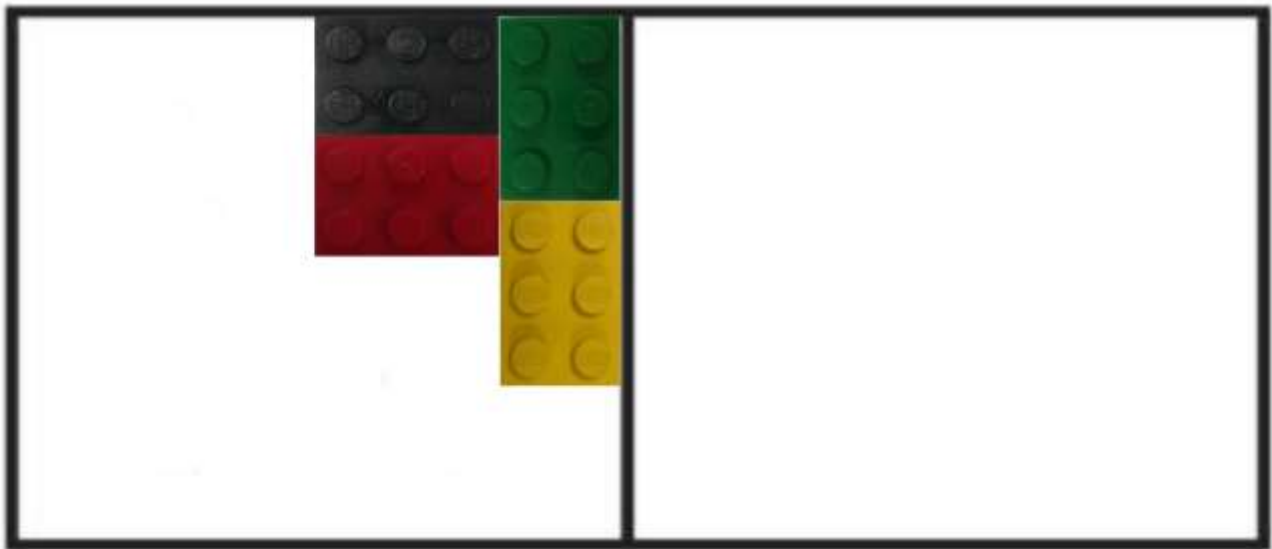

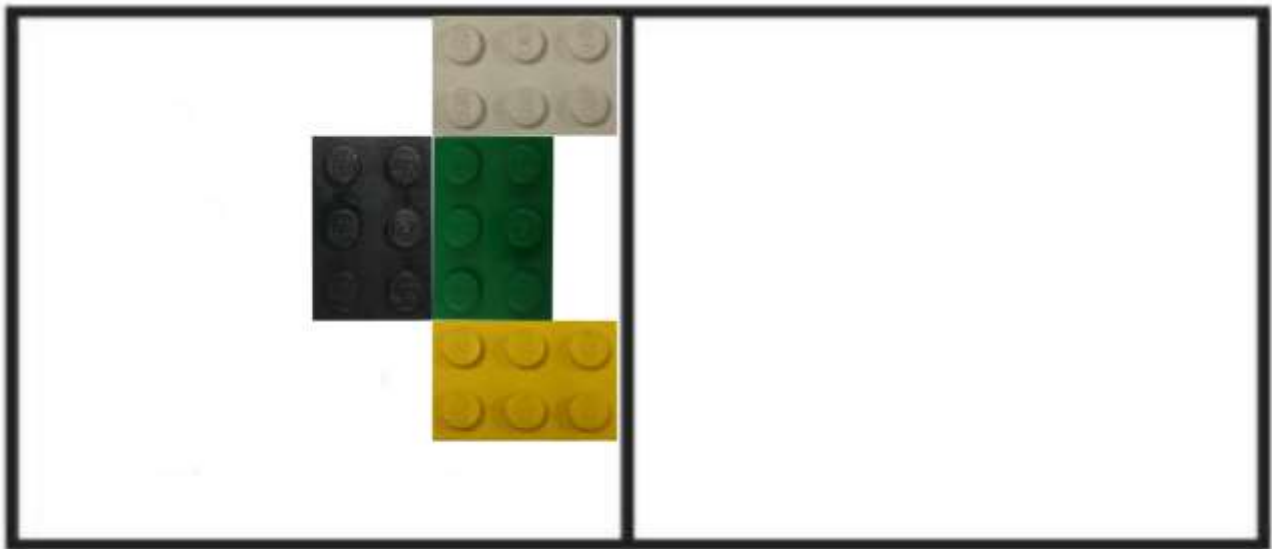

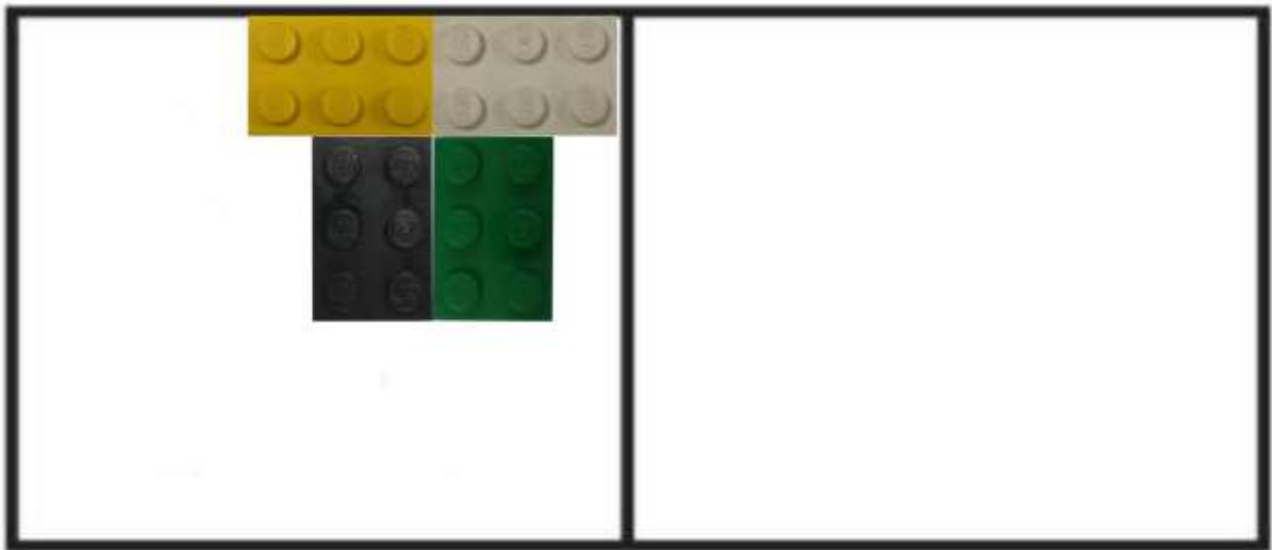

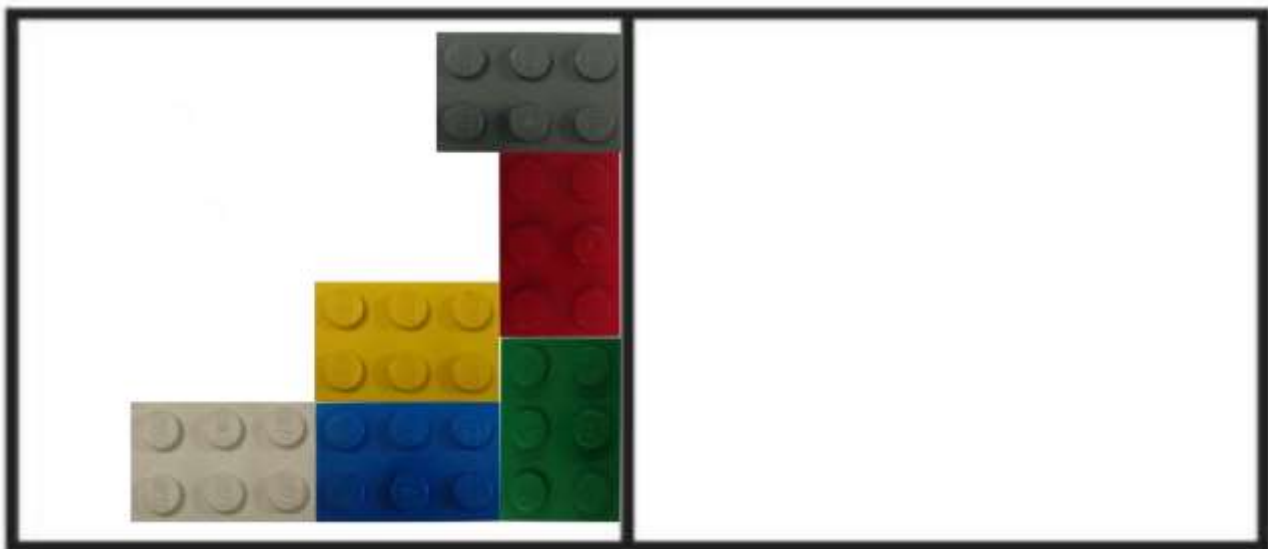

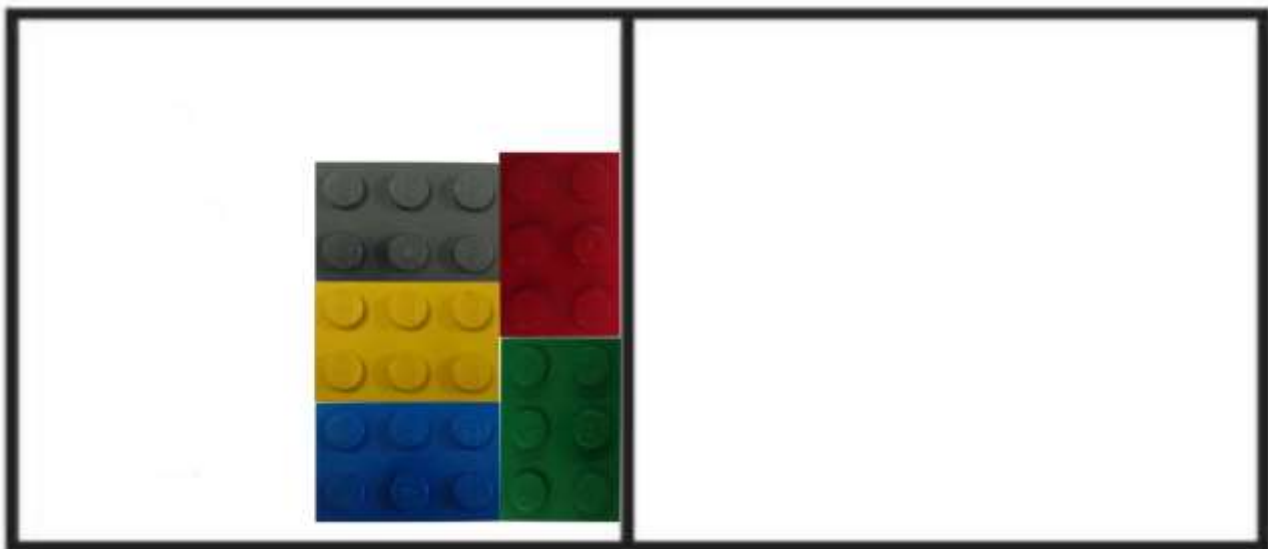

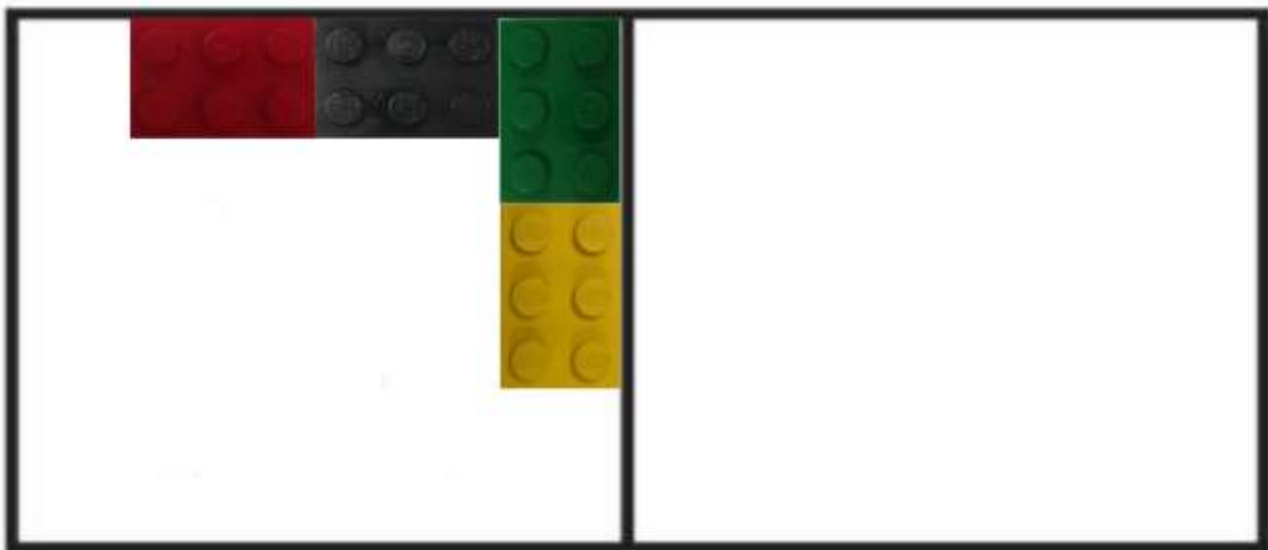

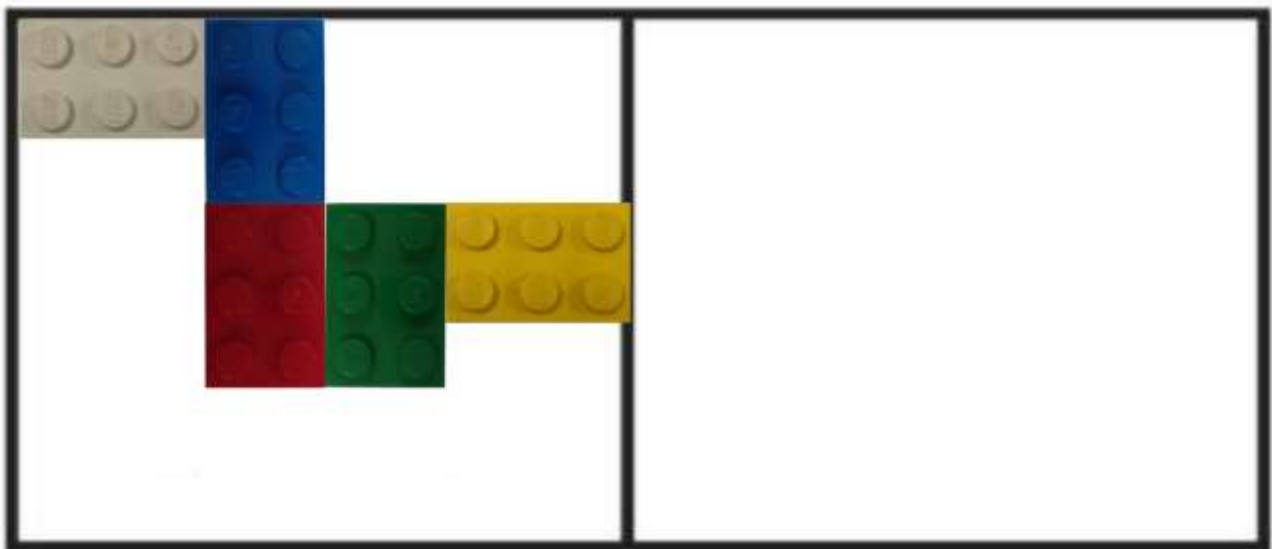

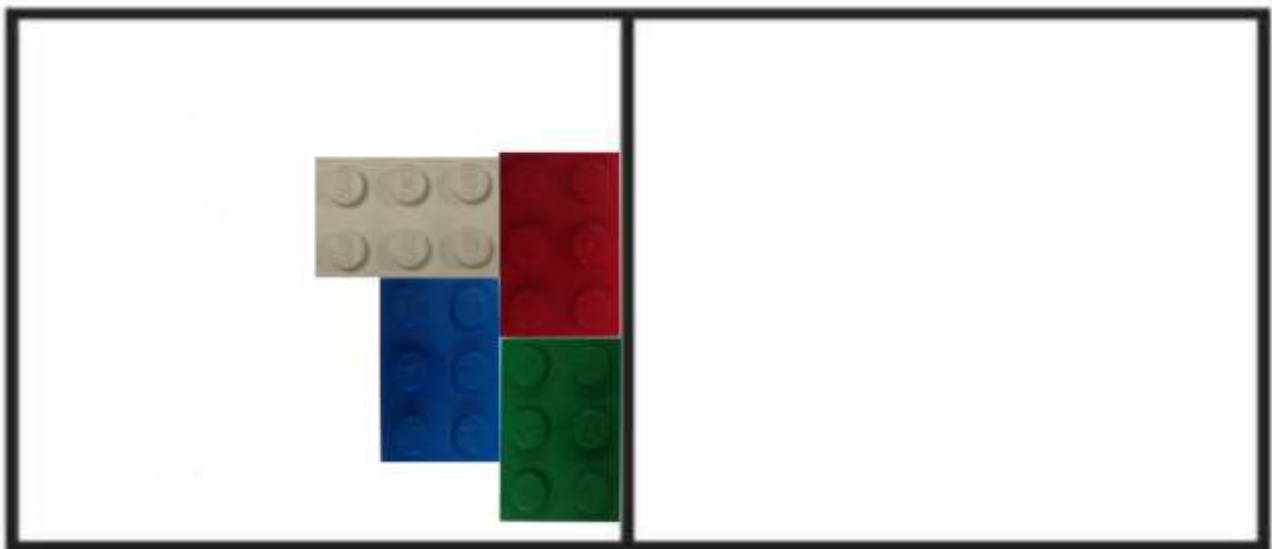

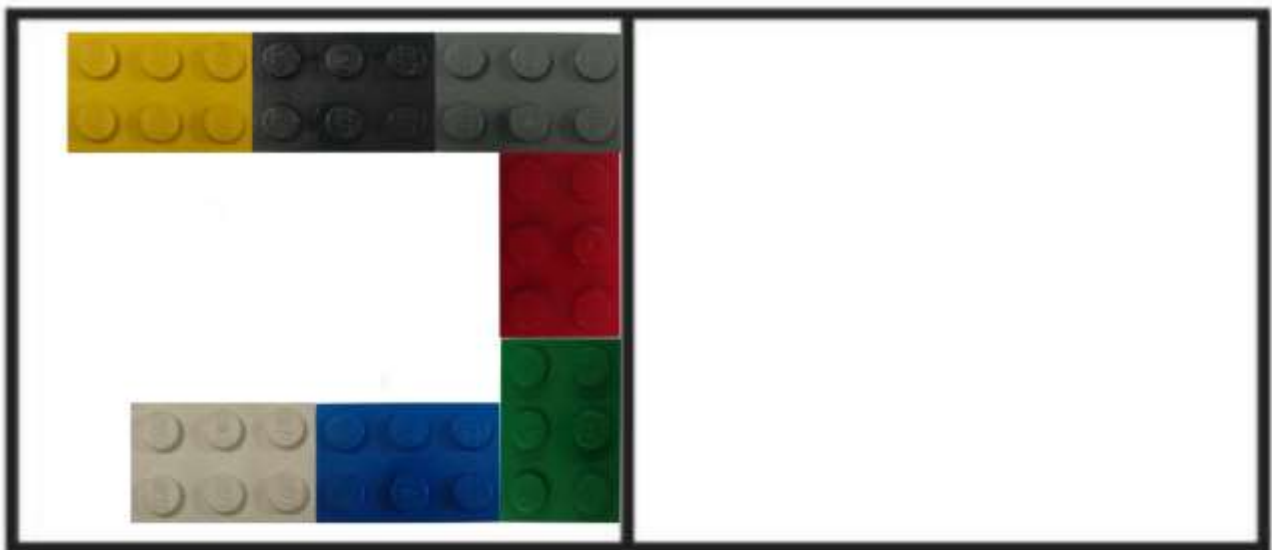

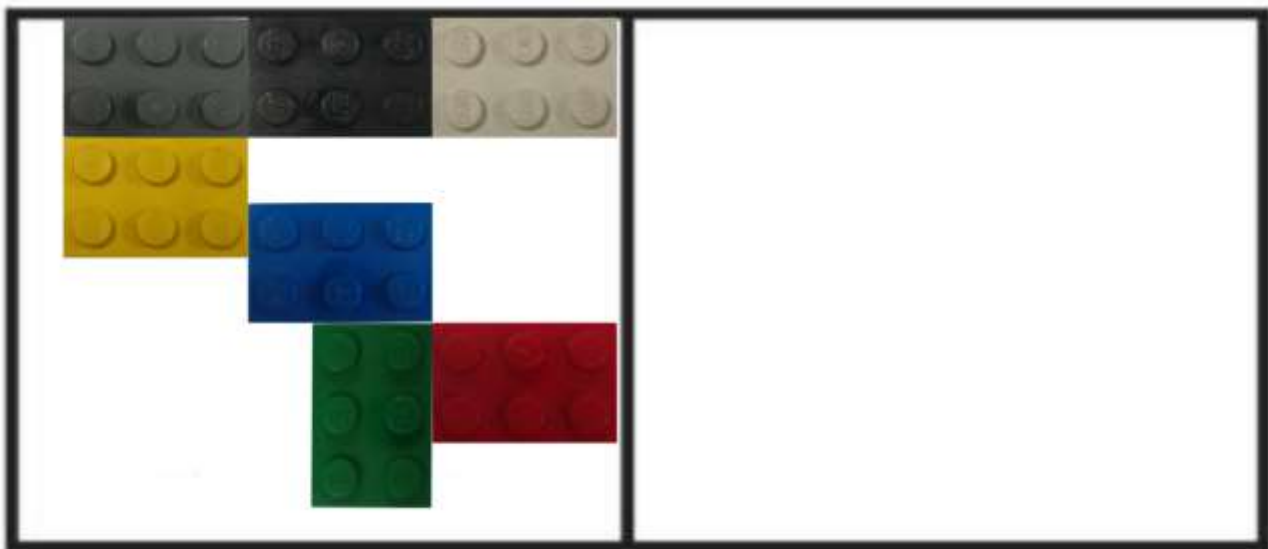

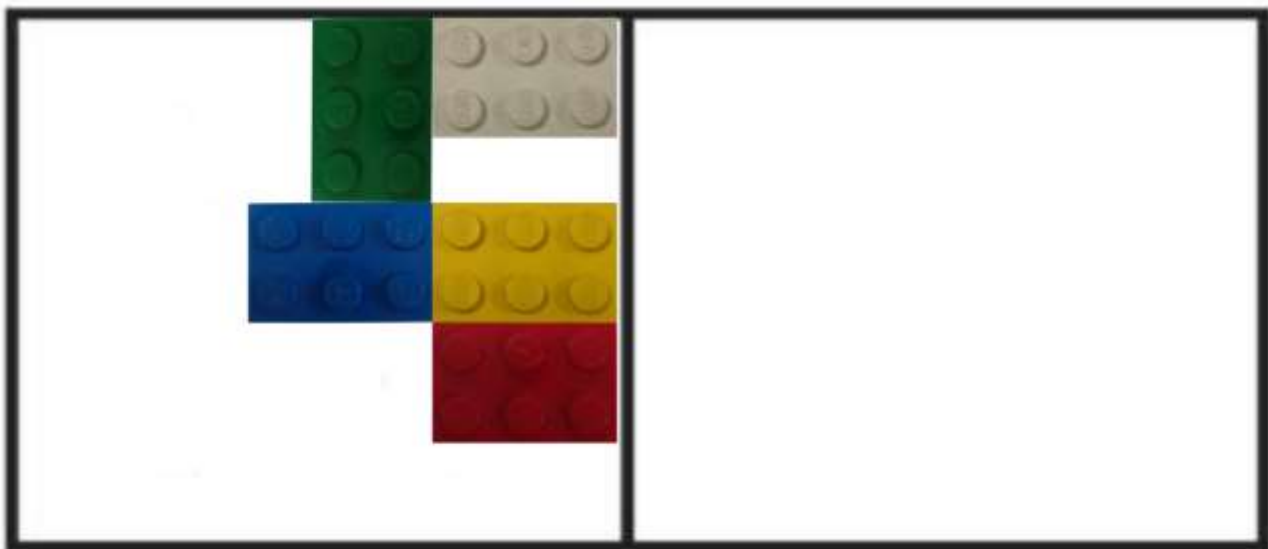

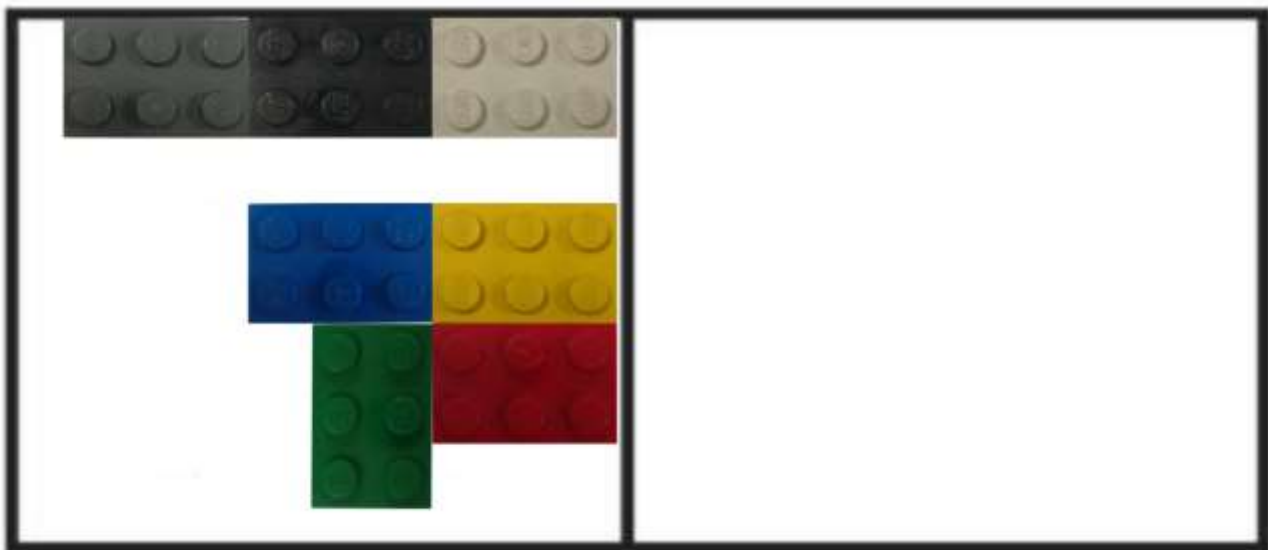

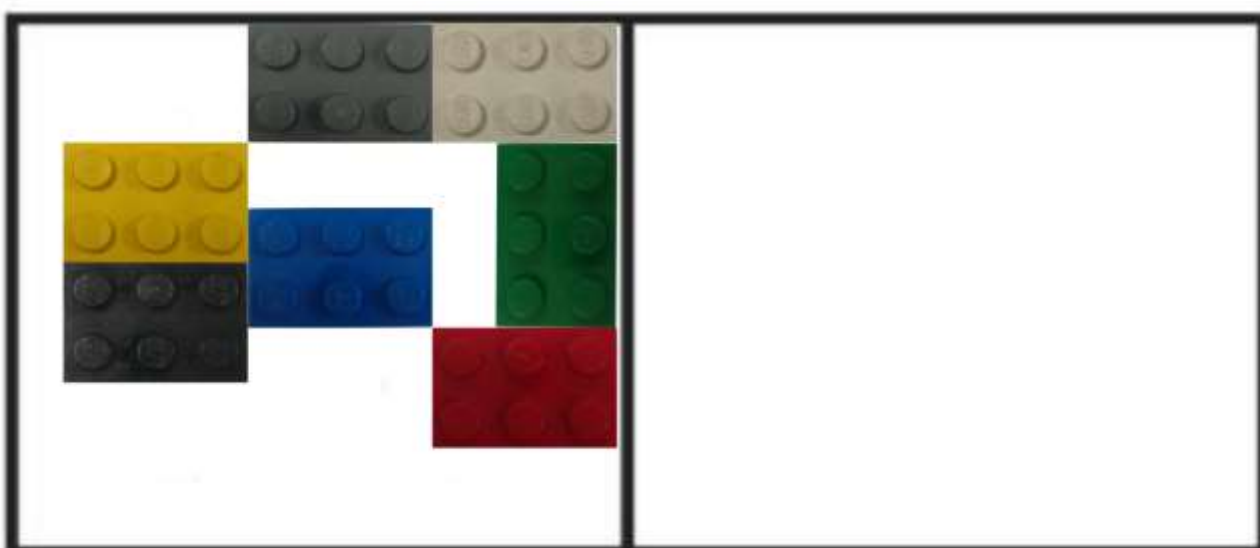

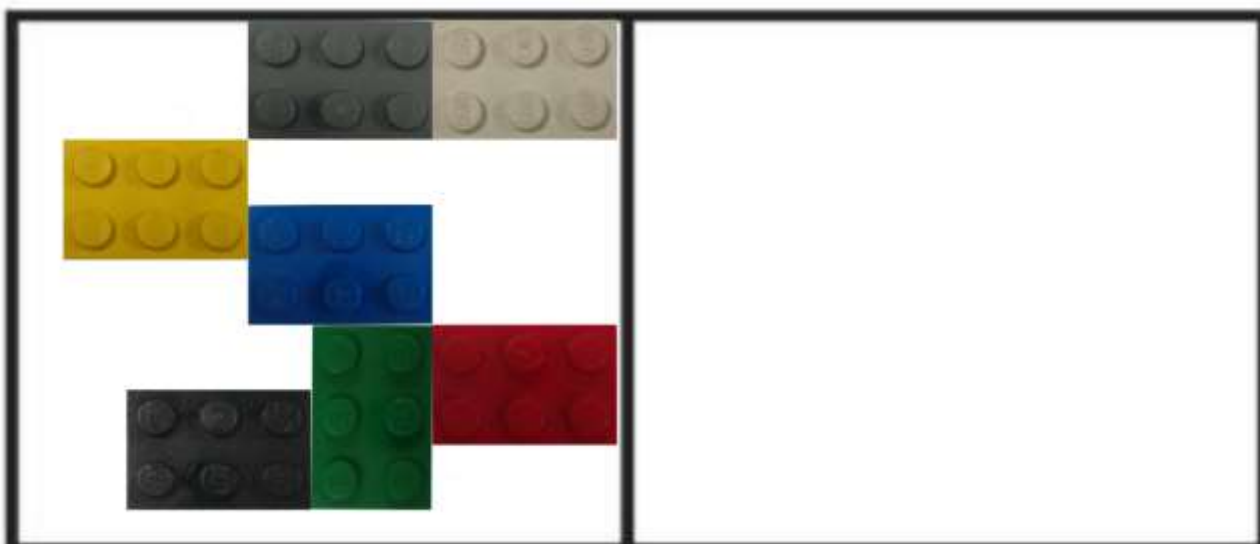

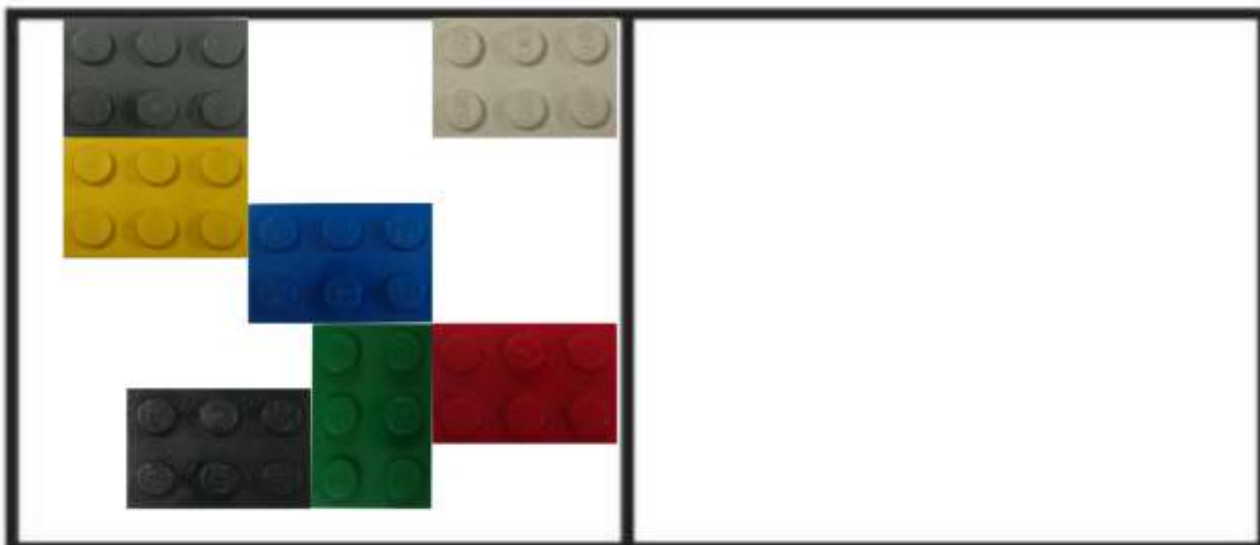

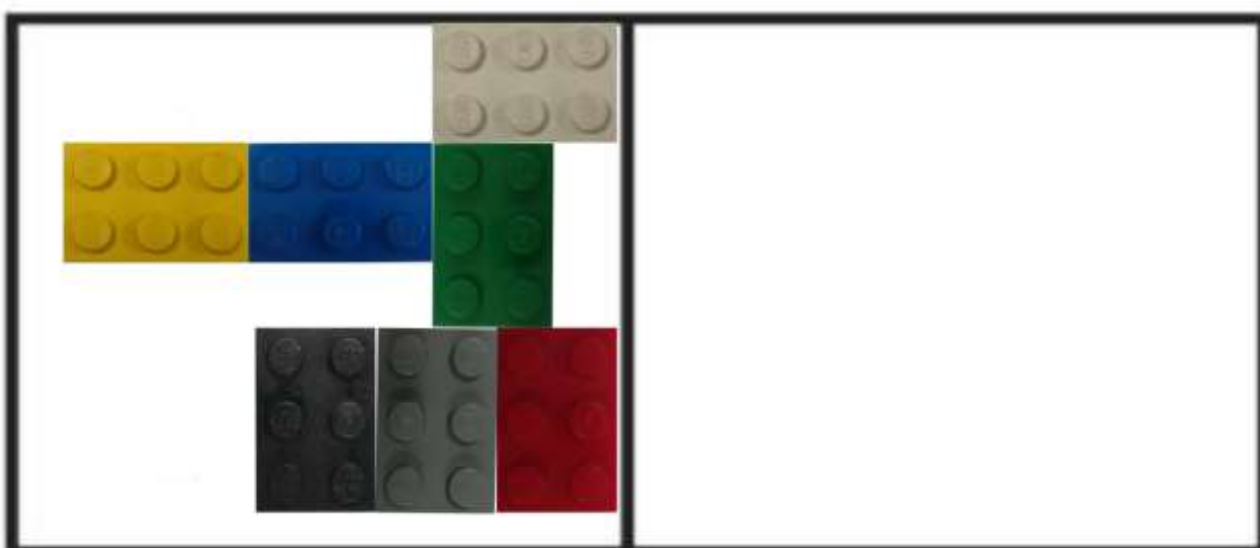

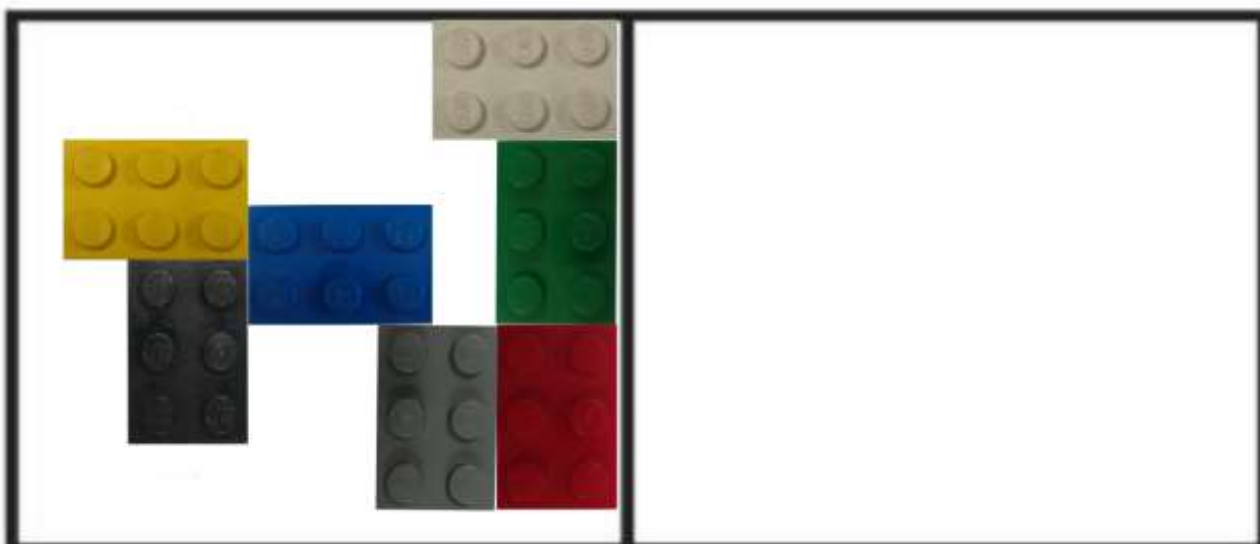

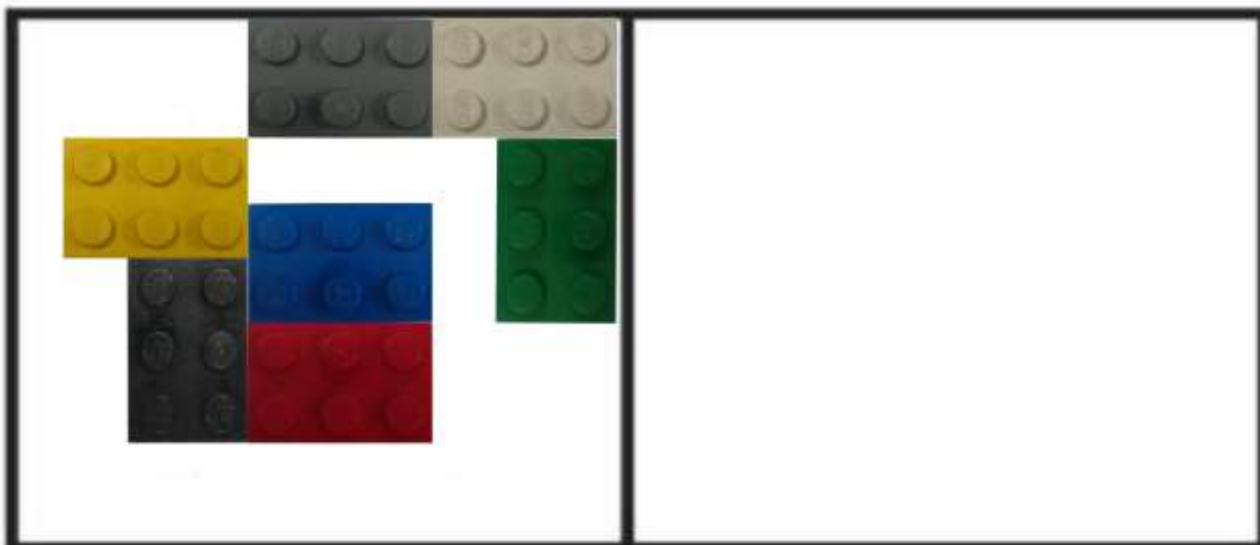

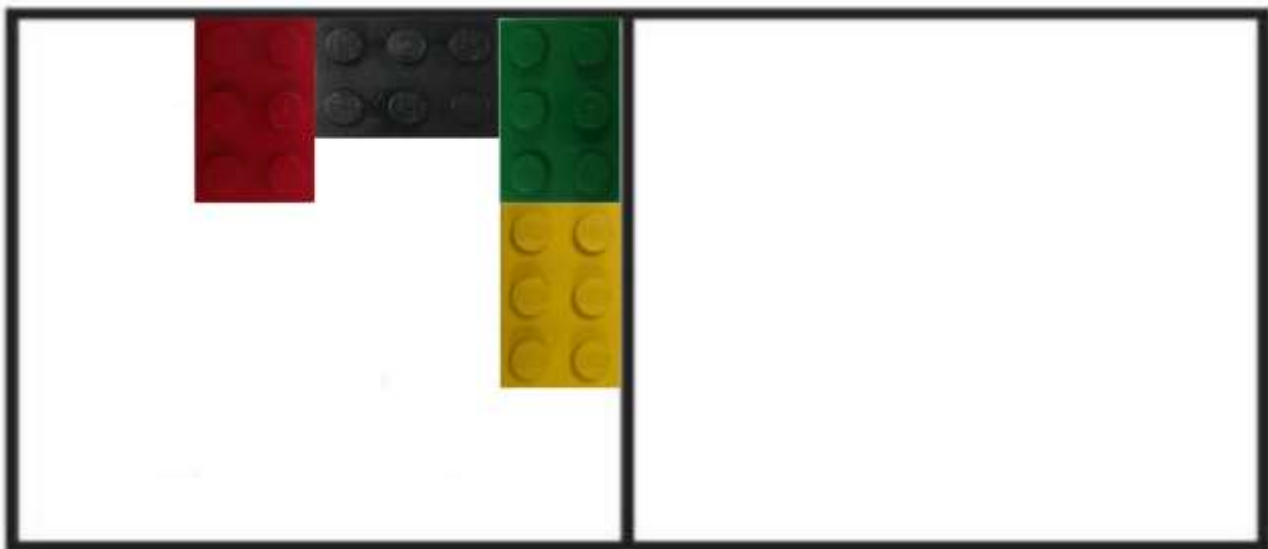

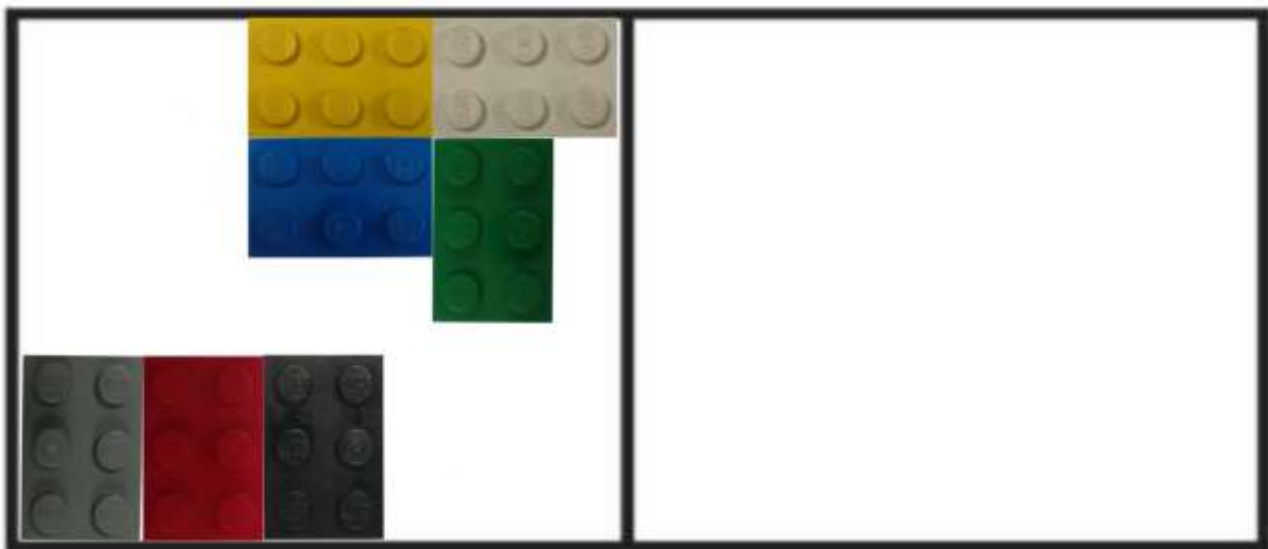

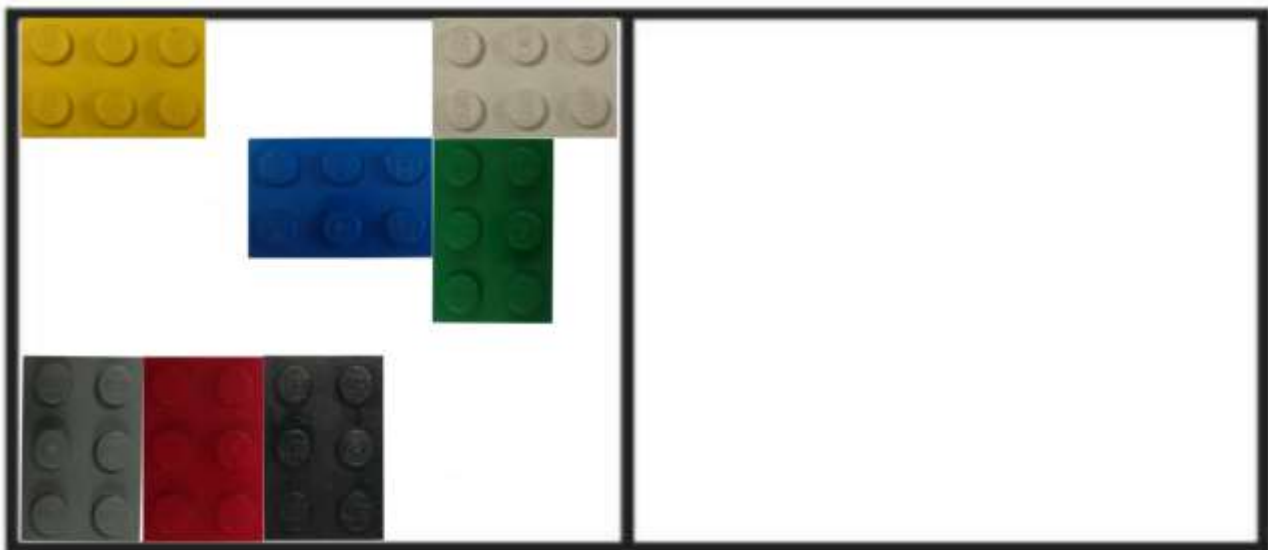

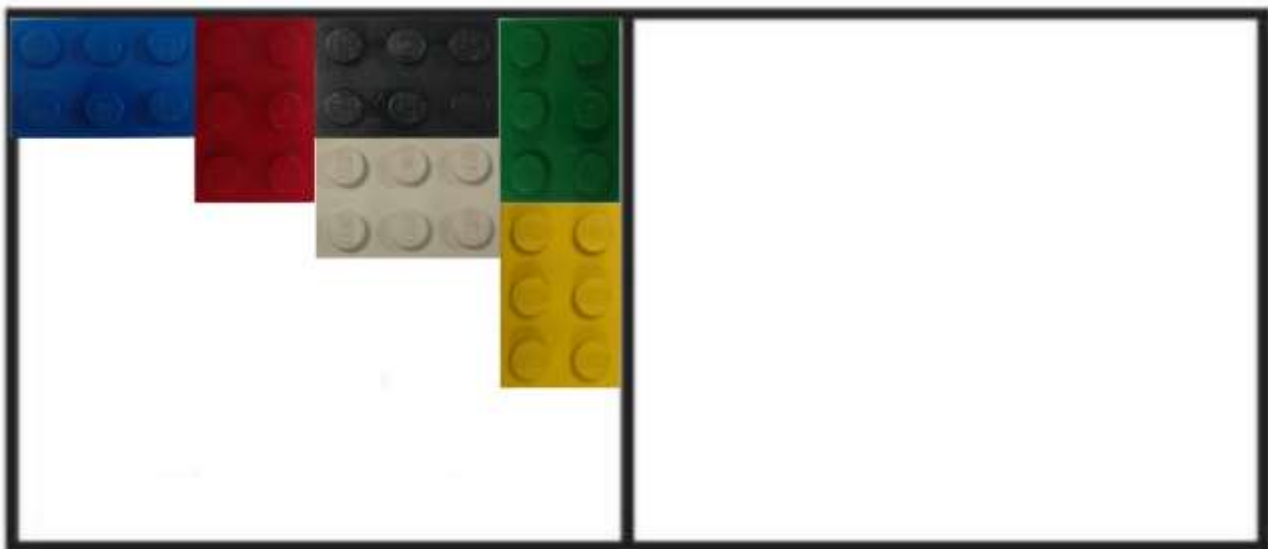

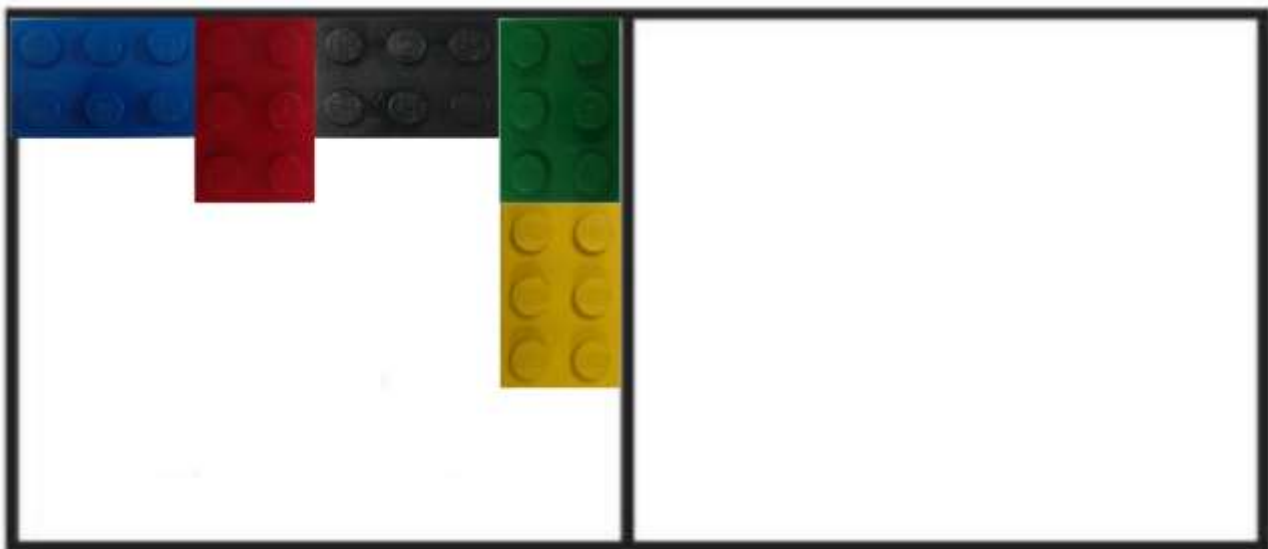

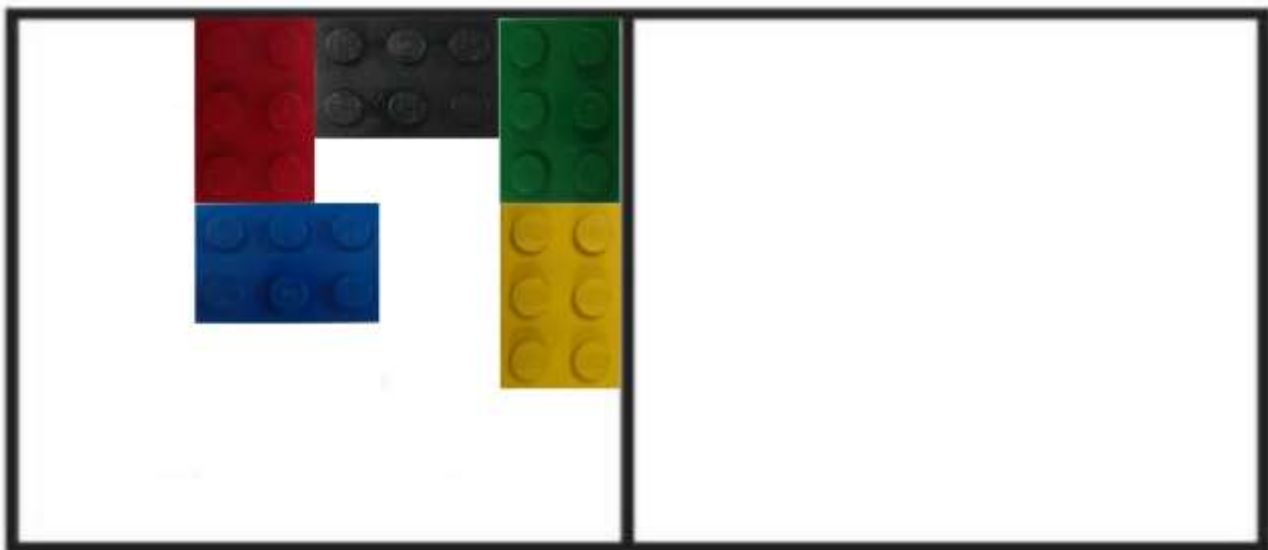

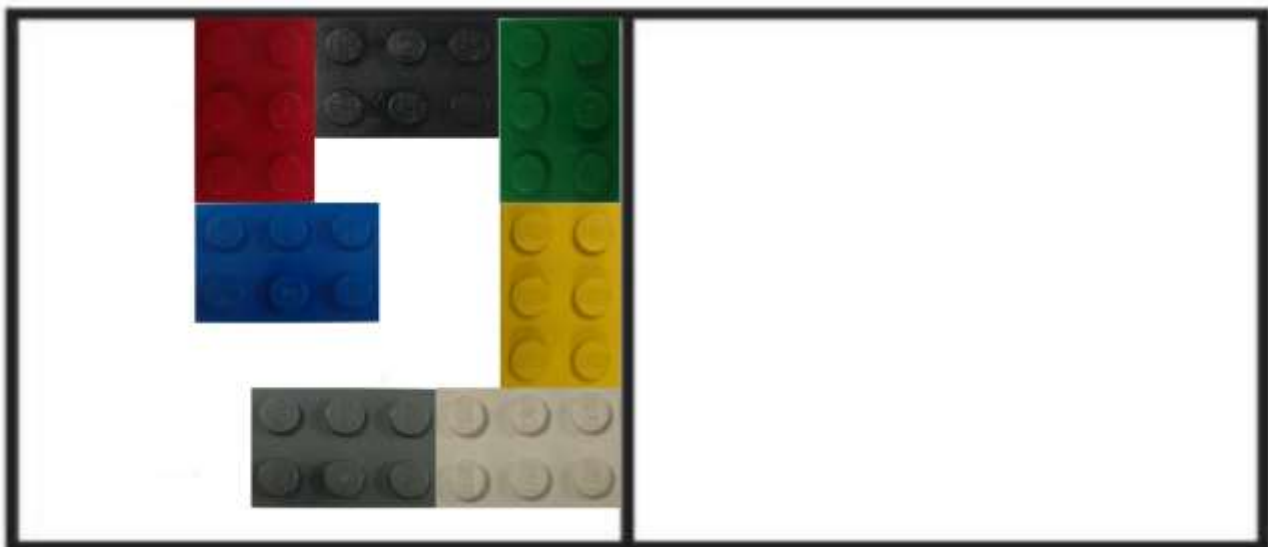

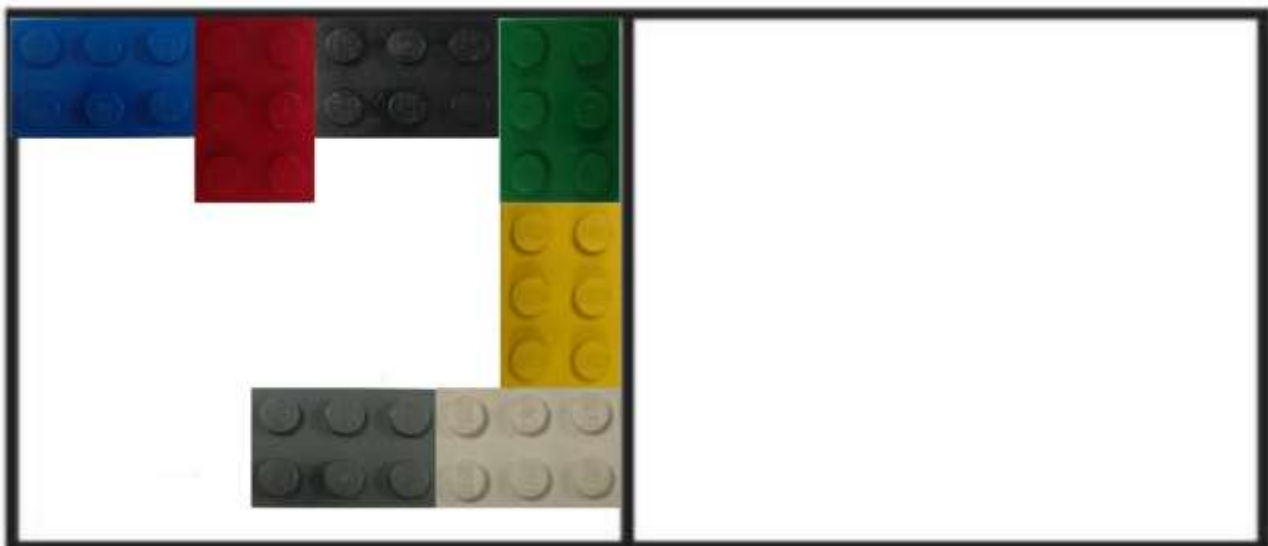

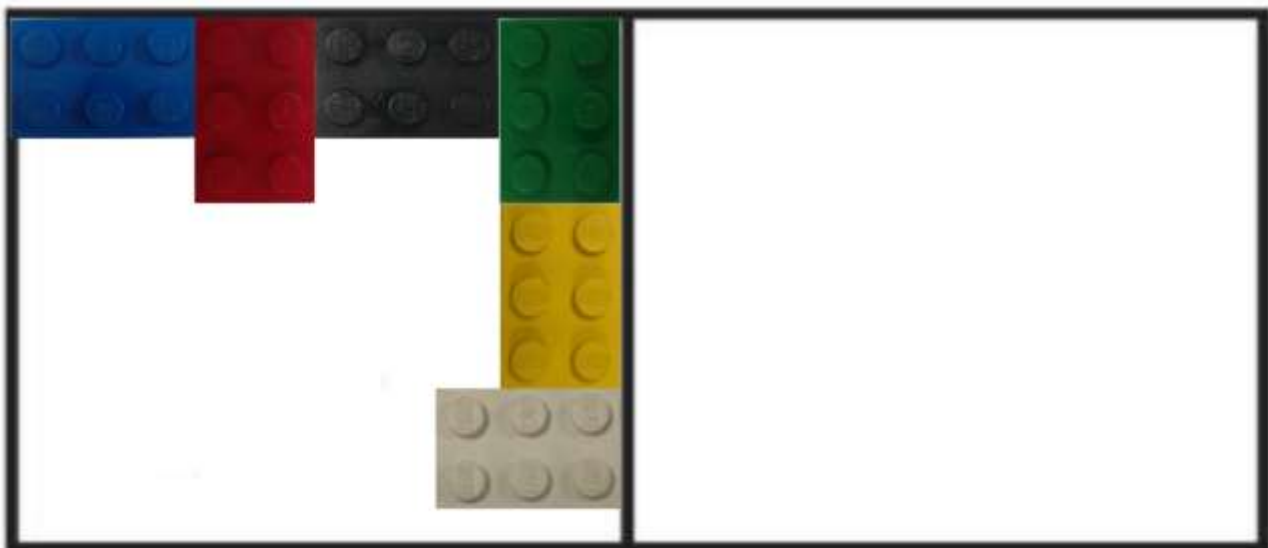

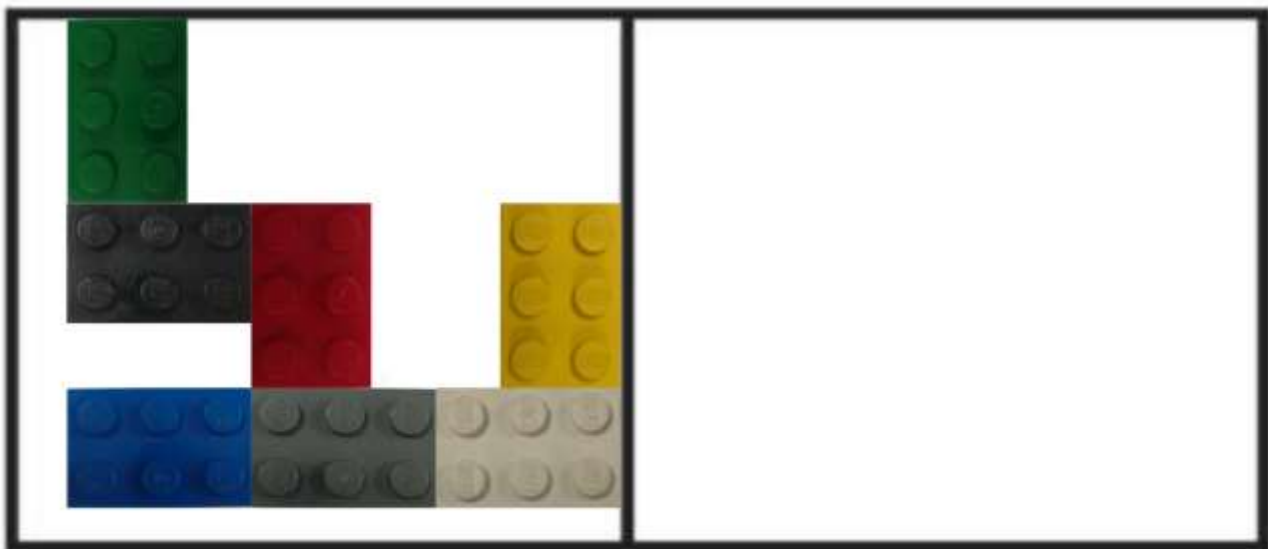

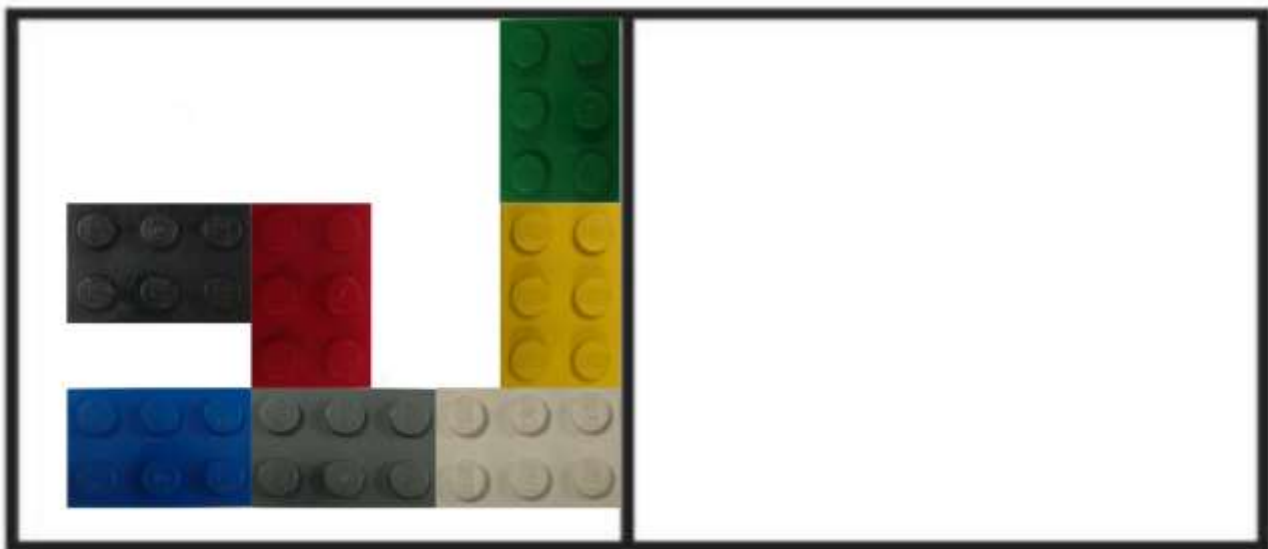

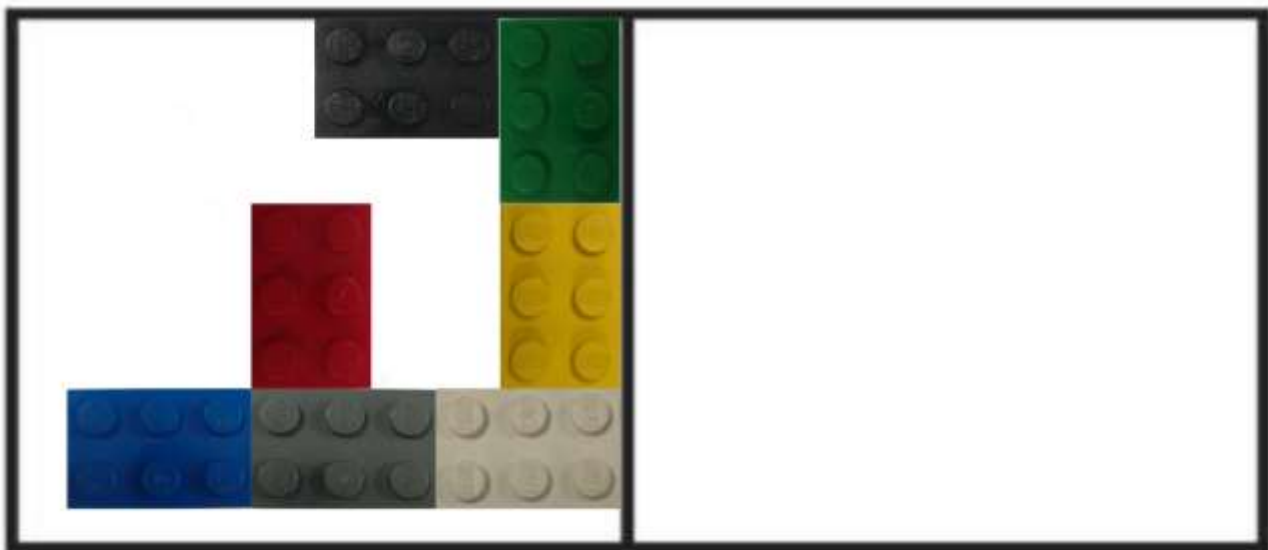

Til læraren

Heftet ”Matematikk-katten: Lego-speglings” er første hefte i serien om spegling. Heftet er laga til elevar som synes at matematikk kan vera vanskeleg. Elevar som opplev at matematikken er vanskeleg treng at oppgåvene er lette å kjenna att og at det er mange gjentakningar. Heftet har difor mange like oppgåver.

Heftet kan brukast på to måtar:

1. Eleven får sitt eige hefte. Eleven set Legoklossane i det kvite feltet, så dei blir spegla i forhold til bilda i heftet. Etterpå kan eleven teikna rundt Legoklossane. Det er viktig at fargane på klossane er dei same som i heftet. Eventuelt kan eleven farga klossane som er teikna for å visuelt gjera det tydelegare.
2. Klypp ut bilda av Legoklossar og gje bilda til eleven. Eleven set klossane så dei blir spegla i forhold til klossane på bilda. Eleven kan eventuelt teikna rundt klossane og farga.

Lukka til med å bruka heftet.

Om «Matematik i vanskeligheder»:

«Matematik i vanskeligheder» er dansk og lagar produkt og undervisningsmateriell til elevar som opplev at matematikk er vanskeleg. Vi har ein positiv filosofi om at det er matematikken som er problematisk og ikkje den enkelte elev.
