Regler: (Eleverne skal have 6 terninger pr. person)

- Alle kortene samles i en bunke
- En elev vender det første kort
- Eleverne skal nu kaste alle sine terninger, og hurtigst muligt få den samme talkombination som kortet viser
- Talkombinationen skal nødvendigvis ikke kunne laves over et kast
- Eleverne gemmer hele tiden de terninger der passer til talkombination, og kaster de resterende terninger igen
- Den elev der først får samlet talkombination med sine terninger vinder kortet, og kan tage det over i sin bunke
- Spillet slutter når alle kortene er lavet
- Vinderen er den der har flest kort i sin egen bunke

Materialeliste:

- Print kortene ud og laminér dem
- 6 terninger pr. person
