Nebula DAS Commissioning

## Experience the latest in Digital DAS and RF Repeaters

✓ Independent Sectorization and RF Settings per Operator

✓ Built-in Spectrum Analyser

✓ Leaky-feeder Monitoring

Commissioning Training

The Nebula DAS is a world-class digital DAS solution. This installation training for Maven DAS and repeaters will ensure you can get the full benefits for your projects. Help your organisation get certified as a partner with Maven Wireless.

Pre-requisites:

- Experience in RF design and measurements

Course Overview:

This course delves into the setup and commissioning of Maven's distributed antenna system (DAS). Discover how to utilize the NMS for head-end configuration, sector allocation, RF parameter adjustments, and employing Maven's spectrum analyzer, among other functionalities.

In summary:

- Set up the Head-end band modules for multiple operators, allocate sectors and configure RF parameters
- Use auto detection and system tree, set up fiber topologies and perform optical levelling
- Use Maven's built-in spectrum analyzer, configure the Leaky Feeder Monitoring and Distance to Fault functionality
- Learn about alarm management and trouble shooting
- Software and Firmare upgrades
- Equipment Hands-On
