Support & Housing

Caring is our Calling !

ABOUT US

MEDICARE SUPPORT AND HOUSING

Dependable home care services you can trust in the comfort of your own home.

Medicare Support and Housing was established to help meet the demands of people who are in need of care in the comfort of their own homes.

We take time getting to know you and your families, listen to your specific needs and requirements, and thereby tailoring a package to suit your specifications, through our extensively experienced clinical Carers.

Our sole priority is to ensure that your independence is maintained as much as possible whilst we support you in the comfort of your home.

OUR SERVICES

MEDICARE SUPPORT AND HOUSING

If your answer is yes to any of the questions below, you are eligible for our services.

- Do you need follow-up care after being admitted to the hospital?
- Do you require constant companionship and/or assistance?
- Are you afflicted with a chronic or debilitating disease?
- Do you have mobility issues?
- Do you not want to be hospitalized or admitted to a nursing home?

SUPPORTED LIVING

At Medicare Support and Housing we offer supported living as one of our esteemed services. Supported living (or supportive living) helps individuals who require a variety of support, retain their independence, and also receive extra physical and psychosocial support, which are a necessity in leading more fulfilled lives. This service is the best option when you do not wish to live in residential care.

Our Supportive Living caters for various needs including:

- Persons with learning disabilities.
- People who live with autism
- Individuals with mental health needs
- Complex needs such as lumber stoma.
- Acquired brain injuries (ABI).
- Prader-Willi syndrome (PWS).

COMPLEX CARE

This service includes:

- Tracheostomy care is provided.
- Gastrostomy and nasogastric feeding are both viable options (PEG feeding).
- Management of bowel and epilepsy symptoms.
- Continence care (Lumber Stoma).

Complex care is specialised help that is provided to an individual with a chronic or long-term health condition. This means individuals require more assistance with managing their symptoms and everyday activities in order to maintain a high quality of life.

Complex care encompasses caring for persons with conditions that require clinical support, such as Parkinson's disease or a neurological condition. It can also be provided in terms of nursing services as a result of an individual's primary condition.

DOMICILIARY CARE

Domiciliary care is fast becoming a desirable option to the elderly as it allows them to independently live in their home with help coming in from professional carers to tackle day to day basic needs. Services under domiciliary care are unique to each individual and therefore you have the independence to choose what you wish to be assisted with.

Our range of services in domiciliary care include:

- Performing household chores.
- Assisting in personal care.
- Managing medication, doctor's visits and prescriptions.
- Offering advice and information including COVID-19 protocols.
- Offer companionship

PRIVATE LIVE-IN CARE

Private live in care is the ultimate option if you desire care in the comfort of your home 24 hours a day and seven days a week. This option is available on both long term and short term (respite) basis.

Assistance includes medication management, personal care, hoisting, household chores, or meal preparation.

Why Private Live-In Care?

- Private Live in Care is a great option particularly for the elderly as it reduces infection rates which are higher within a care home as they share everything.
- Private Live-in care is tailor made to fit your unique needs and hence offers a more comprehensive and efficient care.
- This option is received in the safety and comfort of your home and hence removes the chances of anxiety that can be heightened by relocation.

END OF LIFE CARE

End of life care is concerned with offering health care services for your loved ones who may be nearing the end of their lives or having entered the advanced stages of a terminal disease. Your loved ones may feel melancholic as they anticipate their impending death. Essentially, Carers are thereby concerned with the physical comfort, psychological needs, spirituality and practical tasks of you and your loved ones.

Our end of life care includes:

- Contenance care
- Management of your medication.
- Pain management

COMPANIONSHIP

Companionship care is ideally suitable for individuals who are still healthy but often feel isolated and hence develop loneliness. These individuals are prone to loneliness and depression which can consequently lead to severe regression of physical and mental well-being. Your designated competent carer will offer companionship to your loved ones to curb the dire consequences of loneliness. Their priority will be to partake in activities enjoyed by your loved ones thereby promoting a more fulfilled life that has zero to no stress.

Our Companionship services include:

- Offering company in your home, at hours you need it.
- Running your personal and medical errands on your behalf.
- Accompanying you to holidays and enjoying your hobbies with you.
- Chaperoning services to and from your events of choice.
- Housekeeping can also be completed if you so desire so.

NIGHT SUPPORT

Night support concerns itself with providing Carers who assist you and/or your loved ones throughout the night time and early hours of the morning. Night support includes assistance with mobility issues and incontinence, changing of catheters and personal care. This service is a great option if you and/or your loved one require need regular assistance during the night time.

Services we offer you on night support include:

- Ventilation and respiratory support in the home.
- Continence care is provided.
- Assistance with mobility to access relief.
