

VSU Congress

18-20 May 2024
Live in Leuven

Peter Tumminello

The Realm of Gems and Minerals

The eight structures are archetypes which are rooted in science. These structures come to life in the broad brush strokes of the thought and feeling of our clients.

– Peter Tumminello

During the Webinar **Psyche and Structure** in 2022 Peter introduced the eight crystal structures and how they align with the inherent qualities of each person's psyche.

At this live seminar **The Realm of Gems and Minerals** Peter will feature the depth and breadth of his work with gems and minerals. It will include deeper results gleaned from his original work on gems [Twelve Jewels, 2005] as well as the clinical and proving materials from the vast array of new gemstones he has worked with over the last 18 years.

All this will be weaved together through his understanding of two universal themes: the architecture of mind as illustrated in his recent work 'Psyche and Structure' (2017) and the indication of 'colour affinity' which is so closely aligned to those who benefit from gem remedies.

Included in the materials are:

- The pandemic 'aftermath': Diamond immersion and Black Nephrite Jade
- Understanding the two green Jades: Nephrite and Jadeite
- The vast clinical arena of Calc carb – features Aragonite, four varieties of Calcites and Pearl
- Serpentine and the tectonic shift
- Citrine, Black Tourmaline, Kunzite, Chastolite and Obsidian
- The sphere of the copper-based gems: Azurite; Chrysocolla; Malachite; Chrysopal and Turquoise
- Deeper dimensions of the colour symptom.
- An overview of the Structures of the Psyche
- Structure in the realms of the Plants and Animals

PARK INN BY RADISSON LEUVEN
