

Fishing on Åsunden Lake.

There is a small private hamlet situated on the bank of the huge lake Åsunden with a fabulous view over the lake. Here you will be able to spend your days in quiet, enjoying beautiful nature – forests, meadows and mountains.

The lake is famous for its fishing for pike and pike-perch. Åsunden is a clear water lake with an area of nearly 6,000 hectare and a depth of 63 meters. The water is clean and of drinking water quality. There are many islands in Åsunden making it like an archipelago with flat rocks and grounds where the pikes like to stand. In the lake you can also catch perch, char, eel, tench, burbot, vendace, bream, rudd and some more species as well as crayfish. There is also a native population of salmon trout.

Local records: pike is over 15 kg and pike-perch over 12 kg.
