

# A balancing act

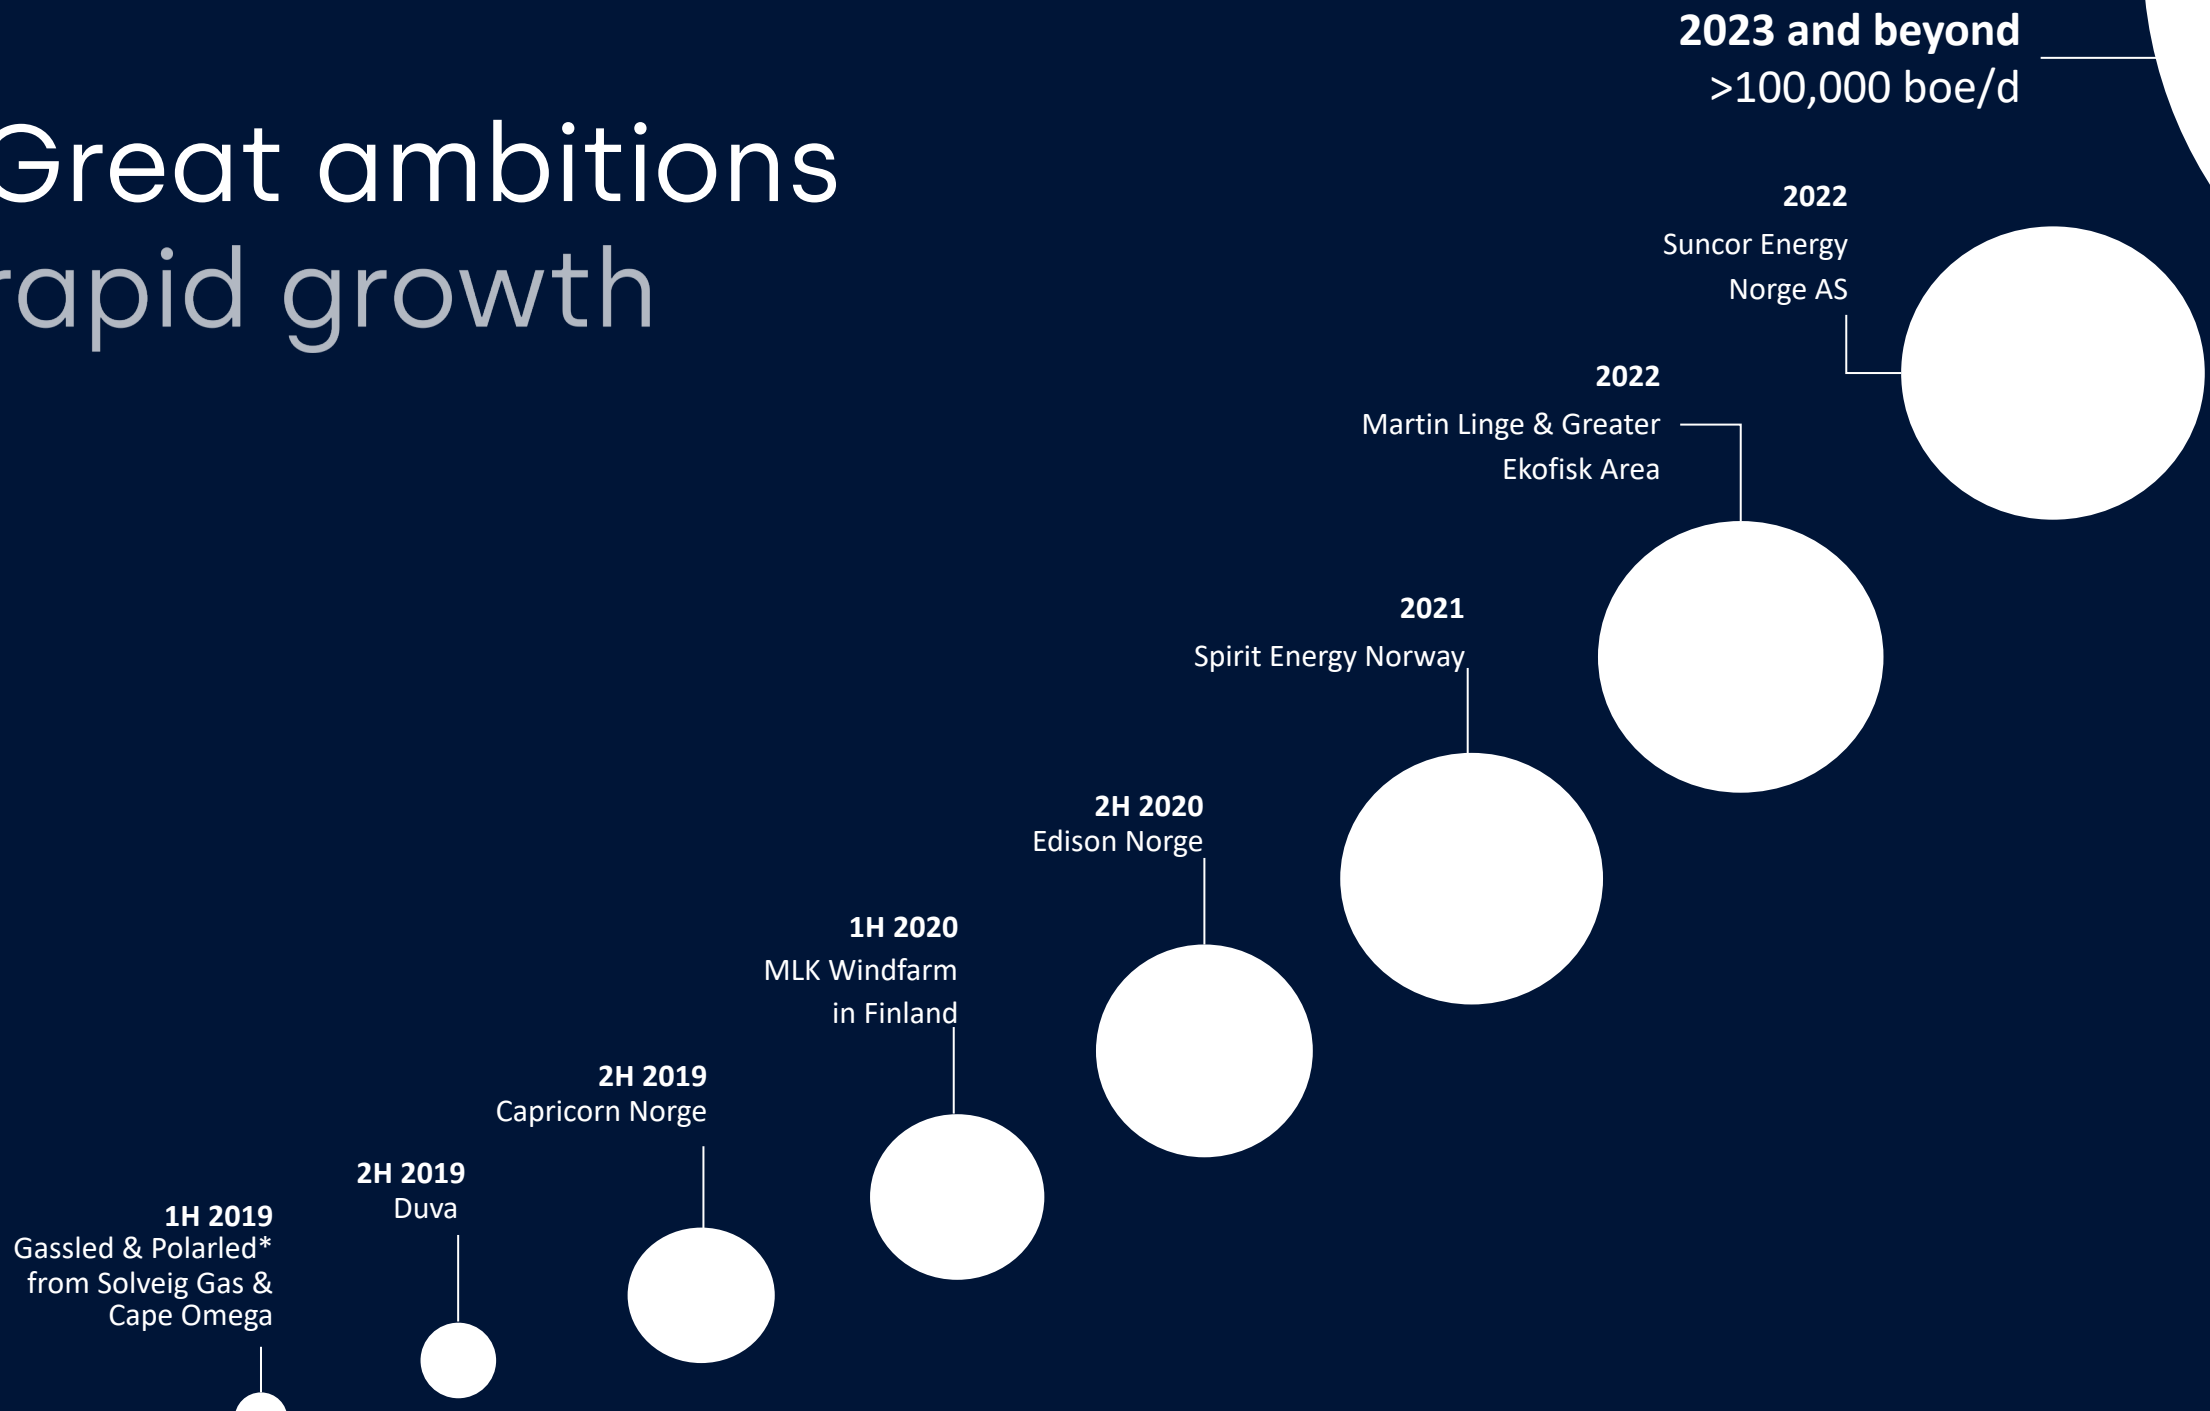

Why?

Where do  
we stand?

# Great ambitions rapid growth

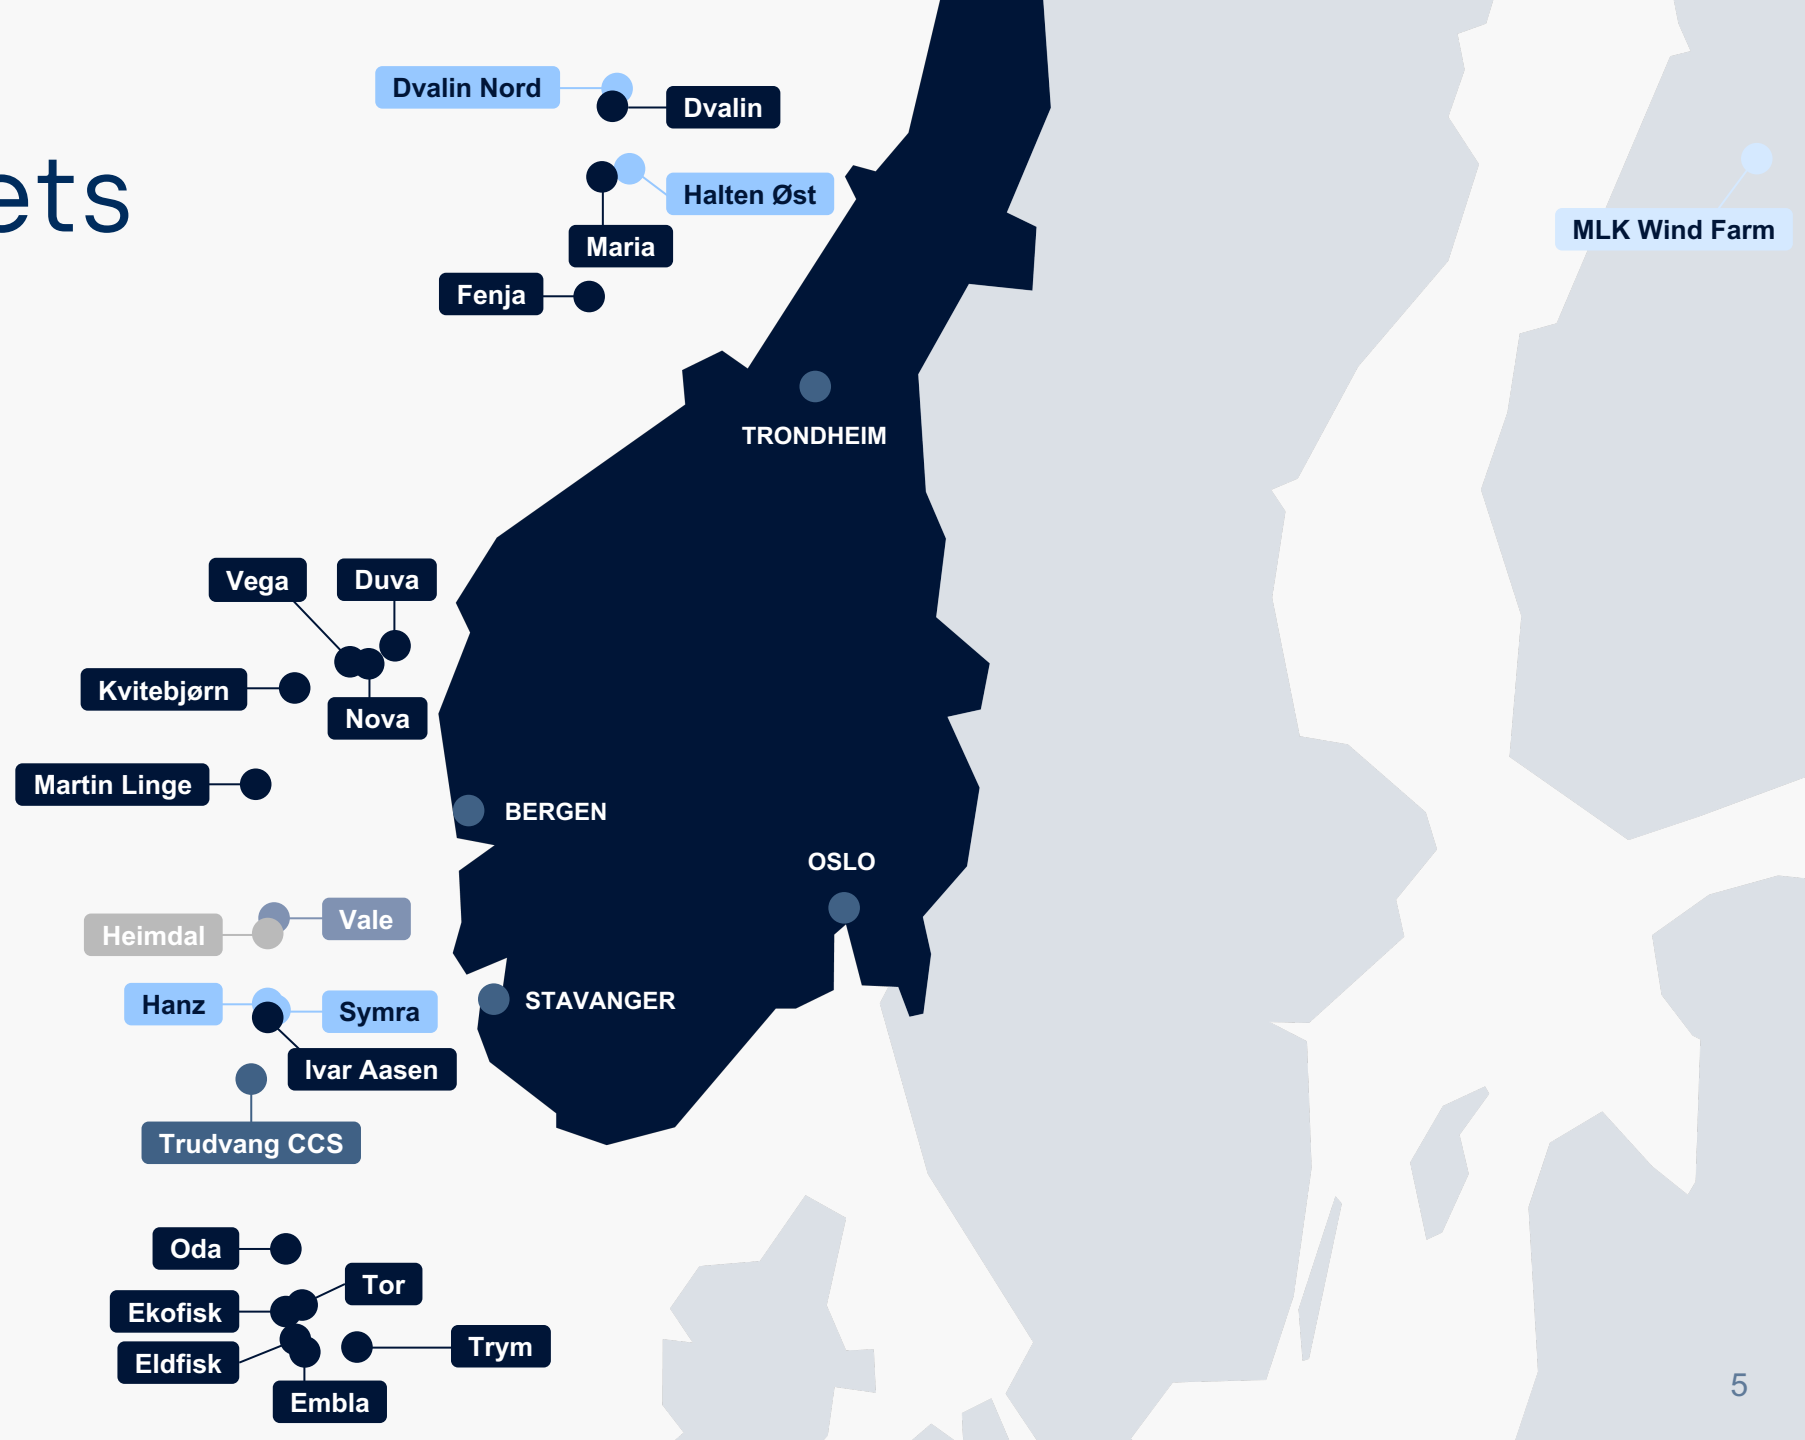

# Exciting assets

- Producing (15)
- Development (4)
- Processing hub (1)
- CCS opportunity (1)
- Decommissioning (1)
- Wind farm (1)

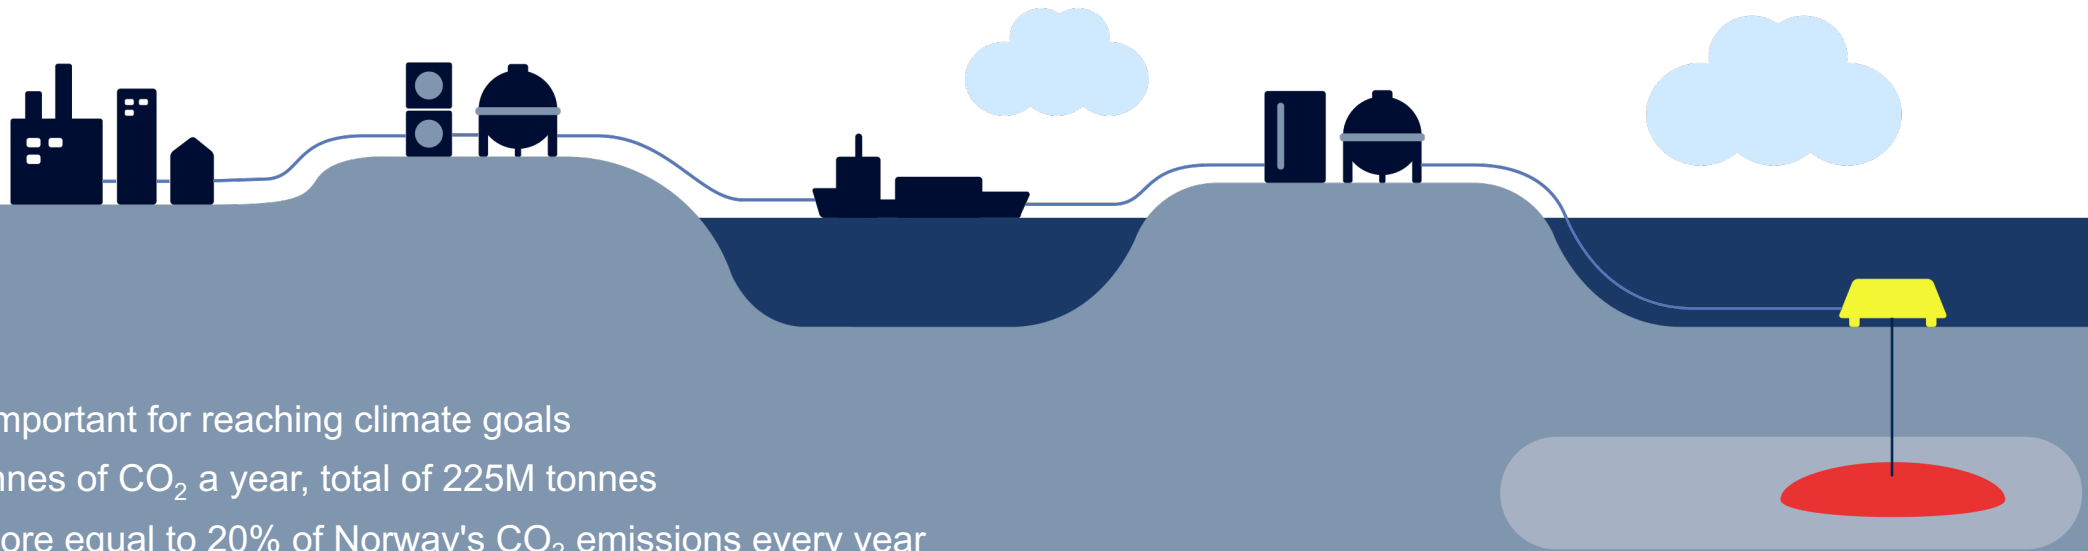

## Not shown on map:

- Discoveries (2)
- Licenses (58)

# The CCS breakthrough

Industrial site with CO<sub>2</sub> capture > CO<sub>2</sub> liquefaction and transport terminal > CO<sub>2</sub> carrier > Receiving terminal > Pipeline to storage > CO<sub>2</sub> storage

- CCS important for reaching climate goals
- 9M tonnes of CO<sub>2</sub> a year, total of 225M tonnes
- Can store equal to 20% of Norway's CO<sub>2</sub> emissions every year
- Start-up in 2029

Ambitious  
exploration  
plans

# What we need

Why?

# The team
