

## DATASHEET

### UNISON INTERCOM – AIPHONE IX-SERIES INTEGRATION

#### MAIN FEATURES

- ▶ Any door can be linked with an intercom station to enable remote unlocking of a door for valid users
- ▶ Easily manage and monitor multiple calls in progress through site maps and commands
- ▶ Monitor the active status of door stations
- ▶ A camera can be triggered to display on a Unison client for an operator to respond to an intercom call or streaming when required
- ▶ Unison workstations can operate as 'virtual' intercom stations for Video
- ▶ View logs of all intercom events

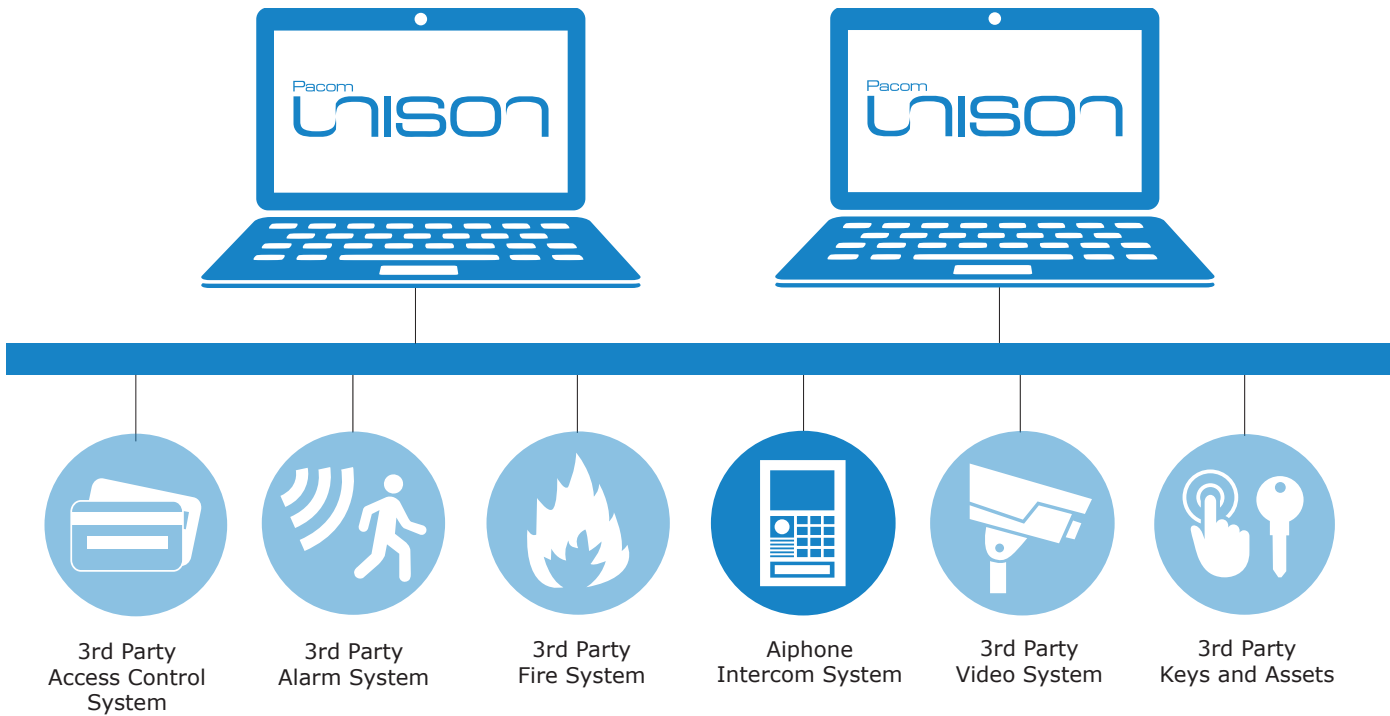

***Unison is a market leading platform with the ability to link intercom with alarms and other events in an efficient way. Unison uses the latest technology and offers a powerful and user friendly solution that suits all types of businesses and organizations.***

#### PACOM UNISON

Unison supports multiple intercom systems and brings them together in a single unified user interface. The intercom integration and operator interactivity is configurable to cater to different applications and to streamline the desired workflow. In environments with many IX-DA stations, the Unison software can be configured to easily handle calls through site map configuration. This enables the operator to respond to multiple requests in a speedy and methodical manner. If less frequent calls are expected or if there are special circumstances, the Unison software can be programmed to respond differently. For example, if there is an emergency, an alarm can be generated and the intercom call can be automatically answered once an alarm is acknowledged by the operator.

#### AIPHONE IX-SERIES: IP VIDEO INTERCOM

Aiphone has become the most respected and reliable brand of communication systems in the world. Aiphone Co. Limited in Nagoya, Japan exports to over 60 countries. Aiphone products range from simple do-it-yourself door answering units to sophisticated video entry security systems, complex microprocessor-based commercial systems, and luxury condo/apartment security and communication systems. Aiphone products are unrivaled in design simplicity, technical excellence and reliability.

## DESCRIPTION

The IX Series is a network-based communication and security system featuring video entry security, internal communication, emergency stations, and paging. All units and app in the systems can unlock doors remotely on a network, assist onsite visitors from an offsite location, broadcast emergency announcements, and communicate using a PoE network.
