

FEATURES

- ▶ Receive and manage all types of alarms from different intrusion detectors
- ▶ Real time monitoring of events
- ▶ User friendly interface allows the operator to act quickly and effectively
- ▶ Identify the source of the alarm through graphical drawings/maps
- ▶ Customized action forms for alarm management
- ▶ Video verification of alarms
- ▶ Consistent reporting for all subsystems
- ▶ Automatic upload of configuration data
- ▶ Customizable alarm types for complete flexibility
- ▶ Alarms can be linked to other sub-systems using a powerful macro engine to enable automated actions
- ▶ Full logging of alarms and operator actions provides comprehensive auditing of events

PACOM Unison is designed to provide easy management of alarm systems for all types of businesses. This makes PACOM Unison a suitable solution for organizations and customers with high demands on flexibility and ease of use.

PACOM Unison cleverly acts as a “bridge” between intrusion alarm controllers and other sub-systems. When an alarm is triggered, the PACOM Unison software will indicate where the alarm originated. Alarms can be displayed on interactive floor plans and audible signals can be generated at the workstation to uniquely identify the type of alarm via multi-media. It is possible for the operator to reset the device which initiated the alarm as well as perform a wide variety of other remote functions. The user friendly functions of the system, efficient bulk programming and the powerful graphic overviews make administration easy.

The graphical user interface, including dynamic display of alarm points, considerably simplifies management. By taking advantage of the intelligent linking function in PACOM Unison, users can easily link an object in the system with a point on the map.

PACOM Unison is a market leading platform with the ability to link various alarm systems to a single system. Using the latest technology, PACOM Unison offers a powerful and easy to use solution that suits all types of businesses and organizations.

SUPPORTED INTEGRATIONS

PACOM Unison supports integration with the following third party systems:

- Honeywell - Galaxy
- TAC5003
- PACOM 8002/8003
- Sentrion S4

Refer to the PACOM feature sheet on the respective manufacturer for further details about the integration.

COMPATIBILITY

PRODUCT	VERSION
PACOM Unison	5.7 or later

ORDERING INFORMATION

PART NUMBER	TYPE CODE	DESCRIPTION
110 002 002	USN-ALM	Unison Alarm Module Includes support for 50 alarm detectors.
