

## FEATURES

- ▶ Full two-way synchronisation of users and permissions between PACOM Unison and Deister
- ▶ Support for issuing multiple keys
- ▶ Key access using Card, PIN or Card+PIN
- ▶ Comprehensive event tracking in real-time
- ▶ Events can trigger actions on cameras, doors, and many other systems via Unison Expressions
- ▶ Configurable security breach handling behavior (e.g., temporarily block card access for a user)

Deister proxSafe is a key and asset management system used to effectively control and monitor valuable assets using high security, electronically controlled cabinets.

Monitoring who, when and where keys and assets are accessed adds confidence and peace of mind with control and immediate response to alerts that can be automatically raised when alarm conditions exist.

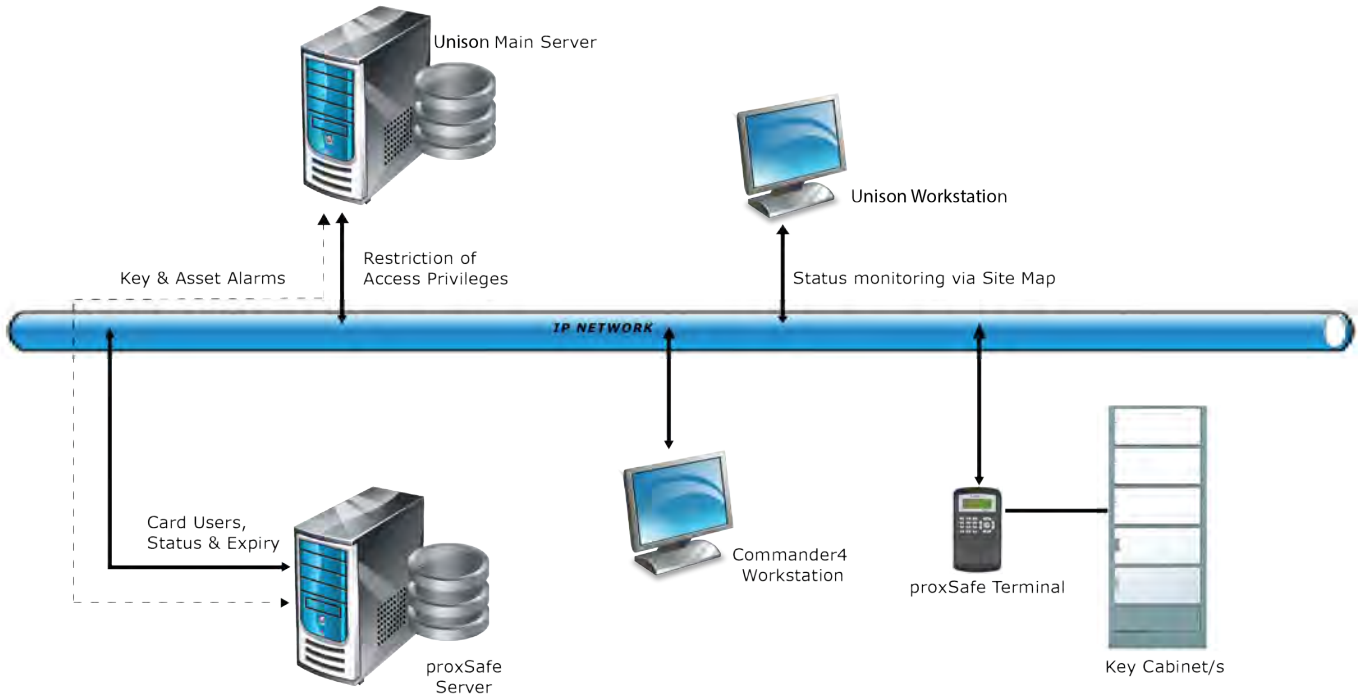

Integrating Deister proxSafe with the PACOM Unison system allows Unison operators to respond to alarms, perform actions and monitor the status of the key management system as part of their standard Unison security management solution.

Linking Unison cardholder data and proxSafe key users provides the ability to control access to individual keys using existing cardholder data and the automatic sharing of data between Unison and proxSafe ensures that secure access to critical assets is maintained at all times.

The electronically controlled key cabinets can be efficiently monitored from the convenience of the Unison client and operators can see who has accessed keys and assets at any time. More than 50 different events can be displayed as alarms in real-time, enabling Unison operators to take timely action.

***PACOM Unison provides flexible key and asset management with complete control and monitoring of assets with its intelligent interface to Deister proxSafe Key Management System.***

# ARCHITECTURE

# COMPATIBILITY

## PRODUCT

PACOM Unison  
Supported Hardware/Software

## VERSION

5.9 or later  
Software: Datacomm Engine (Version: 4.2.4.1151)  
Commander (Version: 4.2.4.1151)  
Terminal Hardware Version C4 v0387.000  
Terminal Software Version 2.45  
proxSafe Maxx 32 Cabinet

# ORDERING INFORMATION

PART NUMBER	TYPE CODE	DESCRIPTION
110 001 001	USN-STD	Unison Standard Server Includes 1 Workstation License.
110 002 008	USN-KEY	Unison Key & Asset Module Includes support for 25 keys/assets.
110 003 008	USN-KEY-25	Unison Key & Asset Module license to support an additional 25 keys/assets.
