

FEATURES

- ▶ Individual user permissions for floor access
- ▶ Floor accessibility control based on time of day
- ▶ Secure/unsecure elevator operation

PACOM Unison is designed to provide easily managed elevator control systems for all kinds of businesses. This makes PACOM Unison suitable for organizations and customers with high demands on flexibility and ease of use. PACOM Unison provides the ability to create individual permissions for elevator floors which ensures that building users can travel efficiently without compromising the level of security. By taking advantage of the intelligent linking function in Unison users can easily link an object in the system with a point on the map.

PACOM Unison is a market leading platform with the ability to link various elevator control systems to a single system, in an efficient way. Unison uses the latest technology and offers a powerful and easy to use solution that suits all types of businesses and organizations.
