

## FEATURES

- ▶ Display live and recorded video in response to any alarm or event
- ▶ Visually verify any threat quickly and easily
- ▶ Quickly display live video by clicking on an icon in a graphical site map
- ▶ Recall recorded video directly from the Transaction manager status message
- ▶ Save live image snapshots and video clips
- ▶ Highly scalable with support for configuring unlimited cameras
- ▶ Unified reporting and audit trail
- ▶ Move the camera to a preset position
- ▶ Onscreen PTZ (Pan, Tilt, Zoom) controls for camera movement and positioning

PACOM Unison allows you to easily combine access control, intruder alarm, messaging and video verification in a single security management solution. The Unison VIGIL Video Management integration intelligently leverages 3xLOGIC's VIGIL range of video products and gives you the opportunity to install a single completely integrated solution.

Video verification can be easily performed from the convenience of any Unison workstation in your security network. When actioning events from a Unison workstation, security operators can be automatically shown the associated live or recorded video streams in response to any event or alarm raised by the system. Viewing video streams enables the operator to quickly and visually verify any threat, and put in place the appropriate alarm handling procedures to ensure the threat is effectively managed.

Visual verification can significantly reduce the incidence of false alarms and their associated costs. Recorded video can also be recalled by simply double-clicking a status message/event in the Transaction Manager. The recorded footage displayed will be synchronised with the time of the status message/event.

Camera icons can be added to a Unison interactive site map to provide operators with a graphical representation of security video equipment installed at a site.

***PACOM Unison is a smart security management platform that provides the perfect surveillance and video verification solution with its intelligent interface with 3xLOGIC's VIGIL Video Management System.***

## INTEGRATION FEATURES

<a href="#">Instant Live Video Streaming</a>	PACOM Unison immediately streams live video from a VIGIL camera based on any alarm or events in the system.
<a href="#">Easily Recall Recorded Video</a>	Recorded video sequences can be conveniently and easily recalled by simply clicking on the event or alarm in the Unison transaction log. This provides a recorded history of the event and allows an operator to review the threat at any time.
<a href="#">Seamless Graphic Control</a>	Using Unison graphic maps to display VIGIL camera images could not be easier. By simply placing a camera icon on any Unison graphic map, live video can be instantly displayed with a single click.
<a href="#">Advanced Alarm Verification</a>	Before taking action or closing the alarm, the operator can quickly review the live or recorded stream from any VIGIL camera to determine the threat and verify the alarm immediately.
<a href="#">Highly Scalable</a>	PACOM Unison in combination with the VIGIL video solution can easily scale from a single camera solution to thousands of cameras in different locations.
<a href="#">Powerful Multi-Site Remote Monitoring</a>	PACOM Unison and VIGIL represent the perfect multi-site security combination with both systems currently installed at single customer installations with thousands of buildings.
<a href="#">Ensure Standard Policies</a>	With the advanced integration provided between Unison and VIGIL, organizations can now drive consistency in security policies and ensure alarms and alarm review is completed in repeated and reliable ways.
<a href="#">Enhanced Video Control</a>	During video playback, Unison can control the VIGIL cameras to fast forward, rewind, step forward or backwards, providing complete control at the fingertips of the security operator.
<a href="#">Take a Snapshot</a>	Using the VIGIL video equipment allows Unison to take a snapshot on the fly and save the snapshot image to the Unison local workstation PC for later review or emailing.
<a href="#">Threat Verification from Every Angle</a>	PACOM Unison can be configured to show a grid of VIGIL camera images simultaneously allowing an operator to view a threat from every angle at the same time.

## COMPATIBILITY

PRODUCT	VERSION
PACOM Unison Vigil Plugin	1.0
PACOM Unison	5.9 or later
PACOM Integrated Video	1.0
3xLOGIC VIGIL SDK	10.60.029

## ORDERING INFORMATION

PART NUMBER	TYPE CODE	DESCRIPTION
110 002 012	USN-VIGIL	Unison Video Module Includes support for 200 3xLOGIC VIGIL Cameras.
