## Precise Newsletter

September 2023

### Launch of our webpage

Read more stories and share your thoughts about our new [English webpage](#).

Interreg also set up a webpage with information from us in [German](#) and [Danish](#). These pages are hosted as subpages of the Interreg programme 6A and we decided that we also like to have an English representation on the web. That is why we setup the English page.

### Give us your feedback

We like to hear from you!

## Successful start

### Kick-off Precise

In April, we organized the Kick-off of our project in Sønderborg. We had the pleasure to welcome all PRECISE partners, and also some network partners. We reviewed all the tasks and plans

and defined the necessary working groups. The project structure and tasks were presented and aligned for optimum task completion. Interreg secretariat introduced an overview of applicable rules. We can already feel an amazing synergy and motivation between the partners, who will contribute with their expertise to the achievement of a PRECISE tool for expiration dates of meat/fish. During the kick-off, the device was tested on a piece of meat whose expiration date has just passed. The sensor demonstrated that the piece was still safe for consumption. During the project, the sensor will be tested with meat/fish with known expiration dates (via sensorial and other laboratory tests), and the sensor will learn to correlate the readings with the correct expiration dates.

### **Assembly of electronic noses for testing**

---

Roana visited our partners at ISIT in Itzehoe. They delivered sensor chips to be optimized and integrated into electronic noses. The image shows Jana Meyer and Roana de Oliveira Hansen (left to right) holding sensors and Lars Blohm with a whole wafer of sensors like they produce them at Fraunhofer ISIT.

The sensors are now assembled in the prototype by AmiNIC and will be delivered to our partners for testing.

### **National Food Waste Day in Denmark**

---

On the national Food Waste Day, Sønderborg Municipality organises activities around food and how to prevent waste. PRECISE is part of the organizing committee and will be showing the solution, along with a series

of activities and instructions on how to prevent food waste.  
Join us on September 30, 11:00-15:00  
Løkkegaardsvej 3, Sønderborg at the Center for Verdensmål, Kær vestermark
