Introduction to common

Red Team Attacks & Blue Team Defenses

Brought to you by

NETSPI™

Common Red Team Attack Vectors and Techniques

Common Attack Kill Chain

Common Blue Team Detective and Preventative Controls

RED TEAM

Common Variations

Find Emails & Users		Verify Emails & Users				Create Phishing Payloads & Sites	
LinkedIn.com Data.com	Google.com Bing.com	SMTP Server Cmds	Send Test Emails	HTTP with NTLM	Office365 OWA MS APIs	Create Content-Filter Exceptions	Buy Expired Domains

Email Sources				Email Targets		Email Content		
Spoofed Internal Domain	Spoofed External Domain	Domain Similar to Company	Hacked Account	Mass Mailing	Targeted Mailing	Pretext Scenario	Malicious Links	Malicious Files & Embedding

Malicious Links			Website Components				Files	
Port Scan	Geo Locate	Phish Web Site	Credential Collection Form	Java Applet ClickOnce HTA	Brower Exploit	Browser Add-On Exploit	Common exec file formats	Office Docs + Macros

Common Payload Command Types					
Commands cmd, wmi, wrm, ftp, net, etc	**Binaries** Executable, Installer, Library	**Scripts** PS, VB, VBS, JS, Bat	**Standard Code** C, C++, C#	**Assembly Code** shellcode	**Byte Code** Java, .Net

Common Local Persistence Methods							
PW / Pvt Key PW Hash Kerb Ticket	Custom Providers	File, Registry, & Application Autoruns	Windows Service	Scheduled Task	WMI Event Trigger	Code / File Modification	Driver BIOS

Egress Ports		Common Protocols					Common Types	
TCP UDP	IPv4 IPv6	HTTP HTTPS	DNS ICMP NTP	SSH Telnet Rlogin	FTP NFS SMB	Torrent IM SMTP	Beacon	Bind Shell Reverse Shell Web Shell

Weak Configurations						Local Exploits	
Weak Password or Password Storage Method	Insecure Service	Insecure Schtask	Insecure GPO	Insecure Protocol	Excessive Privilege	OS	APP

Steal Authentication Tokens			Common local Targets					
Password / Private Key	Password Hash (PTH)	Kerberos Ticket (PTT)	OS, Domain, & Network Information	Users & Groups	Cache & Logs	Services & Processes	Installed Apps	Files & Registry

Passive Recon	Active Discovery					Locate Domain, Ent. & Forest Admins	
Sniffing	Trace Route	Ping & Port Scanning	DNS & ADS Queries	Share & Logon Scanning	DB, SP & Mail Svr Scanning	Domain GPOs & SPN	Remote Sessions & Processes

Stolen Authentication Tokens			Common Methods						
Password / Private Key	Password Hash (PTH)	Kerberos Ticket (PTT)	MGMT Services	Windows Service	Sched Task	File Share	DB, App & VM Servers	Remote Exploit, Physical	GPO, SCCM

Steal Admin Authentication Tokens			Attack DCs	Escalate to Root Domain			
Password / Private Key	Password Hash (PTH)	Kerberos Ticket (PTT)	Exploits, Kerberoast & GPP	Shared Password	Delegated Privs Nested Groups	Domain Trusts & SID History	Exploits Kerberoast GPO

Common Data Stores				Common Data Targets			
Mail Servers	File Servers	Database Servers	Code Repositories	PII PHI CHD	IP & Research	Financial Data	Insider Trading Info

Common Protocols TCP/UDP, v4/6				Data Handling			Physical Media	
LAN & Wireless	Common & Uncommon Ports	Standard & Custom Protocols	C2 and Alternative Channels	Staged & not Staged	Large & Small Files	Compression Encoding Encryption	USB & SD	CD DVD

Stolen Authentication Tokens			Two Factor	Common Internet Facing Interfaces				
Password / Private Key	Password Hash (PTH)	Kerberos Ticket (PTT)	Private Key Token Seed Skeleton Key	VPN	RDP SSH VDE	Web Shells	Office365 Azure AWS	Web Based Citrix & TS

BLUE TEAM

	Endpoint	Network	Process
Prepare Phishing Attacks from public resources	NA	Deny / log VRY requests Deny / log EXPN requests Log RCPT commands executed sequentially Large numbers of HTTP NTLM requests	User awareness training Track company's point of presence and employee exposure. Monitor domain expirations
Send Phishing Emails to employee addresses	NA	Email filters, thresholds, and spam rules Email source verification Blacklist checks SPF record checks Logs / SEIM / Alerts	User awareness training Incident response procedures
Deliver the Payloads to employee systems	Asset / config / patch mgmt. Anti-virus / HIDs / HIPs Secure group policy Mail client configurations MS Office Security Settings Web browser configurations Logs / SEIM / Alerts	Email filters, thresholds, and spam rules Deny / log relay requests Secure caching provider Web filtering / white listing Authenticated HTTP proxies Logs / SEIM / Alerts	User awareness training Incident response procedures
Run the Payload Commands on employee systems	Asset / config / patch mgmt. Anti-virus / HIDs / HIPs Secure group policy settings Application white listing Least privilege enforcement Logs / SEIM / Alerts	NA	User awareness training Incident response procedures
Maintain Local Persistence on employee systems	Asset / config / patch mgmt. Anti-virus / HIDs / HIPs Secure group policy settings Application white listing Least privilege enforcement Logs / SEIM / Alerts FIM / WMI event triggers	NA	User awareness training Incident response procedures
Obtain Command & Control Channel from employee systems	Asset / config / patch mgmt. Anti-virus / HIDs / HIPs Secure group policy settings Application white listing Least privilege enforcement Logs / SEIM / Alerts	Firewall Rules / Segmentation NIDs / NIPs Fix Up Protocols Web Filtering / White Listing Authenticated HTTP Proxies Logs / SEIM / Alerts	User awareness training Incident response procedures
Escalate Local Privileges on employee systems	Anti-virus / HIDs / HIPs Secure group policy settings Application white listing Least privilege enforcement Logs / SEIM / Alerts DEP / ASLR / SEH Micro virtualizing / sandboxes	Logs / SEIM / Alerts	Admin awareness training Incident response procedures
Perform Local Recon / Discovery on employee systems	Asset / config / patch mgmt. Anti-virus / HIDs / HIPs Secure group policy settings Application white listing Least privilege enforcement Logs / SEIM / Alerts	Logs / SEIM / Alerts	Admin awareness training Incident response procedures
Perform Network Recon / Discovery on internal networks	HIDs / HIPs Logs / SEIM / Alerts Canaries - Local & Domain User Accounts - Domain Computer Accounts - Local and Network Files File Auditing	Firewall rules / segmentation NIDs / NIPs Honey pots Tarpits Canary networks, systems, & accounts Logs / SEIM / Alerts	Admin awareness training Incident response procedures
Perform Lateral Movement between systems/networks	Asset / config / patch mgmt. Anti-virus / HIDs / HIPs Secure group policy settings Application white listing Least privilege enforcement Logs / SEIM / Alerts Host-based Firewall	Firewall Rules / Segmentation NIDs / NIPs Honey Pots Tarpits Canary networks, systems, & accounts Logs / SEIM / Alerts	Don't use shared local accounts Use a separate domain user and server admin accounts Maintain secure configs Incident response procedures
Escalate Domain Privileges via common vectors	Asset / config / patch mgmt. Anti-virus / HIDs / HIPs Secure group policy settings Application white listing Least privilege enforcement Logs / SEIM / Alerts Host-based Firewall	Firewall Rules / Segmentation NIDs / NIPs Honey Pots Tarpits Canary networks, systems, & accounts Logs / SEIM / Alerts	Don't use shared local accounts Use a separate domain user and server admin accounts Maintain secure configs Incident response procedures
Find and Access Sensitive Data in common data stores	Least Privilege Enforcement Two-Factor Authentication Data Encryption and Secure Key Management File, Application, and Database Auditing Host DLP / Logs / SEIM / Alerts	Firewall Rules / Segmentation NIDs / NIPs Honey Pots Tarpits Canary networks, systems, & accounts Logs / SEIM / Alerts	User awareness training Incident response procedures Manage keys securely Consolidate and isolate sensitive data stores
Exfiltrate Sensitive Data using common channels	HIDs / HIPs Host DLP Large file upload detection Mail client/server settings Logs / SEIM / Alerts	Firewall Rules / Segmentation Email Server Configuration Network DLP Fix Up Protocols Web Filtering / Auth Proxy Canary Data Samples Logs / SEIM / Alerts	User awareness training Incident response procedures
Maintain Remote Access Without a C2 using common interfaces	Enforce Two-factor authentication on all external interfaces Limit Terminal Service, Citrix, and VDE access to specific groups during specific hours Geo / IP limiting	Firewall rules / segmentation NIDs / NIPs Canary networks, systems, applications, and accounts Logged events / SEIM / alerts	Admin awareness training Incident response procedures Enforce strong account policies
