

NEW DEVELOPMENT

The **PrimeBlade** containment doctor blade

Made from top quality martensitic steel for optimal properties to achieve a containment doctor blade with unique properties .

Pairing high wear resistance with flexibility using material tailored specific for the application.

PrimeBlade

containment blade advantages

- Swedish steel
- Excellent performance for all ink types
- Optimized for containment
- Excellent flexibility to avoid back doctoring
- Long lasting
- Sustainable solution

Will not

- clog the ink filters
- deform when heated during the print process
- leave micro particles on the printed surface

Available thicknesses:	0,15 mm	(0,0060")
Straightness:	1,4 mm / 3000 mm	(0,055"/118")

Tensile strength: 1910 N/mm² | Elongation: 3-4% | Hardness: up to 600 HV
