lance
ICT GROUP

FULLSTACK DEVELOPER / QA QUALITY ASSURANCE ENGINEER

LANCEICT-FSD-QA-2023

Lance ICT Group is a software company that strives to create distinctive value for its partners by providing seamless IT solutions, mainly in area of risk and safety management. We are working on a wide range of business platforms applying cutting edge technologies and always try to make the best architecture and code possible. We believe in personal growth and constant improvement of each individual member of our team.

At the moment, we are looking for a new colleague **PART/FULL TIME JUNIOR FULL-STACK DEVELOPER/QA ENGINEER** ready to take on challenges and be a part of our team! This position will be a first step to joining our company and walking into the start of several exciting new projects and has huge potential to grow with our company's success! If you are looking to keep your career growing, interested in working on various projects and make a visible impact in the company, this is the opportunity for you!

RESPONSIBILITIES

- Build efficient, scalable and robust web services and UI components applying agile test-oriented development methodology
- Troubleshoot, test and maintain our products - software applications and websites
- Create and maintain parts of product and project documentation
- Work closely with other engineers in an international team environment
- Contribute in all phases of the software development lifecycle

MUST HAVE SKILLS

- Minimum level of Bachelor degree in Computer Science / Informatics or close to graduate
- Ability to effectively communicate in English (oral and written)
- Any experience in web development
- General knowledge of .NET framework, C# and SQL
- General knowledge of HTML/CSS and VueJS or any similar JS Framework
- Experience with testing of software, especially end to end testing
- General knowledge of MS office package – Word, Excel, PowerPoint
- Strong team player
- Will to follow several internal courses so that you will learn how to perform our processes in your job

DESIRED AND OPTIONAL SKILLS

- Ability to effectively communicate in Dutch (oral and written)
- Experience with test driven/oriented development and automation
- Experience with clean-code principles, DDD, CQRS
- Experience with CI/CD pipelines
- Experience with yaml and Docker
- Knowledge of any versioning system (TFS – Azure DevOps / SVN / GIT etc.)
- Passion for learning, growing and improving
- Experience with scrum agile way of working

WE OFFER IN RETURN

- A part-time job, starting with 3 days a week, that in the future can grow to a full-time
- Competitive salary plan
- 25-37 free days per year (when working full-time)
- Chance to work in international team with cutting edge technologies on the exciting projects
- Modern office in Natalini-Toren in Roermond, with a possibility to work from home
- Free courses and constant growth on professional and personal level with career plan

If you believe that you're fit for the job and would like to join us, please apply by sending us your **CV** and **cover letter** in English or Dutch to support@lanceict.com - subject: **LANCEICT-FSD-QA-2023 + Your Name**.
