

Item no: 0124099

Capacitive Sensor M32 5-wire DC PNP ATEX

Piab control units are fully pneumatic operated with an extremely reliable function. The full pneumatic design also removes any source of ignition from the system and at the same time simplifies the validation process.

- Use together with valve unit for level detector (0124051).
- Stops the conveyor when level in receiving vessel is reached.
- The capacitive sensor is in compliance with ATEX. Dust zone 20/21, gas zone 1.

General

Material	PTFE, EN14305
Temperature	-20 - 90 °C
Weight	440 g

Electrical data

Cable specification	5x 0.34 mm ² L=3m
Current, max.	200 mA
Safety classification	IP67
Voltage	10 - 30 VDC

Dimensional drawings
