- IP50 rated enclosure

About

The Broadweigh wireless usb base station dongle is the smallest in our base station range and offers line of sight range of up to 500m for all Broadweigh shackles or Wind Speed Sensors.

It draws power from the USB bus and therefore no further components are required to configure and control remote devices from a PC. This plug and play USB base station provides a portable solution, with no cables, making it ideal for laptops and tablets that run a full version of Windows.
