Sigma

SPORT

A WINNER UNDER ALL CONDITIONS

Sigma is a universal tip-up seat with high ergonomic and functional qualities proven in both outdoor and indoor facilities across Europe. A wide variety of installation options makes Sigma a great fit even for narrow steps.

Sigma's structure is made of durable corrosion-proof steel, while its backrest and seat are made of polyamide or polypropylene. The seat is weather-resistant, so it can be successfully used in both indoor and outdoor facilities. It can be upgraded by adding backrest and seat pads, upholstered with flame retardant and durable fabric. The fabrics used are flame retardant and durable. Sitting comfort can be further increased by installing wide armrests. The variety of finishing and colour options allow a well-coordinated fit out of the whole facility.

Sigma meets the guidelines and requirements of FIFA, UEFA and national football associations. The seat's quality has been proven across Europe – at football stadiums, multifunctional halls and other public utility facilities.
