<b>Ibania</b> - The closing of the previous week, on 30th April 2015, seen the enacted of the Albanian New Law of the Energy Sector. process that ranks the country in the second post among the rest of the WBs (only Serbia have done it until now) that adopt the hird Energy Package in the electricity sector. A transposition that take particular importance in view of the step back that have seen						Powered by:	Powered by: STRATEGAEAST ENERGY PORTFOLIO MANAGEMENT	
o far the FYR of Macedonia failure to liberalise electricity market in line with binding Energy Community deadline. hen the country gives an important signal, in view also of its guide role as the holder of the Energy Community Presidency for the 015, in the path on the reforms necessary to be followed by the other member of the Energy Community.						STRA ENERGY POL		
deed the importance of the law goes far beyond formal compliance with EU legislation. The law consolidates the reforms taken so r in this sector, which have been neglected by the country for a long period in the past. In last not to forget its constitutes a ecisive step forward on a long path of energy reforms in Albania for which it lays a solid foundation.						Sponsored by	Sponsored by:	
CERC on regard putted itself in availability for any enquire and comments and will turn soon with an extensive presentation and ne address of the main new specific topics of the here low introduced.						K	K keler ccp
