

GC-560 / COATING MACHINE

Rotogravure coating machine for adhesive coating, reverse printing of labels, counterfeit labels, over-laminating, and tape making. Also used for surface coating, such as top coating for HP digital printing, top coating for UV printable ink, color coating including reflective inks, fluorescent inks and matte coating. 6 meters or more drying length, with machine speeds up to 100m/min, Full-Semi Rotary die cutting device and slitting device can be installed on this machine as well.

GC-560	
Max Web Width	560mm
Max Coating Width	540mm
Max Mechanical Speed	100m/min
Max Unwinder dia.	1000mm
Max Rewinder dia.	1000mm
Max waste Matrix dia.	600mm
Max Lamination Unwinder Dia.	600mm
Air Supply	0.4-0.6MPa
Total Motor Power	146.2KW
Dimension	12000 × 2350 × 3800mm

* May vary depending on selected options&configurations

Full-semi Rotary Die Cutting Device And Slitting Device Can Be Installed On This Machine As Well.
