### **THE IFR COMMITTEE INVESTIGATING BREEDING REGULATIONS AND BREEDING SUITABILITY TEST.**

#### **MISSION:**

Before the next MOD in 2020 to:

to establish the existence and content of existing breeding regulations and breed suitability tests.

to advise the Board on the conformity of these regulations and tests to the constitutional conditions for IFR-Membership.

This will be done on the basis of the criteria decided upon by the Meeting in Wohlen dd. 07 – 08 July 2018. Both what concerns the existence and minimal content of tests of social behaviour and breeding regulations and what concerns the existence, format and minimal content of breed suitability tests. This incl. the yes or no compulsory implementation of these regulations and tests for all breeding dogs.

To advice the Board on how to qualify the Member Clubs, more precisely as full members or provisional members (cfr. the IFR Constitution).

#### **The members of the Committe:**

*Carsten Henriksen (Denmark) – chairman*  
*Veronica Nilsson (Sweden)*  
*Frank Beiboer (The Netherlands)*  
*Paul Dieter Viehoff (ADRK)*  
*Dirk Vandecasteele*

#### **Information:**

The IFR Board will on a regular basis be informed on the progress.

The member clubs will be kept up to date and will have the opportunity for input when we have collected the necessary information.

#### **Working method:**

The Committee will itself decide on its manner of internal communication. The meetings will in general be organized over Skype or a similar digital platform.

Each person in the committee get a number of countries to evaluate and will report on his/her findings to the Committee. This report will be written.

The committee will not only be asked to examine and analyse all existing regulations and then to synthesize and report its findings and conclusions but also to ensure itself of the actual implementation of those regulations. For instance by collecting information on litters born in the concerned countries and on the parent-dogs and requesting communication of the written reports of the BST's that these dogs supposedly must have passed. For this, the committee will have all powers to contact Member Clubs and request their cooperation. In case of lack of cooperation, the Committee will ask for the support by the IFR-Board to convince the concerned clubs to cooperate.

On behalf of the IFR Board.
