

# Contingent Risk

Our Contingent Risk insurance is a bespoke solution that provides financial security by offering protection against known litigation risks, providing you with confidence and predictability concerning uncertain litigation outcomes.

Our coverages include certain transaction-related liabilities or standalone legal risks, such as inherited liability issues or litigation outcomes.

- By offering a safety net for potential risks, the insurance can expedite negotiations and deal closure.
- Knowing that potential risks are covered allows businesses to focus on their core objectives without the fear of unexpected setbacks.
- By locking in the value of some or all of a judgment on appeal, you will experience financial predictability.
- By using an insurance-backed judgment to secure traditional recourse financing, you will receive enhanced access to capital.
- Contingent Risk insurance can be customized to suit specific transactional needs and industry requirements.
