

Subsea Equipment

Our Subsea Equipment insurance covers remotely-operated (ROV) and autonomous underwater (AUV) equipment that is owned or operated by specialist contractors within the offshore oil and gas industries, as well as many other types of subsea equipment for the research and leisure sectors, such as offshore hydrogen production, subsea wave generators, machinery for cleaning of drill cuttings, and more.

- Covers equipment during storage, transport, and operation with an all risk form for physical damage
- Broad appetite and innovative solutions within the traditional energy industry and renewable energy growth supporters
- European domiciled clients and worldwide coverage available for equipment
- Additional covers such as collision liability, search and rescue, loss of revenue, removal of debris, continuing hiring charges, and more available
- Up to USD 5M capacity and ability to lead larger programs
