

Cyber

Cyber risk is a critical business risk for companies and organizations of all sizes and across all industries. Our cyber insurance solutions are therefore designed to be relevant for smaller and larger companies, and we have a broad industry appetite.

Our cyber insurance provides access to highly reputed incident response vendors within the fields of IT-forensics, legal, and crisis communications in your region.

In addition to the immediate assistance provided by incident response, our cyber insurance also provides coverage for first party losses, costs and expenses, and third-party liability claims.

We are also proud to be able to offer proactive cyber solutions through our Cyber Risk Management Portal powered by Truesec and other partners, plus our inhouse Cyber Risk Engineering services.

- Offered across all markets, covering SMEs to large international companies
- Up to EUR 25M capacity, frequently deployed on single placements
- In-house cyber risk engineering expertise
