

Samkit Conversion Workbench

Oracle Fusion Cloud ERP migration assistant

The Conversion Workbench migrates data from any legacy systems (like Oracle EBS, PeopleSoft, JDE, SAP, etc.) to the Oracle SaaS application in a fully automated fashion. It significantly simplifies the overall migration process and improves the accuracy of the data. You will just need to customize the pre-built data mappings and data filters and feed the data translation values that fits your data migration strategy.

About

The Workbench will migrate your Master and Transactional data and is fully customizable. This tool automatically extract Data from Oracle EBS, performs Transformation and Validation steps and generates the FBDI/HDL files loads the data into the Oracle Cloud ERP/HCM applications and will help you reconcile the errors much faster. You will also have the flexibility to control the process at every step of the way.

The Conversion Workbench also helps you migrate data from other sources like PeopleSoft, JDE, etc., so that you can take advantage of the Data Translations, Validations etc.

Get ahead

The data migration activities are time consuming and laborious process. Our Workbench let you perform these activities much faster and secure way by incorporating pre-built data mapping, data translations and validations, without having to write any complex code. Conversion Workbench can also extract the historic data from EBS to be loaded into your Data Warehouse, so you can completely retire the EBS application.

Samkit Conversion Workbench

Consistency

The workbench will bring in the much-needed consistency in the data migration process, so that you get predictable results. It will also eliminate the tribal knowledge within the organizations, and brings in skillful knowledge across the project teams.

Your data is secure

The Workbench extracts the data and exports it into your server's file system in an encoded format. Therefore, even if you have to move the file(s) and upload it to the cloud, it is secure. Our application will keep your data in your environments/tenancy.

Versions and Modules Supported

The Conversion Workbench supports EBS 12.x and the latest version of Oracle Cloud ERP application.
