

Soaps

Made using the cold process method these soaps contain natural glycerine from the oils used in the recipe. They are gentle and moisturising. The water content will reduce if the soaps are kept dry, making them harder and longer-lasting.

Beeswax Soap with Lavender and Lime

Beeswax Soap with Honey

These two soaps are made to the same basic recipe using olive oil, coconut oil, palm oil and beeswax. We use organic palm oil from sustainable sources. The coconut oil produces bubbles and the palm oil produces a rich creamy lather.

Ingredients: saponified olive oil, coconut oil, organic palm oil from a sustainable source and beeswax; water. Plus: either (lavender and lime) blue soap colouring; lavender essential oil; lime essential oil and benzoin resinoid; or (honey) honey.

Honey Castile Soap

This soap is made with just olive oil, beeswax and honey. It is hard, with few, thin bubbles. It is very gentle yet cleanses effectively.

Ingredients:
saponified olive oil and beeswax; honey; water.

Lovely honey from the banks of the Mawddach Estuary and the foothills of Cadair Idris.

Beeswax polishes, candles, skin creams and soaps. Handmade in Snowdonia.

Our Beeswax

We use beeswax from our own bees and from beekeepers known to us. It is natural and unrefined. We melt it and strain it to clean it but it will still contain lots of lovely 'contaminants' such as propolis and flecks of pollen. Some of these will be visible in the finished product. As a natural product, each batch of beeswax is different and so there will be slight differences in each batch of skin creams that we make.

Trees and Bees

Beeswax & Honey Skin Care Handmade in Snowdonia

Beeswax softens, protects and heals.
Honey is packed with antioxidants.
They have been used in skin preparations for centuries.

We are beekeepers living in Arthog, near Dolgellau, in a lovely part of South Snowdonia where Cader Idris sweeps down to the Mawddach Estuary.

Paul and Pauline Aslin, Erw Goed, Arthog LL39 1YR.

Repair and Protect

- Gardeners' Lavender Hand Cream 100g jar
- Beeswax Foot Cream with Peppermint 100g jar
- Beeswax Repair Cream for Hands and Feet 100g tin

These three creams are made to the same recipe but with different essential oils: peppermint for tired feet; lavender for hard working hands; lime, lavender and tea tree for extra healing.

Ingredients: vegetable glycerine; sweet almond oil; coconut oil; beeswax and essential oils.

Thick protective creams. You don't need much.

Moisturise

- Beeswax Moisturiser 50g jar
- Honey Hand Cream 50g jar

These two creams are made to the same basic cold cream recipe. The Honey Hand Cream contains honey and no added scent or essential oils. The Beeswax Moisturiser contains a delicate blend of lavender, mandarin, rose geranium and sandalwood essential oils and no honey. They both contain water so need a preservative.

Ingredients: sweet almond oil; water; beeswax; preservative. And either honey or essential oils.

These creams are more than 50% oil and wax. A little goes a long way.

Soothing Balms

- Honey Bee Balm 50g jar or 100g tin

Simple yet effective. Soothes irritation, helps to heal broken skin. Protects and nourishes skin, softens and conditions hair and beards.

No added scent or essential oils. Perfect for sensitive skin. To apply, melt a pea-sized piece between palms and rub in.

Ingredients:

sweet almond oil; beeswax; cocoa butter; honey.

- Beeswax Lip Balm 10g pot

The best way to care for your lips. Soothes, heals and protects. Good for broken cuticles and insect bites too.

Ingredients: sweet almond oil; beeswax; cocoa butter.
