Payment:

Danske Bank konto: 1551-6003451

Or by MobilePay: 58105

Note:

Members Only

SUMMER EVENT AT RAADVAD INN

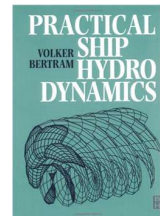

Come and hear Professor Dr Volker Bertram talk about AI: Demystifying Artificial Intelligence

AI is also on the agenda for shipping, but do we know what it really is? Volker will give us a cheerful insight into AI.

AI has long been on the agenda, but the development over the last few years has been great and AI will undoubtedly have a greater impact on both our professional jobs and private lives.

Come and hear Volker try to demystify AI in a lighthearted way. And come and meet the Board and the members for a lovely evening at Raadvad Kro, where we will taste what the new owners can offer.

Professor Dr. Volker Bertram has written a myriad of papers and books on hydrodynamics, ship design, vessel performance and much more. Volker is also co-founder of HullPIC, which is based on ISO 19030, (Ships and marine technology — Measurement of changes in hull and propeller performance) and organizer of annual meetings. Come and have an interesting talk with Volker about both AI and vessel performance.

Dinner

After the lecture, we offer a buffet at the inn and hope for many good talks - and maybe take up the topic of AI.

Programme:

1. 17.30-18.15 Welcome and drinks
2. 18.15-19.15 Foredrag "Demystifying Artificial Intelligence"
3. 19.15-approx. 22.00 Afternoon

Best regards
Søfartsteknisk Forening
