By calendar call-in from the Secretary.

The arrangement is **closed** and for members only.

The language will be in English.

NEW GLOBAL REALITY FOR DANISH SHIPPING

Geopolitical Challenges and Practical Responses

The geopolitical landscape is changing at an unprecedented pace.

Increasingly, global developments have a direct impact on Danish shipping, reshaping the environment in which *Det Blå Danmark* operates.

To provide insight into both the political and practical challenges facing the maritime industry in this evolving global environment, we are pleased to welcome two highly distinguished speakers on,

2. December.

Lars Findsen, former Director of the Danish Defence Intelligence Service, brings more than two decades of experience from the highest levels of the Danish public administration. He will share his perspectives on current geopolitical developments from a Danish shipping perspective and discuss what the industry can expect in the years ahead. His presentation will address both the broader threat landscape and the possible contours of a "new normal" for global trade and maritime operations.

Daniel Giordano, Head of Global Threat Intelligence at A.P. Moller - Maersk, will provide a practical industry perspective. Drawing on many years of experience in intelligence work, including with the FBI, he will explain how Maersk uses intelligence gathering and threat assessment proactively to protect its people, assets, and business operations. His presentation will be framed within the broader geopolitical context outlined by Lars Findsen.

Following the presentations, there will be an opportunity for networking and discussion. As always, sandwiches and refreshments will be served.

We look forward to welcoming you to what promises to be a highly relevant and thought-provoking event.

Best regards,
Søfartsteknisk Forening
