

Microsoft Ignite

The Windows 10 tips you wish you knew last week: Mobile worker edition

Alexander Solaat Rødland
Senior Consultant
Solaat.no

What's in it for *me*?

This session will give you

- Built-in tools to consider
- A new way of thinking mobility
- Reflect on your existing structure

The case

- Five different continents (and 80 vessels)
 - Multiple time zones
 - Multiple cultures
 - Three formal languages

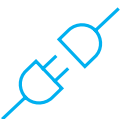

Rethinking mobility

The primary strategy

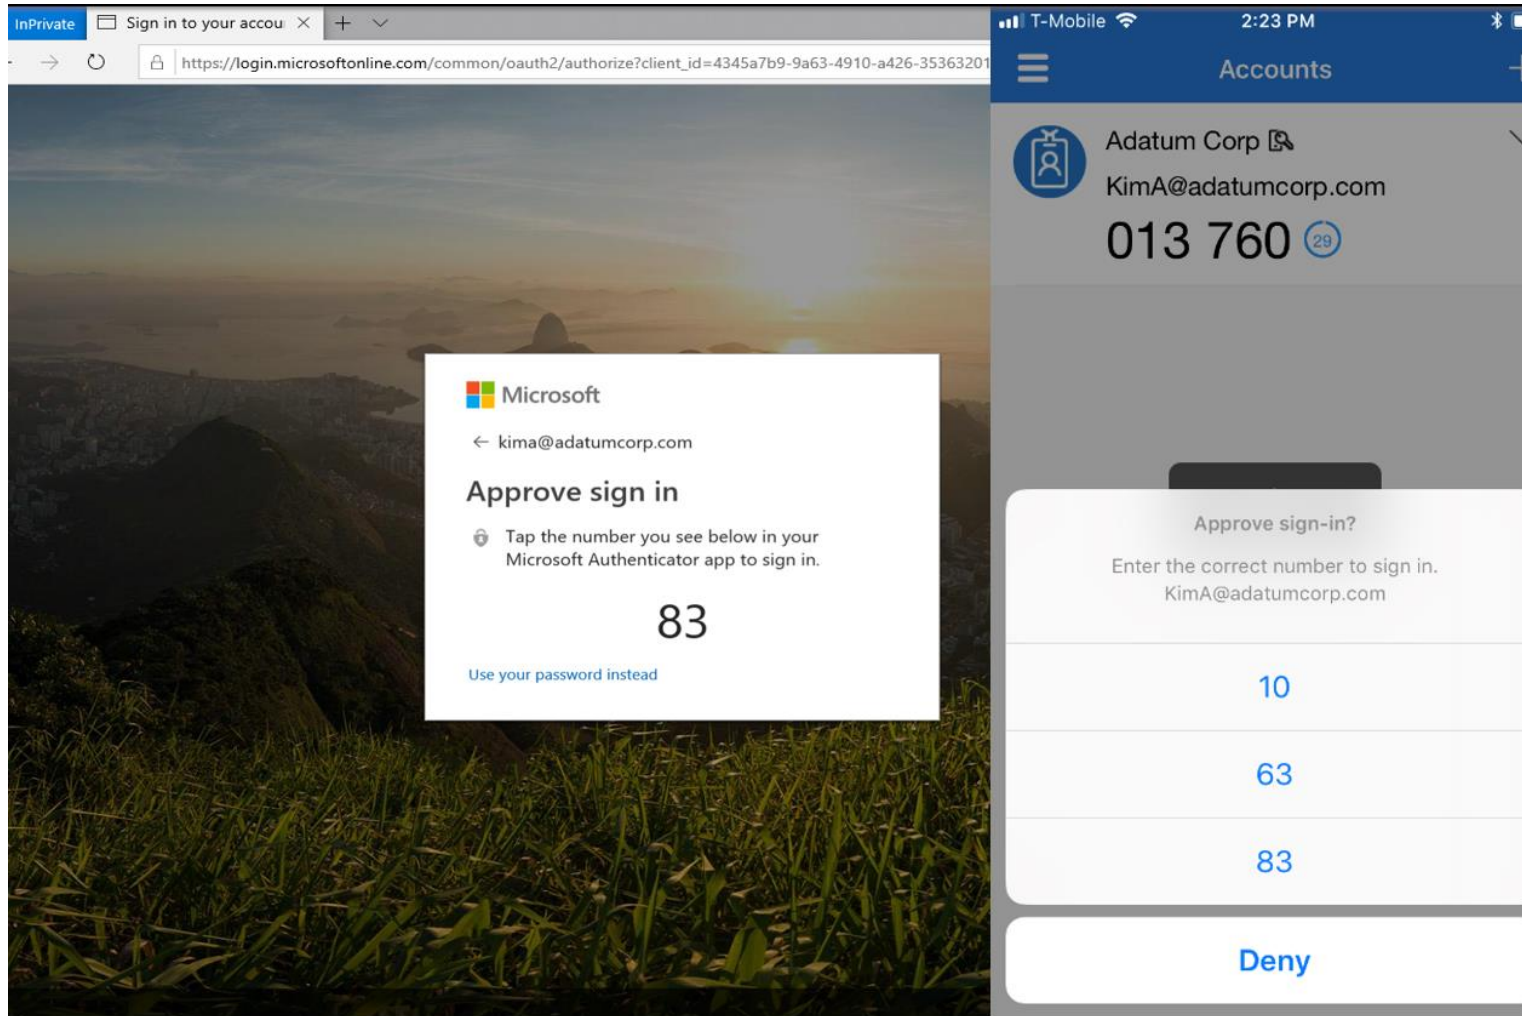

- AAD replaced AD
- Intune & AutoPilot replaced SCCM
- OneDrive for Business replaced network shared home-folder
- Teams replaced (some) of the shared folders
- New remote support features

Mobile security with MFA and Windows Hello

Passwordless sign-in

- User friendly
- Secure
- ...preview

Configure Authenticator app

Additional security verification App Passwords

When you sign in with your password, you are also required to respond from a registered device. This makes it harder for a hacker to sign in with just a stolen password.
View video to know how to secure your account

what's your preferred option?

- Call my authentication phone
- Text code to my authentication phone
- Call my office phone
- Notify me through app
- Use verification code from app

how would you like to respond?

Set up one or more of these options. [Learn more](#)

<input checked="" type="checkbox"/> Authentication phone	Norway (+47)	
<input type="checkbox"/> Office phone	Norway (+47)	Extension
<input type="checkbox"/> Alternate authentication phone	Select your country or region	
<input checked="" type="checkbox"/> Authenticator app	Configure	Mobile app has been configured.

restore multi-factor authentication on previously trusted devices

[Restore](#)

Configure mobile app

Complete the following steps to configure your mobile app.

1. Install the Microsoft authenticator app for [Windows Phone](#), [Android](#) or [iOS](#).
2. In the app, add an account and choose "Work or school account".
3. Scan the image below.

[Configure app without notifications](#)

If you are unable to scan the image, enter the following information in your app.

Code:

Url: <https://bn1pfpad08.phonefactor.net/pad/743524874>

If the app displays a six-digit code, choose "Next".

Demo

Windows Hello (for business)

It's (all) about the mobile user experience

powercfg /energy

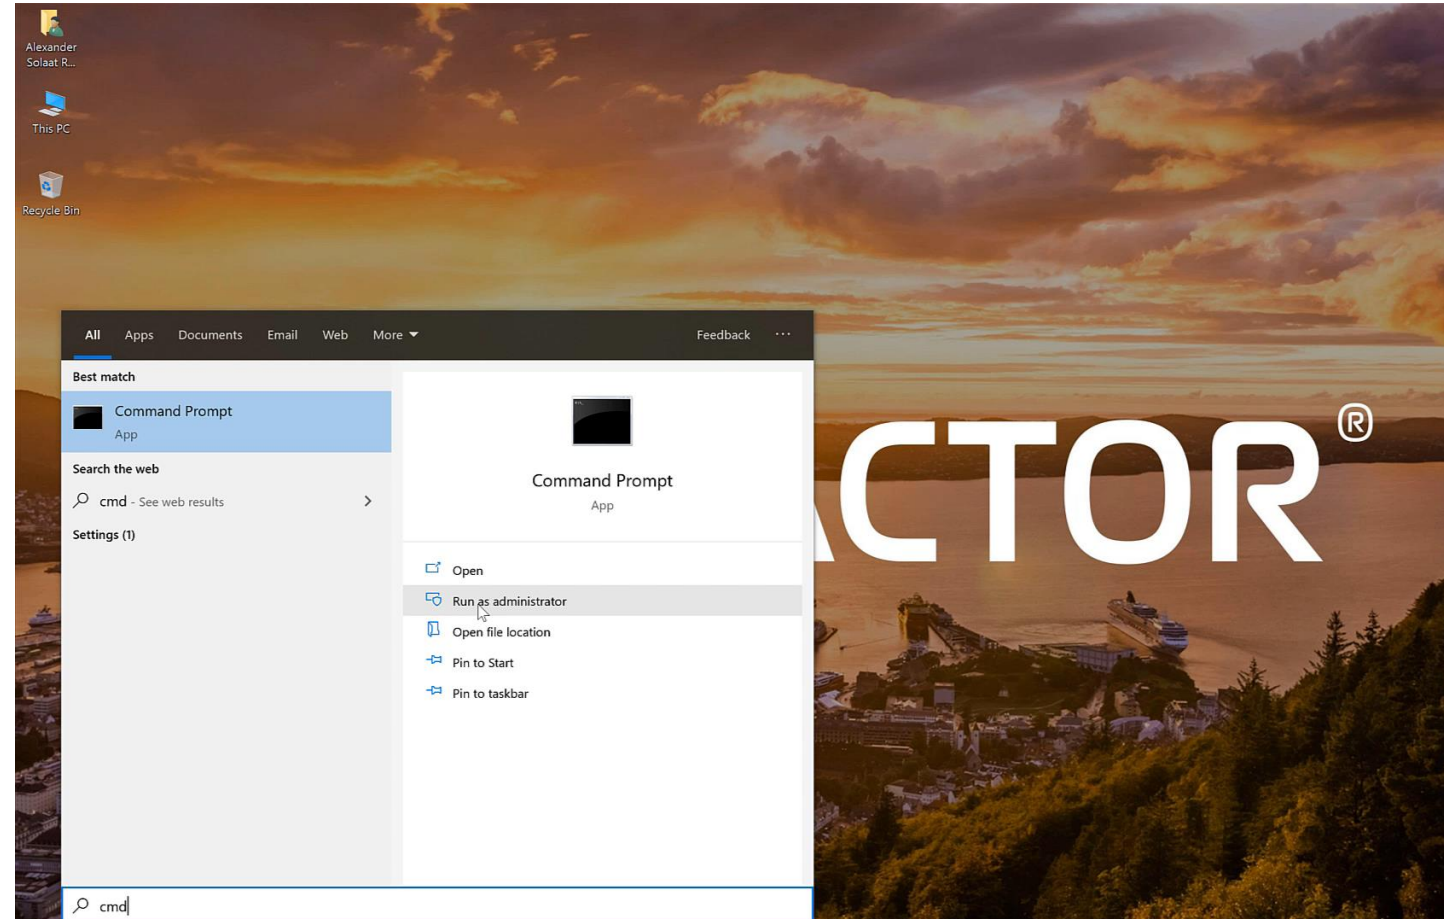

powercfg /batteryreport

powercfg /sleepstudy

Demo

Powerconfiguration

Recorded Steps

This file contains all the steps and information that was recorded to help you describe the recorded steps to others. Before sharing this file, you should verify the following:

- The steps below accurately describe the recording.
- There is no information below or on any screenshots that you do not want others to see.

Passwords or any other text you typed were not recorded, except for function and shortcut keys that you used.

You can do the following:

- [Review the recorded steps](#)
 - [Review the recorded steps as a slide show](#)
 - [Review the additional details](#)
-

Lessons learned

AutoPilot **vs** Traditional Deployment

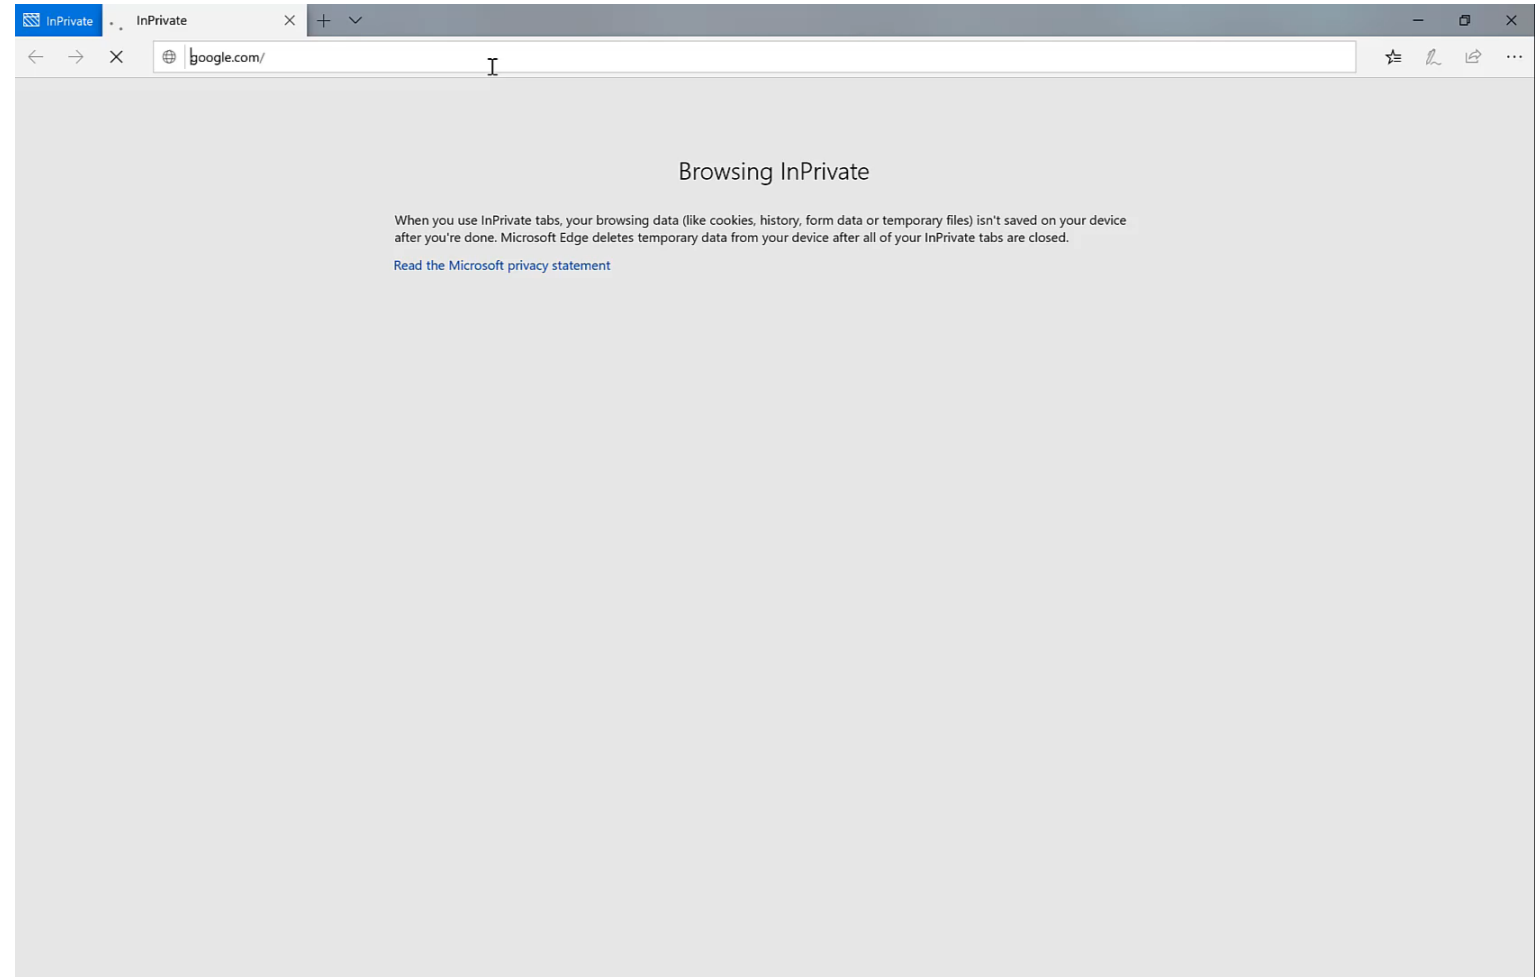

Quick Assist **vs** Third-parties

PSR **vs** hands-on troubleshooting

Windows Hello (for business) **vs** 90-day password reset
