

[knogler og muskler]

OBS. Ikke en klassisk anatomisk inddeling

Hoved og hals

Rygsøjlen

Skulderbæltet

Overarm og underarm

Hånden

Brystkassen

Hofte, sæde og bækken

Lår og knæ

Underben

Fod

[anatomisk nomenklatur]

Anterior = fremad

Posterior = bagud/mod ryggen

Ekstern = ydre

Intern = indre

Medial = mod midten

Lateral = mod siden (væk fra midten)

Proksimal = mod udspringet

Distal = væk fra udspringet

[anatomisk nomenklatur]

Dexter = dx = højre

Sinister = sx = venstre

Fleksion = fremad

Ekstension = bagud

Adduktion = ind mod kroppen

Abduktion = væk fra kroppen

Supination = rotation af håndfladen fremefter

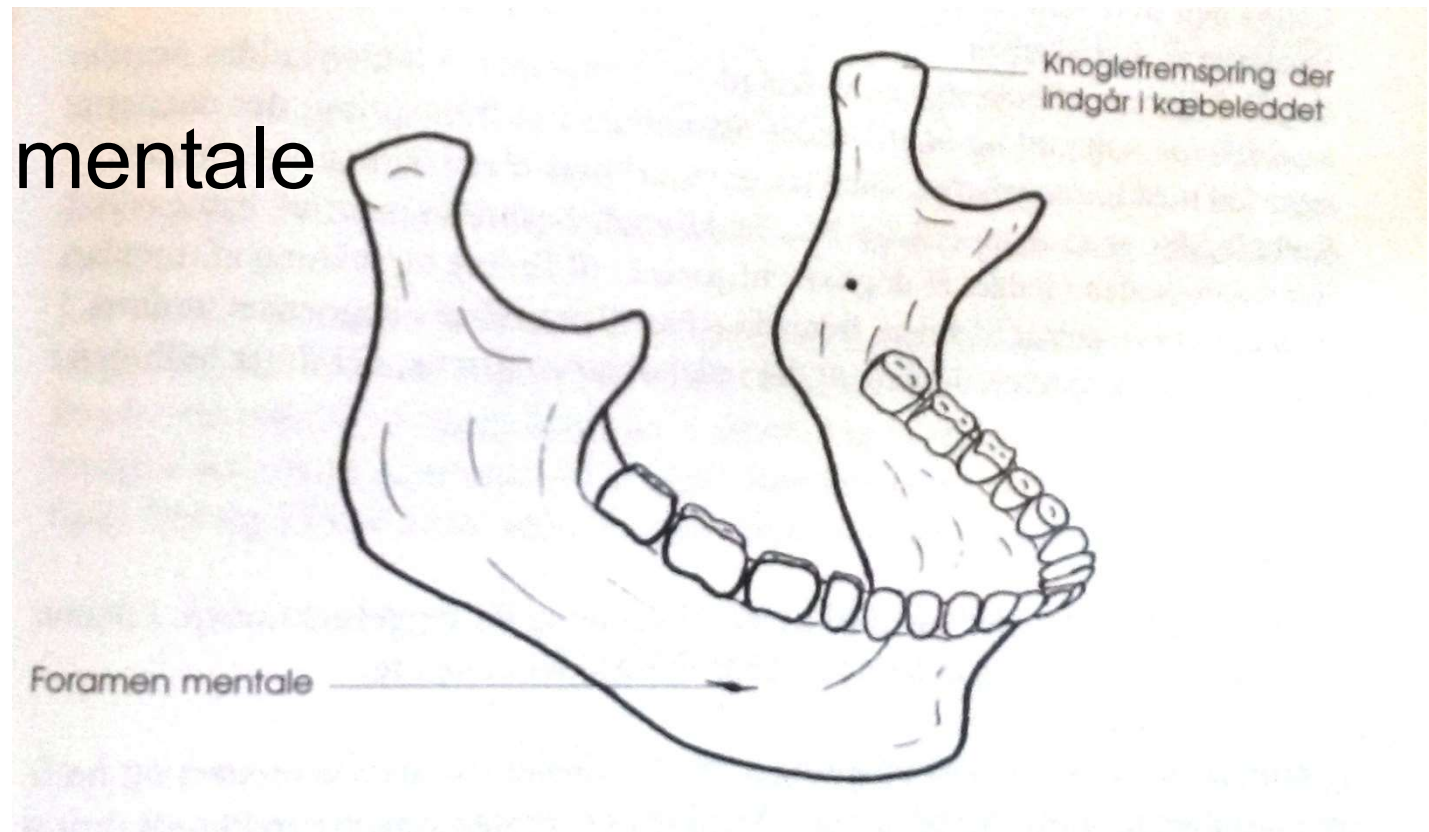

Pronation = rotation af håndfladen bagud

[kæben]

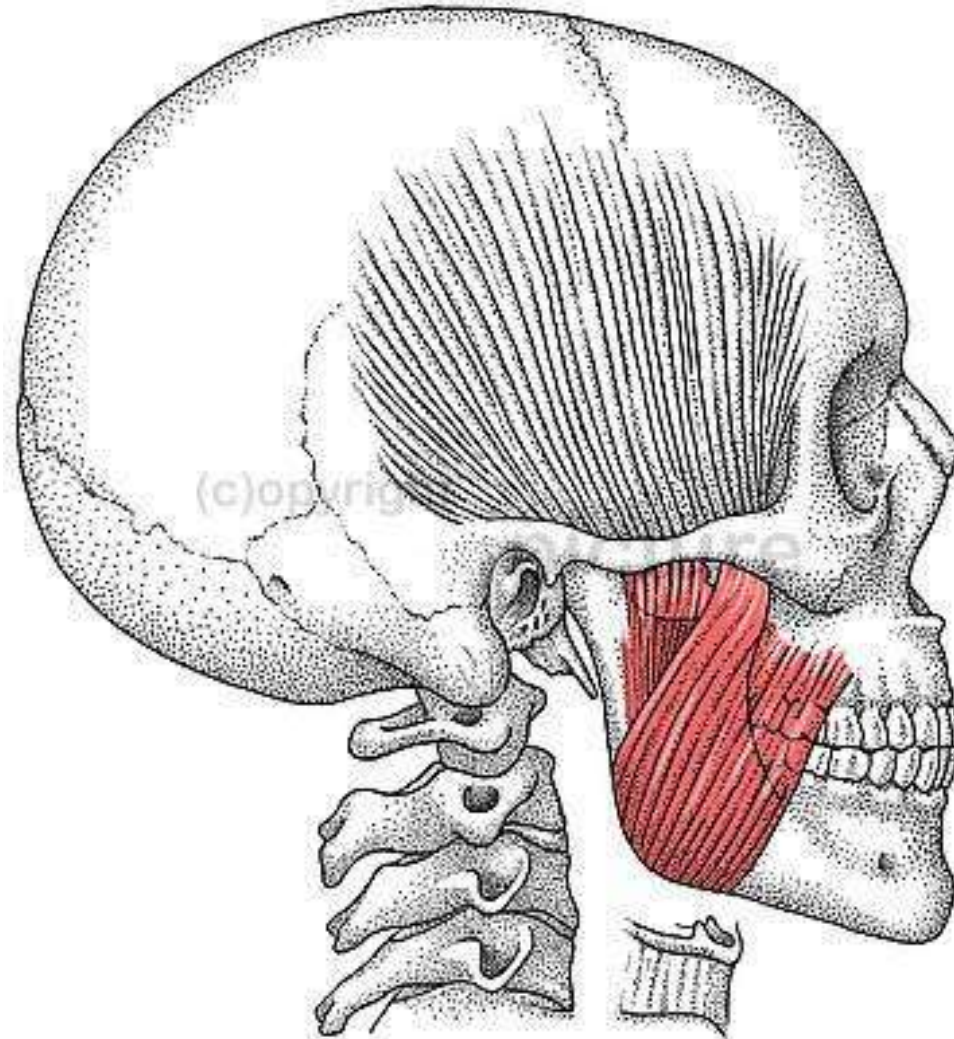

Ægte led med discus

Sutur

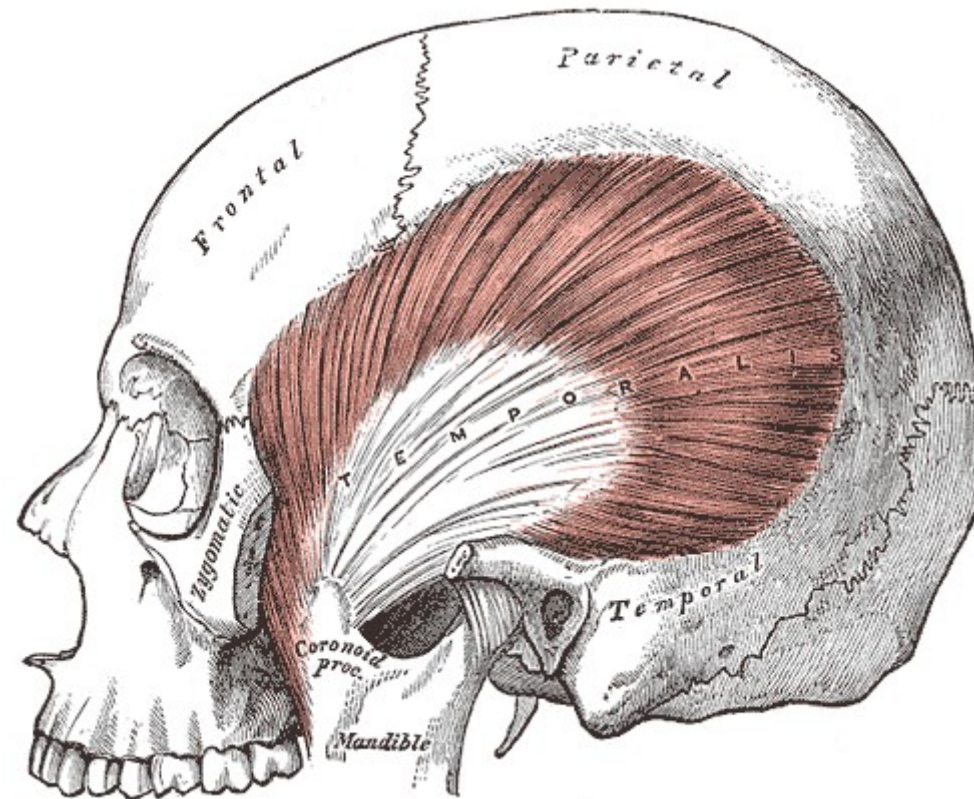

Forarmen mentale

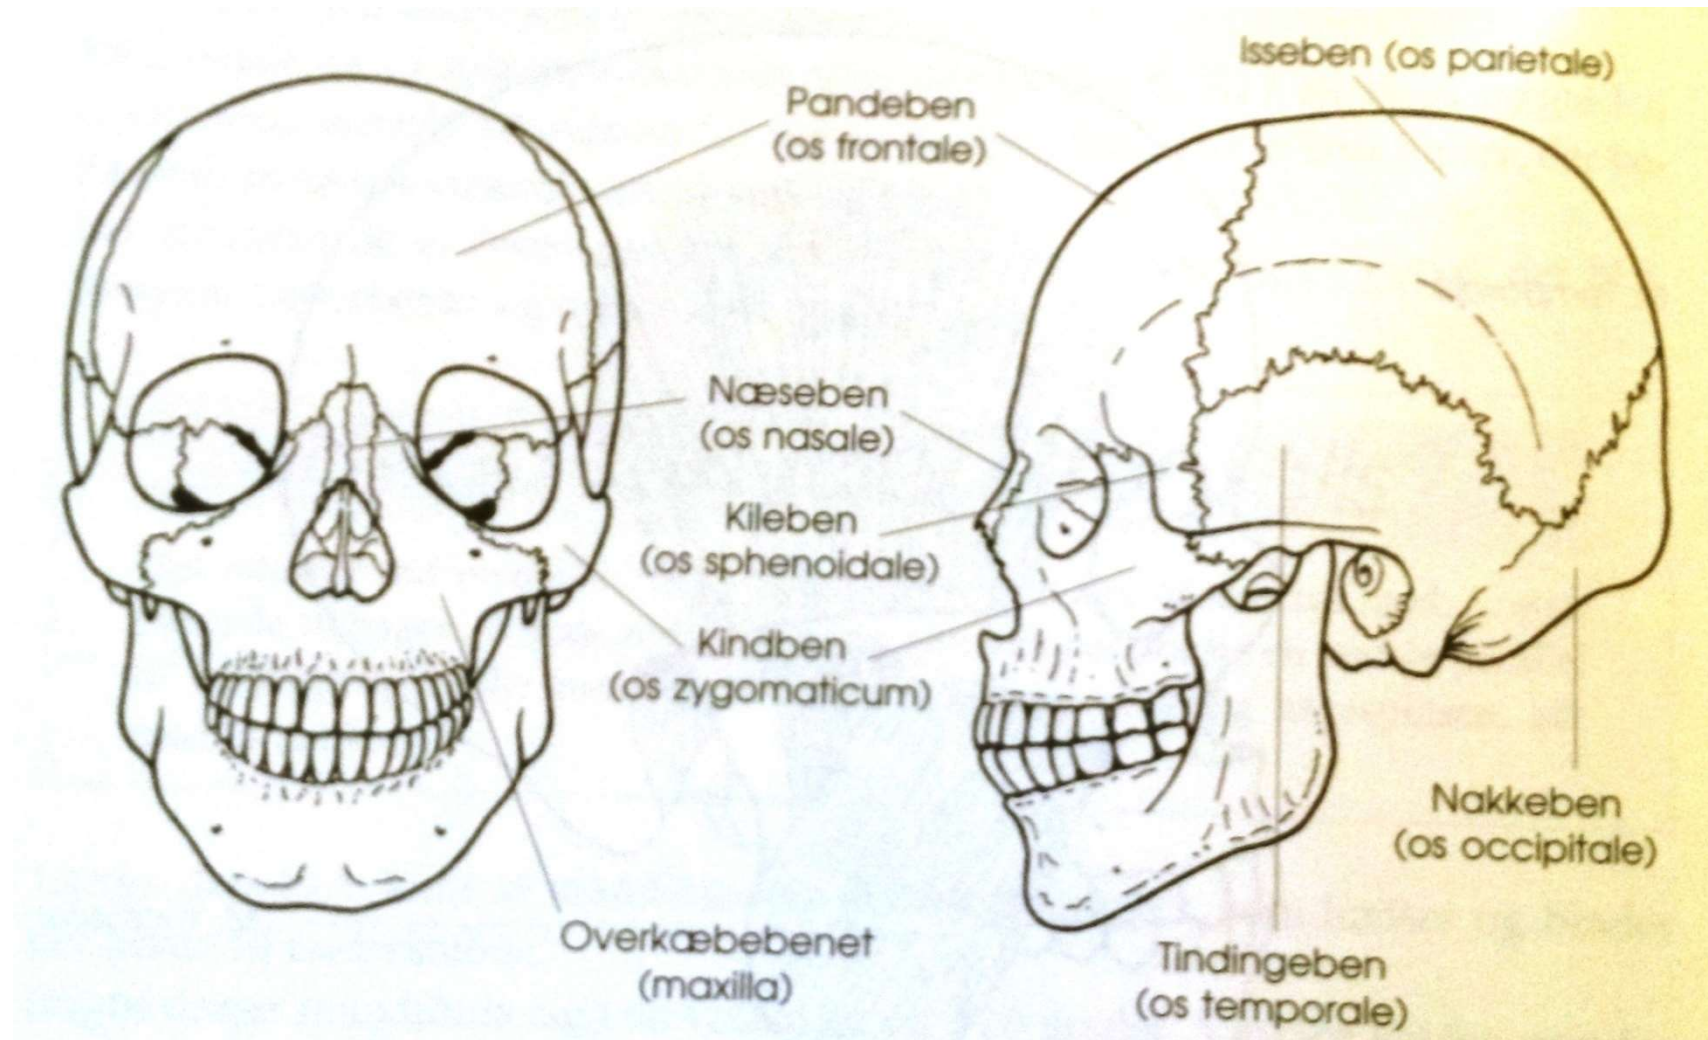

[musculus masseter]

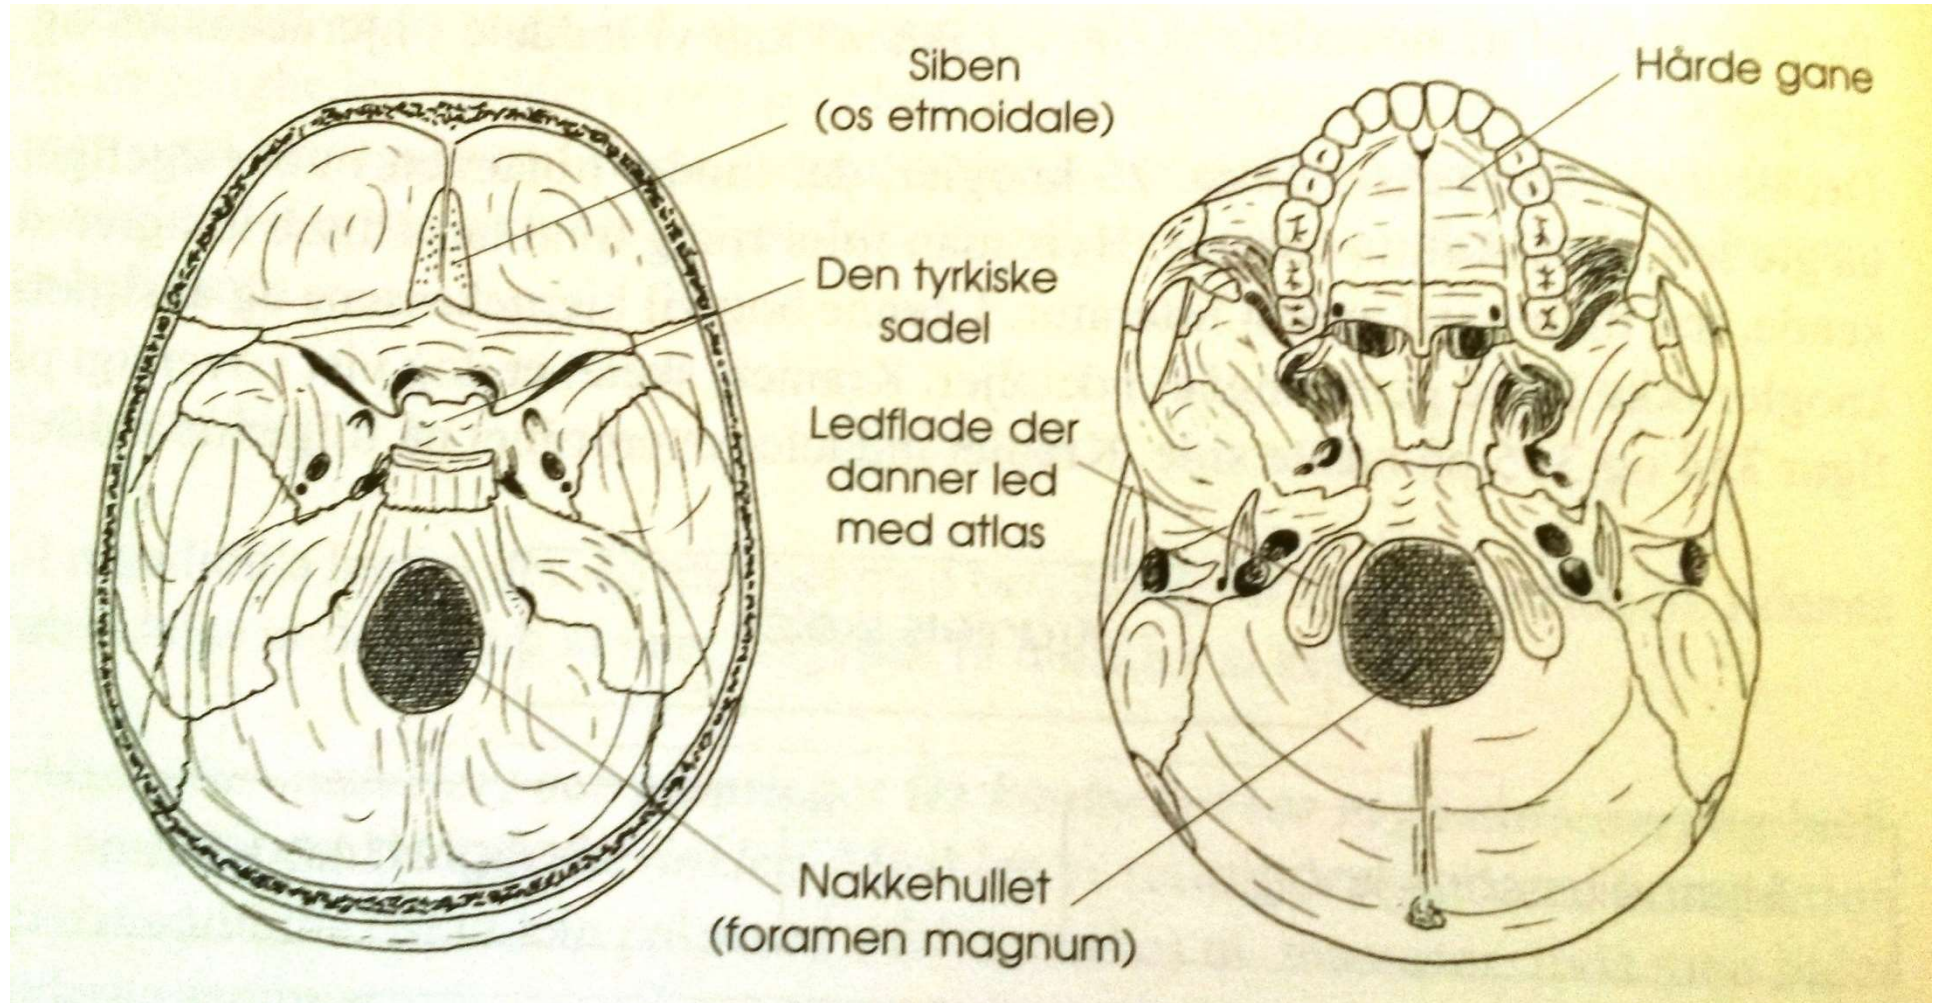

[musculus temporalis]
