

Sportchansen is a relatively new sports concept where you get to try out 7 different sports in a mini-format.

Football
Hockey
Golf
Basketball
Tennis
Handball
Floorball

The concept is based on the experiences we have from previous production and deliveries of Mini Football Golf and Willes Floorball Golf. In addition, we have also made two trial deliveries of

the new concept with positive results. Now we are ready to launch the concept on a larger scale! We have made several deliveries in Sweden and are ready för exports.

Sportchansen

IDÉ

To try out 7 different sports in a mini-format, in an environment as realistic as possible.

The courses are professionally designed and, as far as possible, manufactured in a carpentry factory in Western Sweden and in a mechanical workshop.

One of our partners is Sandra Carlborg, a world champion in long driving in golf, residing in Alingsås, the city of cafés and light.

We also have the support of 7 different associations, which validate the quality and core values behind the concept:

SPORTS FOR EVERYONE! MAKING SPORTS EASIER THAN EVER!

DEVELOPMENT

From the beginning, we collaborated with students at Jönköping University of Technology. The concept was then developed through empirical testing and trial deliveries to the City of Helsingborg and Nässjö Municipality. In the next phase, we added a seventh sport: golf, to complement the other six. Here is a picture from the testing phase during the development of the golf courses. Sandra and our product designer, Robert Maksinen, have put in a genuine effort:

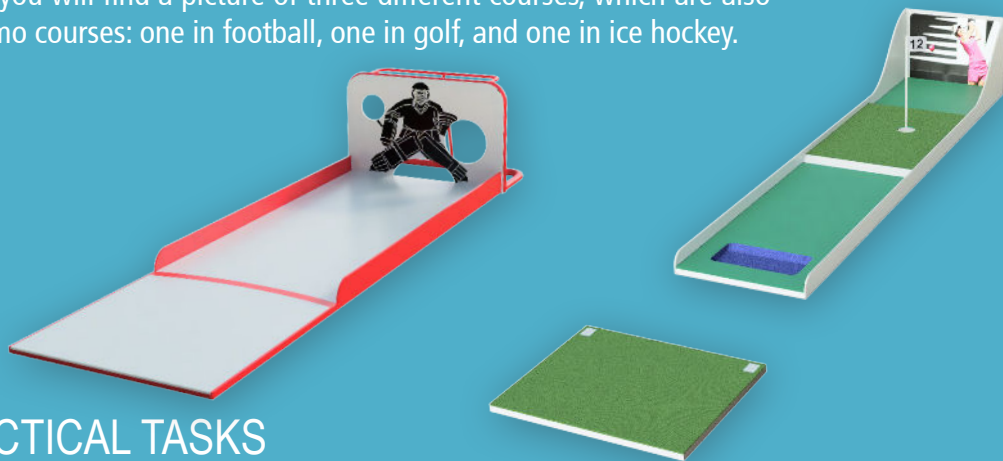

Sportchansen

In each discipline, there are three alternative courses.

In total, we can deliver 21 courses! Each course has three levels of difficulty, making it possible for everyone to play. This also provides an incentive to return and challenge both yourself... and others.

Below, you will find a picture of three different courses, which are also our demo courses: one in football, one in golf, and one in ice hockey.

PRACTICAL TASKS

The courses are mobile and can be used both in sports halls and other indoor venues, as well as outdoors on grass and asphalt surfaces. They can also be permanently mounted, if desired. The material is compact and extremely weather-resistant. A one-year warranty is provided. The deliveries include 4 sets of clubs and balls – also carefully tested for the purpose. Since we have the manufacturing nearby, we have moved away from standard solutions and also produce goalposts, which are specifically designed for the concept, in accordance with Swedish International Standard (SIS)

Our standard delivery consists of 14 courses, two in each discipline. Such a facility requires no more than 500 m². All deliveries are shipped from our location in Alingsås and set up by a team from here. We can also deliver individual courses. Please request a quote.

Sportchansen

Environment and Surroundings

New sports and recreational facilities, including padel, are extremely capital-intensive. The interest and need for movement and joy are greater than ever. All research supports this, as strongly emphasized by initiatives like Generation Pepp. In this way, we also want to contribute to providing young people in so-called disadvantaged areas with an opportunity for a pleasant and integrated activity. Our facilities are priced at a reasonable level for various users, including in terms of cost. Feel free to compare with other investments.

Target Groups

- Municipalities – for both leisure and schools
- Tourist destinations
- Event companies
- Hotels and conference venues
- Pools
- Campgrounds
- Mals – or in connection with them
- Other sports facilities, multisport centers
- Residential companies – as a well-being factor for residents and visitors
