

Color Certificate

DECLARATION OF CONFORMITY

Our Swiss Color® microblading pigments meet the requirements of ResAP (2008)1, the ruling of 21/12/2012 and the new pharmaceutical regulation from 04/2013 concerning nickel. Furthermore, every pigment raw material is tested on possible contamination by independent accredited laboratories. We guarantee that all our Swiss Color® MB pigments are made of high-purity raw materials, are run through production processes like mixed under vacuum and sterilized with gamma rays. Our Swiss Color® MB pigments do not contain any preservatives to avoid allergies. We only use pigments whose raw material quality is guaranteed on ResAP (2008)1.

Swiss Color® MB pigments don't contain: iron oxides, dangerous Azo dyes, polycyclic aromatic hydrocarbons = PAH, forbidden heavy metals, dangerous aromatic amines including NDELA = N-nitrosodiethanolamine.
