**HAROL**

# Why choose an outdoor living solution?

---

**Harol brings you exceptional enjoyment,  
both indoors and out.**

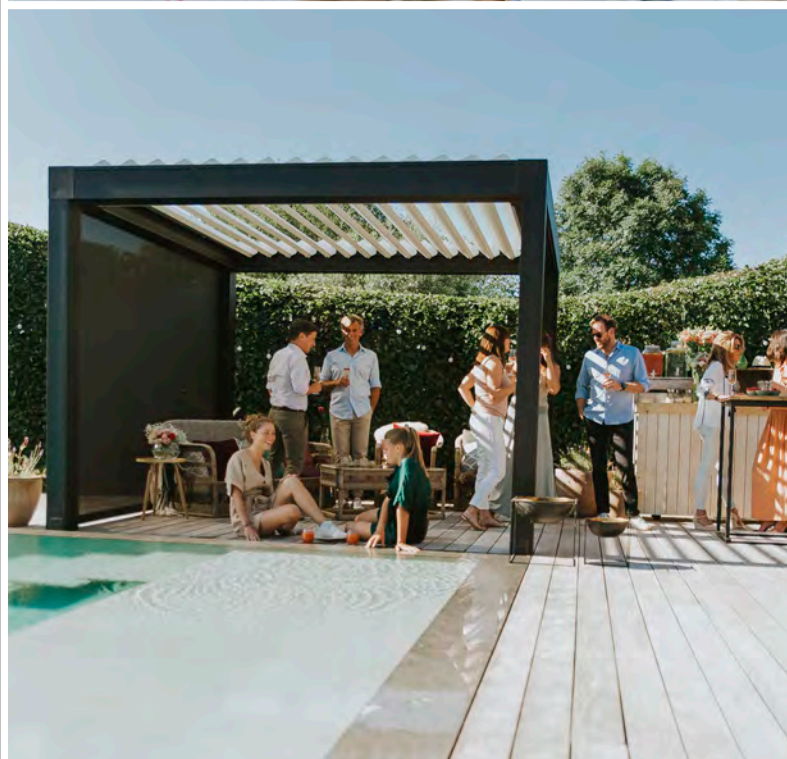

"A traditional style, or something more modern? Our solutions are outstandingly versatile, and adapt perfectly to your family, architectural style and type of construction. Always with the focus on design and detail. What's more, our products easily meet all the increasingly stringent requirements regarding comfort, safety and energy efficiency.

We have been building on our experience for three generations, and it shows. Harol is not only a reliable name, but also a real trendsetter. We are continuously innovating and perfecting. Because the only way we can succeed in our mission is by ensuring you can enjoy a made-to-measure solution that offers you everything! Only the best is good enough."

**Annick Draelants**  
CEO HAROL

---

# Smarter. Simpler. Sustainable.

## **Ease & excellence**

An outdoor living solution operated by an app, or with all-round LED lighting? At Harol, we like to make your life easy.

Beauty and comfort at the press of a button. The exceptional quality? It's the result of over 70 years' knowledge and experience.

## **Cool & healthy**

Harol outdoor living solutions offer carefree outdoor living enjoyment. However, these outdoor living space concepts not only keep you cool while you're on your terrace or in the garden, but even in your home. Furthermore, they provide excellent protection against harmful UV rays, both for you and your home's interior.

## **Mix & match**

The Harol outdoor living space concepts are available to you as 3 tasteful collections, each of which offers a host of options that you can combine to your heart's content. Quality, ease of use and ease of maintenance come as standard.

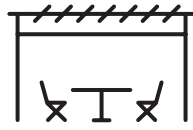

## Green & sustainable

Choosing Harol's outdoor living space concepts is a conscious decision to choose sustainability, as these outdoor living solutions enable you to create a comfortable climate indoors without expensive and power-hungry air conditioning.

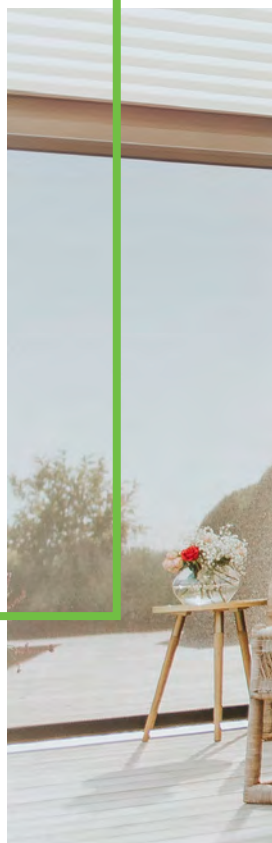

## Extra living space

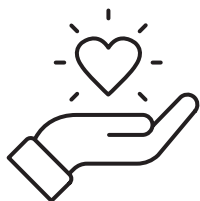

Do you want an extension to your house or apartment where you can relax and unwind? Then you should definitely opt for one of our high-quality outdoor living space concepts, which are guaranteed to give you that authentic *'holiday at home'* feeling.

Do you also want to make **the most** of your garden or terrace **all year round**? And to be sheltered from the wind and rain? While also protecting your garden furniture? Our outdoor living solutions make all this possible, so you can relax. The **different options** such as screens, glass sliding walls, heating, LED lighting, ... allow you to enjoy your terrace or garden, even when the weather is dull.

Harol has something for everyone: from slatted roofs to pergolas. You choose **the solution that best matches your requirements**. Whatever you choose, it will always be a **smart and sustainable investment** that will bring you many years of enjoyment!

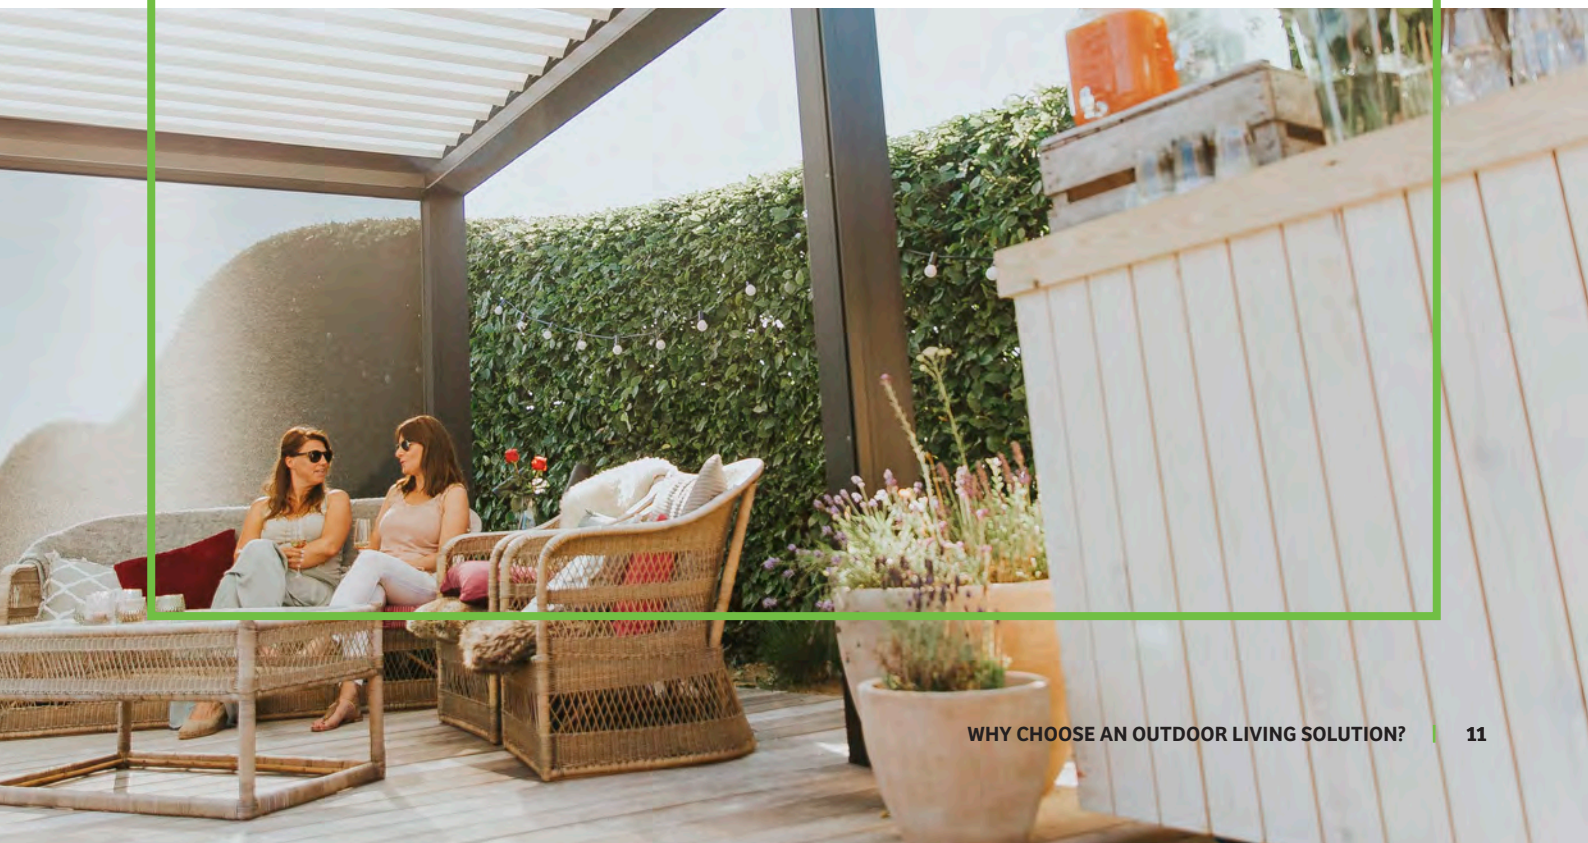

# Healthy and sustainable

Daylight and fresh air are indispensable for our mental and physical health. Relaxing in the healthy open air is not only pleasant, it is also beneficial. Our outdoor living space concepts allow you to extend your enjoyment of healthy outdoor air. And there is more...

Every outdoor living solution that is installed outside a window keeps out the heat. This allows you to enjoy a **pleasant indoor climate**, and reduces the need for energy sources such as air conditioning systems. At the same time, our outdoor living solutions allow sunlight in whenever you want, for a **natural way to warm your home**.

Add to that the fact that the energy consumption for operating an outdoor living solution is extremely low. These **sustainable outdoor living space concepts** will give you substantial **savings on your energy bill**.

# SLATTED ROOF COLLECTION

# Vision

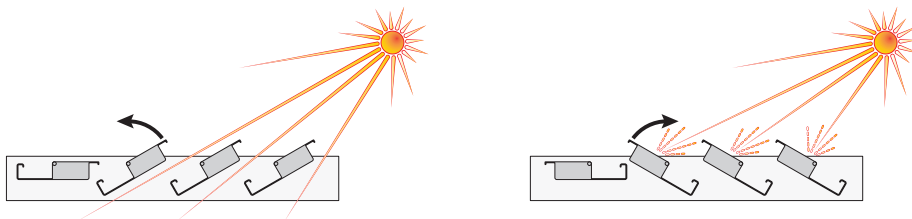

## Transform your terrace

Vision is a sophisticated slatted roof. The refined aluminium construction and extruded aluminium slats will transform any terrace into a heavenly outdoor living space. The remote control is used to position the slats just the way you want them. Do you want a self-supporting structure, or have it built against the outside wall of the house? Why not! This modular structure can be infinitely extended in both length and width.

The many options, such as surface-mounted screens, glass sliding walls and LED lighting, all make the Vision slatted roof a fun and cosy place to be. With the different sensors that automatically adjust the position of the slatted roof, you can now rest easy. What's more, your terrace and garden furniture will stay dry, thanks to the integrated gutters!

As far as sunlight penetration is concerned, you decide whether you want direct or indirect sunlight by simply tilting the slats.

### Unique properties

- Excellent water drainage, as the gutter profiles drain any surplus water via the vertical posts. This means less risk of water infiltration, even when the slats are tilted.
- Extremely wind resistant: up to 9 on the Beaufort scale (90km/h) with a closed slatted roof.
- Slimline vertical posts.
- The tilting slats offer a choice of direct or indirect sunlight.
- Made to measure down to the last centimetre, and a perfect match with your home.
- Available in 8 standard colours at no additional cost.

### Options

- All RAL colours, and an extensive range of textured coatings.
- Sliding glass walls.
- Surface-mounted screens.
- Dimmable LED lighting (white or RGB).
- Dimmable LED spotlights.
- Heating.
- Sensors (sun, rain, temperature and wind sensor).

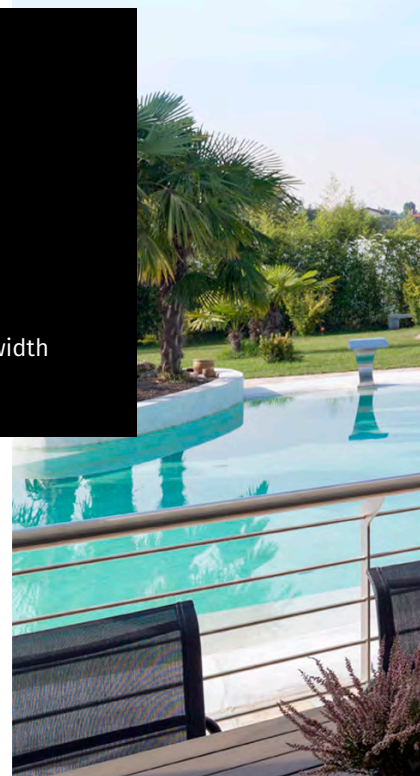

### Did you know that...

Vision, and by extension all slatted roofs, are also suitable as carports? They protect your vehicle from wind and create an extra covered space that is completely in keeping with the style of your home.

### A SHADED AREA

- Maximum width: 5,5 m
- Maximum depth: 6.9 m
- Maximum height: 2.7 m
- Maximum span of 1 module: 34.5 m<sup>2</sup>
- Can be coupled in both width and depth

# HAROL

①

## **Built-on**

Built on to the house, creating extra covered living space.

## **Multi-part coupling**

Opera slatted roof can be coupled in both length and depth.

## **(1) Built-in screens**

Wind-resistant screens are perfectly concealed in the vertical posts.

## **(2) Free-standing**

If required, Opera can be built as a free-standing structure.

②

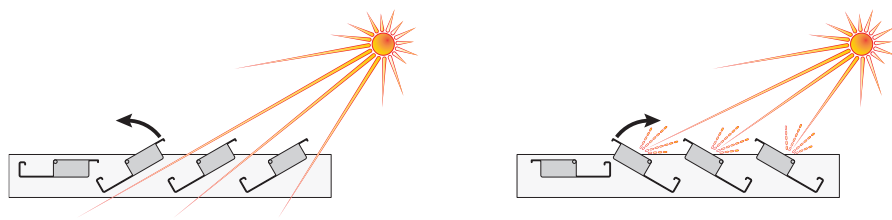

# Opera

## Comfort and atmosphere

Opera has fixed, tilting slats and exudes luxury and refinement. There are also plenty of options for creating even greater comfort and atmosphere in your luxurious 'outdoor living space', such as built-in sliding glass walls, dimmable LED lighting, heating and built-in screens. These built-in screens are entirely concealed in the vertical posts.

In the same way as the Vision slatted roof, Opera can be built onto the house. Alternatively, it can stand independently on its four vertical posts. By tilting the slats, you decide how much light can enter the outdoor living space.

### Unique properties

- Wind-resistant screens are completely concealed in the vertical posts.
- Excellent water drainage, as the integrated gutter profiles drain any surplus water via the vertical posts. This means less risk of water infiltration, even when the slats are tilted.
- Extremely wind resistant: up to 9 on the Beaufort scale (90km/h) with a closed slatted roof (depending on the size).
- The tilting slats offer a choice of direct or indirect sunlight.
- Made to measure down to the last centimetre, and a perfect match with your home.
- Available in 8 standard colours at no additional cost.

## Options

- All RAL colours, and an extensive range of textured coatings.
- Sliding glass walls.
- Dimmable LED lighting (white or RGB).
- Dimmable LED spotlights.
- Wind-resistant screens.
- Heating.
- Screens.
- Sensors (sun, rain, temperature and wind sensor).

## A SHADED AREA

- Maximum width: 5,5 m
- Maximum depth: 7 m
- Maximum height: 3 m
- Maximum span of 1 module: 35 m<sup>2</sup>
- Can be coupled in both width and depth

# Brera

## Open the roof all the way

Brera is unique in its class because its roof can slide completely open. This will allow in as much light as possible. Moreover, the folded slats do not block visibility in any way, and in winter, if required, you can let in all the sunlight you want.

Would you prefer more shade? As the roof closes, the slats tilt and filter the sunlight, ensuring optimal air circulation.

This outdoor living space can be fitted with glass sliding walls, screens, dimmable LED lighting and heating, so you're able to enjoy your patio for longer. Also, there are sensors which automatically adjust the position of the slatted roof.

### Unique properties

- Excellent water drainage, as the gutter profiles drain any surplus water via the vertical posts. This means less risk of water infiltration, even when the slats are tilted.
- Extremely wind-resistant: up to 9 on the Beaufort scale (90km/h) with a closed slatted roof (depending on the size).
- The sleek, flat design of the slatted roof is best appreciated when it is fully closed. The slatted roof can also be free-standing, floating or fitted with an overhang.
- Made to measure, and a perfect match with your home.
- Available in 8 standard colours at no additional cost.
- It has an IO control which can be connected to the IO home control system for home automation.

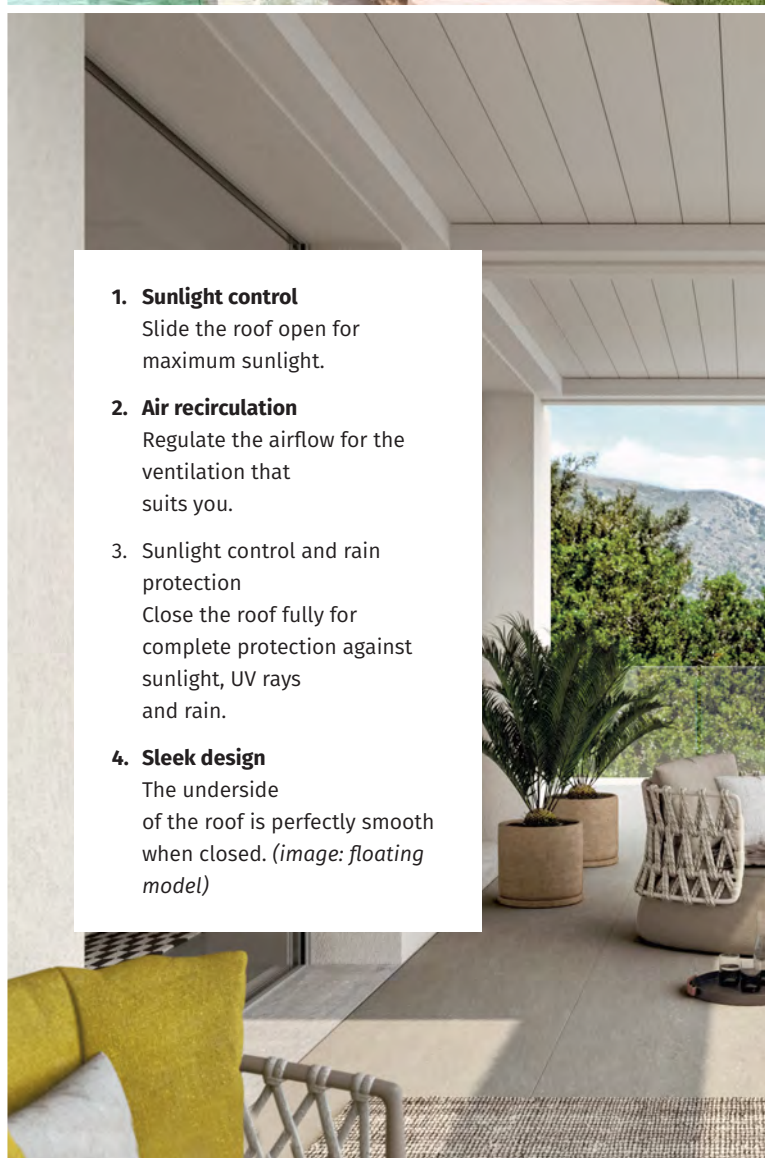

### Options

- All RAL colours, and an extensive range of textured coatings.
- Sliding glass walls.
- Dimmable LED lighting (white or RGB).
- Dimmable LED spotlights (available as from 2021).
- Wind-resistant screens.
- Heating.
- Sensors (sun, rain, temperature and wind sensor).

## A SHADED AREA

|||||

- Maximum width: 4.5 m
- Maximum depth: 6.1 m
- Maximum height: 3 m
- Maximum span of 1 module: 27.45 m<sup>2</sup>
- Multi-part coupling in length and depth (*only for Brera Superior and Brera Premium*)

#### 1. Sunlight control

Slide the roof open for maximum sunlight.

#### 2. Air recirculation

Regulate the airflow for the ventilation that suits you.

#### 3. Sunlight control and rain protection

Close the roof fully for complete protection against sunlight, UV rays and rain.

#### 4. Sleek design

The underside of the roof is perfectly smooth when closed. (image: floating model)

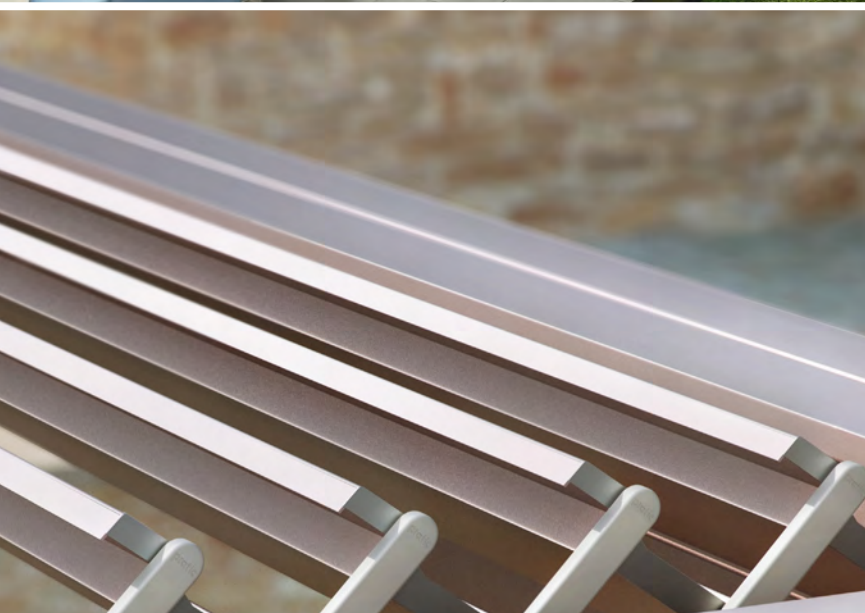

|||||

#### Unique properties

##### 1. Sunlight control

Partial or complete control over sunlight, and protection against UV rays.

##### 2. Air circulation

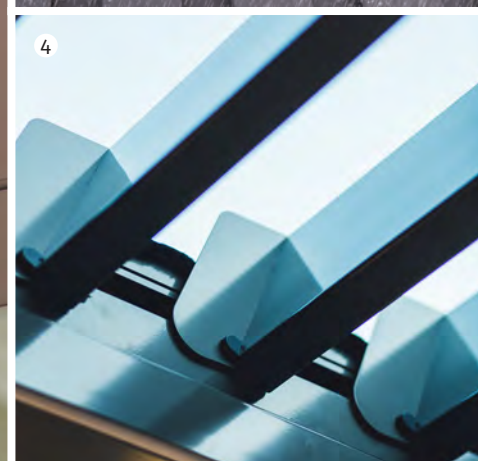

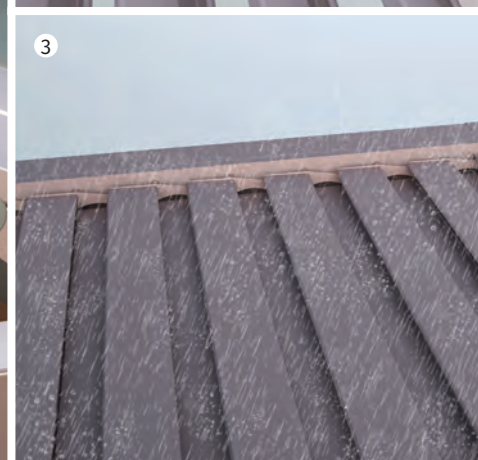

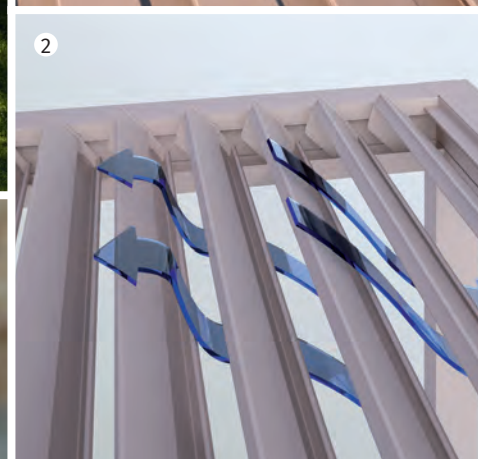

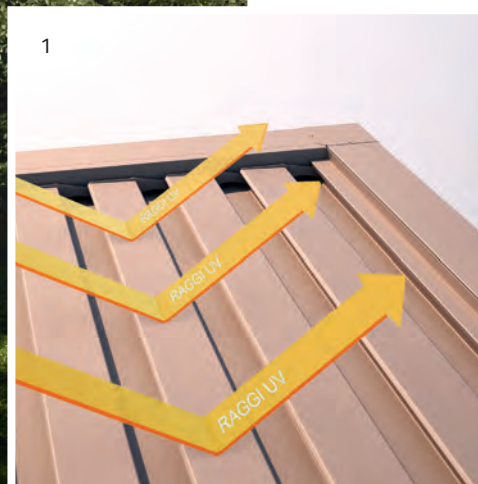

Regulation of the airflow to obtain the desired ventilation.

##### 3. Rain protection

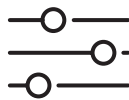

Automatic full closure with the Rain Off sensor or remote control.

##### 4. Rain sensor

The integrated gutters keep your terrace dry, even after the slats have been tilted. The rainwater efficiently drains away along the vertical posts.

# Options for added comfort

## Sliding glass walls

Sliding glass walls keep out the wind and cold. This converts your space into a proper outdoor living space, which you can enjoy to the full.

## Heating

With the Storelight heating unit you'll experience endless enjoyment of your slatted roof, even on those cooler days and evenings.

## Vertical wind-resistant screens

Opera and Brera allow you to seamlessly integrate windproof vertical screens into your slatted roof. These windproof screens give you protection on all sides. You can now enjoy your outdoor living space, even when the sun is setting.

## LED lighting

Thanks to the dimmable LED lighting, you can create a really cosy atmosphere in the evenings. You can choose between white LEDs or RGB LED lighting fitted to the frame. Or, you can choose LED spotlights\* integrated into the slats. Whichever lighting you choose, you can customise it to suit your personal preference.

*\*For Brera slatted roof, available from 2021*

NOMO

# Nomo & Rialto

## Nomo & Rialto unfold to your requirements

### Free-standing and extension models

With the fully horizontal Nomo or Rialto folding roof systems, you can enjoy the outdoors to the full. Even when it rains. The curved fabric profiles allow water to cleverly drain away, aided by the retractable fabric. Do you feel like adding more comfort and atmosphere? Then consider sliding glass walls and LED lighting. Open or closed, Nomo and Rialto unfold to your requirements. Enjoy!

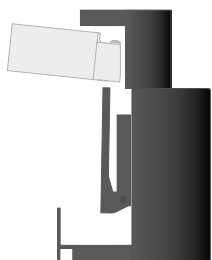

#### Unique properties

- Excellent water drainage thanks to the curved fabric profiles + standard rainproof PVC fabric.
- Screwless design. Free-standing or extension.
- The fabric can be fully opened for maximum light.
- Extremely wind resistant: up to 6 on the Beaufort scale (48km/h) with a closed folding roof.
- Made to measure down to the last millimetre, and a perfect match with your home.
- Available in 8 standard colours.

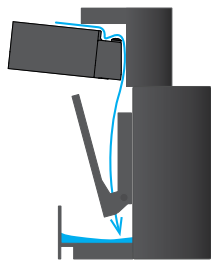

#### Options

- All RAL colours, and an extensive range of textured coatings.
- Sliding glass walls.
- Dimmable LED lighting (white or RGB).
- Wind-resistant screens (applies only to Nomo).
- Heating.
- Sensors (sun, rain, temperature and wind sensor).

## Unlimited comfort

### Built-on models

This patio version can be attached to the outside wall, is available in very large sizes, and can be further coupled. In addition, it can be fitted with extra options, such as LED lighting, heating and screens, for even greater comfort.

#### Unique properties

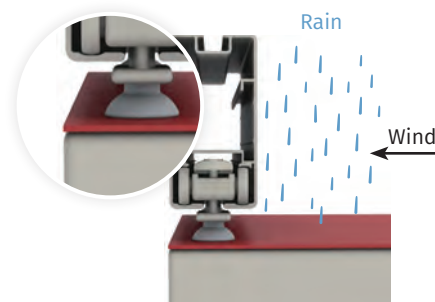

- Fabric suspension is made extremely taut, and is equipped with a patented anti-drip system\*.
- Can be attached to an outside wall, or even between two outside walls.
- The fabric can be fully opened for maximum light.
- Extremely wind resistant: up to 6 on the Beaufort scale (48km/h) with a closed folding roof.
- Made to measure down to the last millimetre, and a perfect match with your home.
- Available in 8 standard colours.

#### Options

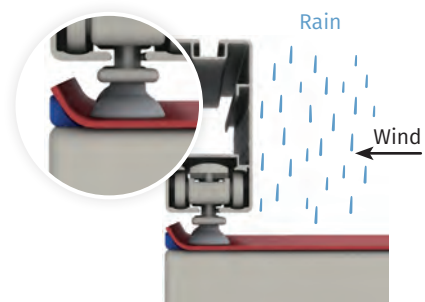

- All RAL colours, and an extensive range of textured coatings.
- Integrated LED lighting in retractable fabric, and extension pole for additional atmosphere.
- Sliding glass walls.
- Dimmable LED lighting (white or RGB).
- Wind-resistant screens (applies only to Fusion).
- Heating.
- Sensors (sun, rain, temperature and wind sensor).

#### \*Anti-drip system

This simple system angles the fabric upwards at the end, so that rain water cannot drip down the sides but is instead drained away along the front. This anti-drip system is supplied as standard with a tight fabric suspension

# Choose your retractable fabric system

## Folding roof

The Patio model folding roof is fitted with rainproof PVC fabric as standard. Here you can choose between a slightly translucent retractable fabric or a full blackout retractable fabric. You can also opt for sun-resistant fabric. Whichever you choose, all our high-tech fabrics are meticulously finished and meet the highest quality standards. The standard PVC fabric is 100% waterproof, treated against mould and is self-extinguishing.

## Screens

You can build your patio system using wind-resistant screens. With these screens, you are out of the wind and fully protected against the sun's harmful UV rays.

### Unique properties

- 1. Fabrics**  
As standard, the fabric is waterproof.
- 2. Anti-drip system**  
Prevents rainwater from draining along the sides.
- 3. Fabric suspension**  
You choose your preferred fabric suspension.

AIR

HAROL

AIR

# Versuz

## Minimalist design

With Versuz, you can extend the enjoyment of your patio, garden or pool for longer. Versuz not only protects you on a hot summer's day, but there is also the option to fit practical heating units. Now you can continue to enjoy those late summer evenings. And, Versuz is a very elegant design, with its slim vertical posts and guide rails. The box is compact and sleek, combining pure design with ultimate comfort.

### Unique properties

- Minimalist design.
- Easy to fit against an outside wall, and suitable for all terraces thanks to the flexibility in the positioning of the vertical posts.
- The fabric retracts completely into a closed box, keeping it beautifully clean in all weather.
- Available in all RAL colours and in a wide range of textured coatings, all at the standard price.
- Resistant to gusts of wind up to 48 km/h. (Beaufort scale classification 6).
- Choice of sun resistant or rain resistant fabrics.
- Fitted with an IO control which can be connected to the Somfy IO home control system for home automation.

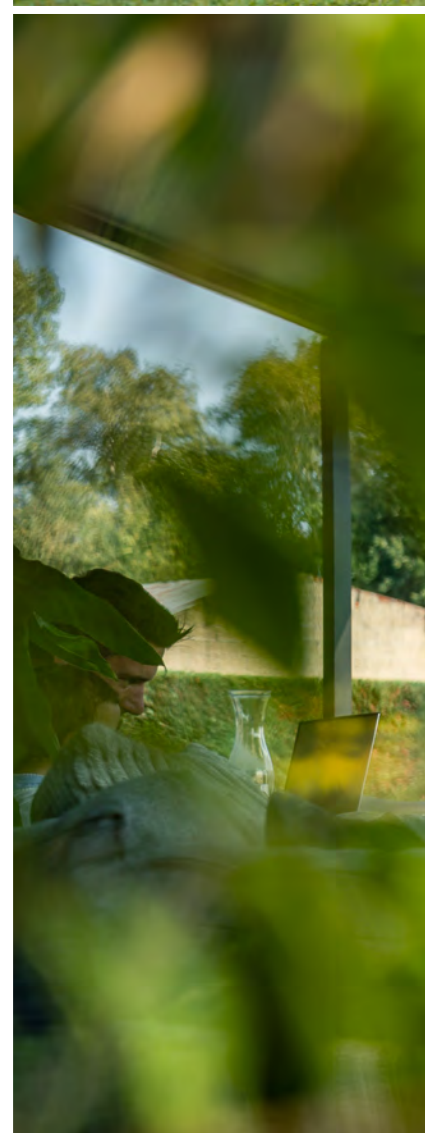

### Options

- Fabric roll support for additional stability.
- Integrated LED lighting in the box, and fabric roll support for even more atmosphere.
- Dimmable LED lighting in bottom of box (white or RGB).
- Dimmable LED spotlights.
- Heating.
- Sensors (sun, rain, temperature and wind sensor).

## A SHADED AREA

- Maximum width: 6 m
- Maximum depth: 5 m
- Maximum surface area per module: 25 m<sup>2</sup>
- Multi-part coupling up to 16 m (max. 4 modules)

**HAROL**

# Air

## Enjoyment in all conditions

Thanks to Air, you have even more ways of enjoying your terrace for longer. The built-in, vertical screens and a fixed triangle keep most of the rain and wind outside. With its integrated water drainage, rain doesn't stand a chance. The fully-enclosed box keeps your fabric bright for years to come. Glass sliding walls or screens with integrated LED lighting (all-round or in the fabric roll support) complete this comfort-enhancing package.

### Unique properties

- Easy to fit against an outside wall.
- The fabric retracts completely into a closed box, keeping it beautifully clean in all weather. The rain is drained by the integrated water drainage system, and you are protected from rain and wind thanks to the triangular fabric sealing enclosure.
- Available in all RAL colours and in a wide range of textured coatings, all at the standard price.
- Resistant to gusts of wind up to 48 km/h (Beaufort scale classification 6).
- Choice of sun resistant or rain resistant fabrics.
- Fitted with an IO control which can be connected to the Somfy IO home control system for home automation.

### Options

- Fabric roll support for additional stability.
- Integrated LED lighting in the box, and fabric roll support for even more atmosphere.
- Dimmable LED lighting all around the frame (white or RGB).
- Dimmable LED spotlights.
- Heating.
- Sensors (sun, rain, temperature and wind sensor).
- Sliding glass walls.
- Integrated screens.
- Triangular fabric enclosure.

## A SHADED AREA

- Maximum width: 6 m
- Maximum depth: 5 m
- Maximum surface area per module: 25 m<sup>2</sup>
- Can be coupled up to 24 m

# Fabrics

## Taut fabrics, thanks to the ZIP system

With these elegant eye-catchers, you're able to enjoy your patio, pool or garden for longer. Discover pure design combined with ultimate comfort.

Unlike a slatted roof or retractable fabric, Pergola fabrics fully retract into the box. This keeps your fabric looking bright for years.

Once opened, an ingenious ZIP system ensures that the fabric is extra taut. This creates a sleek look and feel, and makes the fabric extremely windproof.

## Fabric canopy

Type	Soltis Horizon 86 Serge Ferrari	Infinity DICKSON	Sunvas Perla swela	Soltis Perform 92 Serge Ferrari
	Polyester	Acrylic	Polyester	Polyester
Pergola standard fabric	Versuz	Versuz	Air	N/A
Pergola optional fabric	Air	Air	Versuz	Versuz & Air

### The ideal hospitality solution

Our outdoor living products are not only suitable for a private garden or terrace. They can also be the perfect solution for hospitality professionals to extend their catering space. The wide range of additional options, from integrated lighting to heating, enable the spring season to begin earlier and the summer to last longer. This means that the outdoor season can last all year round. Thanks to the tailor-made and personalised terrace solutions, Harol outdoor living products represent attractive added value for everyone's terrace!

## Why choose Harol?

### Good investment

When you choose Harol products, you choose durability and quality. All our products are produced and assembled with the greatest care. They are also easy to maintain. This lets you enjoy your smart investment for years to come!\*

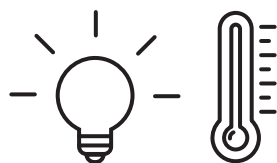

*\* Order a maintenance kit from your Harol specialist for easy maintenance of your purchase.*

## Enhance your experience with lighting and heating

If you love being warm and cosy, Storelight lighting and/or heating is the ideal addition to your outdoor living solution. The lighting creates a unique romantic atmosphere in the evening. The heating drives out the evening chill, so you can enjoy those summer evenings for longer. A combination of both is also available. And, naturally, you can coordinate the outdoor living solution perfectly with your sun protection, because you can choose from the full RAL colour range.

### Lighting

- Choose 3 or 4 LED spotlights (3.5 W)
- Spotlights can be pointed in all directions
- Length: 2.5 or 3.5 metres

### Heating

- Choose a 2000 or 2500 W infra-red heater
- Length: 520, 635, 745 or 860 mm

### Combined lighting & heating

- Lighting: 2 LED spotlights (3.5 W)
- Heating: 2000 W
- Length: 865 mm

Weather sensors on your outdoor living solution mean you no longer have to keep an eye on the weather forecast. The sensors ensure that your outdoor living solution opens or closes automatically depending on the wind speed. For the ultimate in convenience, choose a combination of sun and wind sensors.

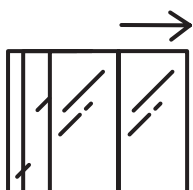

## Sun sensor

The outdoor living solution is activated by the sun sensor when a pre-set brightness level is exceeded. The sensor can operate wirelessly (IO) so no cables are required. And the feedback function means you're always kept informed.

## Wind sensor

A wireless or cabled wind sensor opens or closes the outdoor living solution based on the wind speed.

# Glass sliding walls

Enjoy your outdoor living solution for longer by fitting glass sliding walls to your outdoor living space. These keep out the wind and rain, so you can enjoy your outdoor living space for longer.

## Unique properties

---

- Slides open to the left and/or right
- When the first sliding panel is opened and/or closed, the adjacent sliding panels are automatically pulled along.
- Offers protection against wind and rain
- The available glass thicknesses are 8 and 10 mm
- Secure closure, thanks to lock or locking lever
- Safety glass in an aluminium sliding system
- All standard colours included in the standard price
- Unrestricted drainage, thanks to the sloping bottom rail
- Anti-slip coating on bottom rail to prevent slipping

**1. Soft opening and closing mechanism**

The sliding panels are easy and light to operate thanks to the concealed, ball-bearing running wheels and sound-absorbing running surfaces. When you open or close the first glass sliding wall, the other sliding walls will move in parallel.

**2. Easy to install**

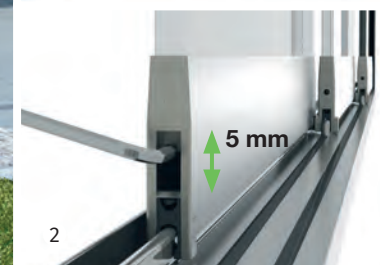

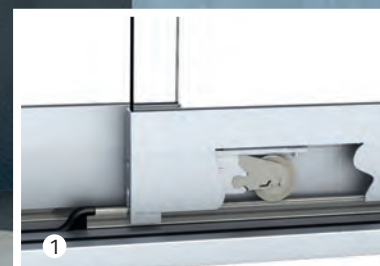

The ground does not have to be perfectly level to install these glass sliding walls. The running wheels are adjustable up to 5 mm in height to compensate for small inconsistencies.

**3. Maximum ventilation**

When the glass walls are closed, the panels overlap by approximately 23 mm, ensuring permanent ventilation, maximum protection against rain, and also optimal transparency.

**4. Safe**

Your outdoor living solution can also be safely locked from both the inside or outside, thanks to a cylinder lock and a locking lever.

# HAROL

## This is why!

### ✓ 100 % guaranteed quality

Harol evolved from being a small family-run company in Diest, into one of Europe's most pioneering manufacturers of sun protection and outdoor living solutions, roller shutters and garage doors. From pioneer to benchmark. Harol produces pure Belgian craftsmanship with an eye for detail down to the last millimetre. With over 70 years of experience in the field, we ensure that our solutions meet the most stringent quality requirements, which is why we are proud to be able to offer a five-year warranty.

### ✓ Installation by experts

Harol distributors are required to undergo practical training in our own Harol Academy to keep up with all the innovations and brush up on their product knowledge. This enables them to advise you on the right choice of product, and to install the chosen solution expertly.

## HAROL

### ACADEMY

### ✓ Extremely durable

Make significant savings on your energy bills with Harol's energy-efficient solutions. Our solutions keep abreast of the increasingly stringent energy consumption requirements. The innovative elements we incorporate are the ideal solution for blocking out the sun and cold. For maximum efficiency, our solutions can be programmed to respond to varying weather conditions.

## ✓ Made-to-measure sun protection

Harol supplies 100% made-to-measure solutions, where every detail counts. Our sun protection solutions can be perfectly tailored to your wishes.

- A solution for any construction project: new build or renovation, house or apartment, with a balcony or terrace, sleek or rustic...

- Choose from over 300 RAL colours and a wide range of scratch-resistant textured coatings.
- Wide range of options for maximum comfort: lighting, heating, automation.

## ✓ Ease of operation

All Harol solutions are designed to make your life easier. Our sun protection solutions are available with motor and remote control. This allows you

to enjoy our high-quality products at the press of a button, even with your smartphone, no matter where you are.

## ✓ Full service from start to finish

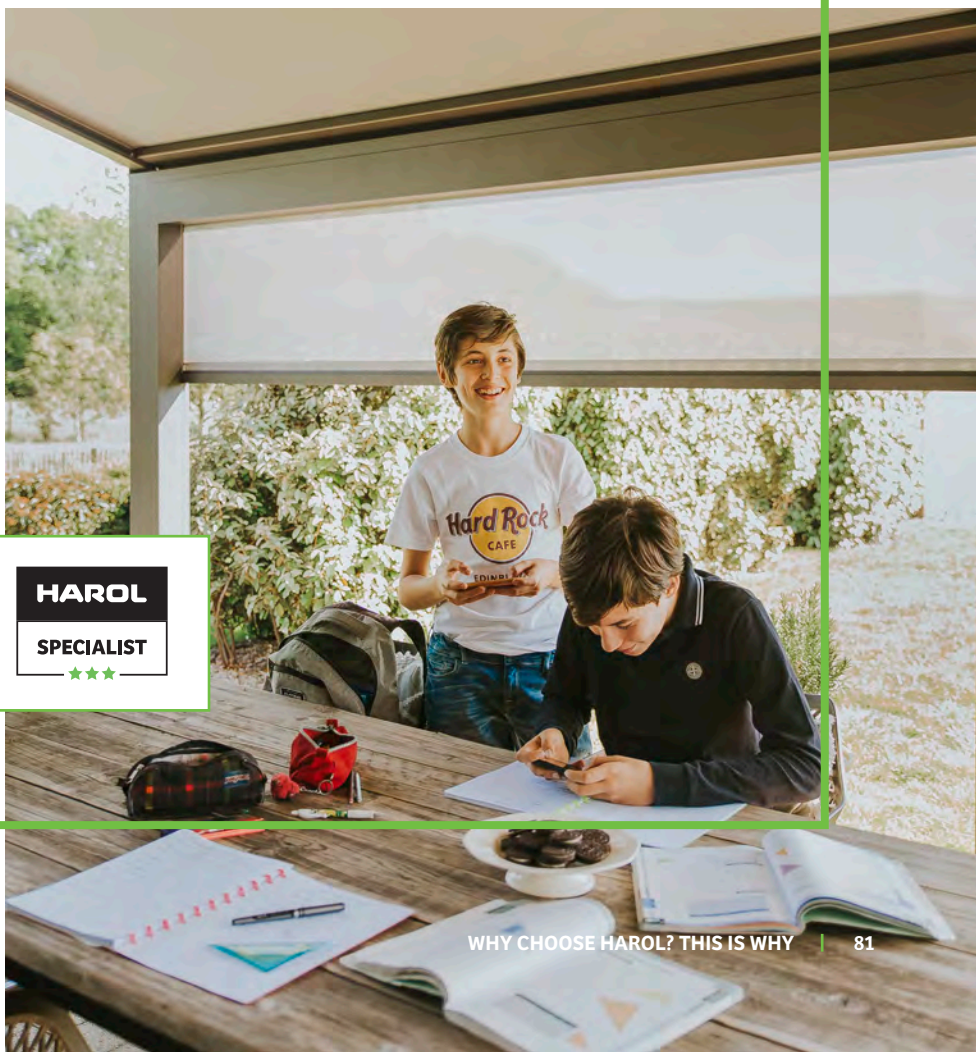

Our Harol distributors are there for you. And after installation - so is our service department, because the correct maintenance tips will allow you to enjoy your Harol solution for years to come.

- Advice on the right choice of product
- 100% made-to-measure
- Installation by experts
- After-sales service
- 5-year quality warranty
