

TAHMO

TRANS-AFRICAN HYDRO-METEOROLOGICAL OBSERVATORY

The idea behind the TAHMO initiative is to develop a dense network of hydro-meteorological monitoring stations in sub-Saharan Africa – one every 30 km. This entails the installation of 20,000 stations across the continent.

Services for farmers

Education for students

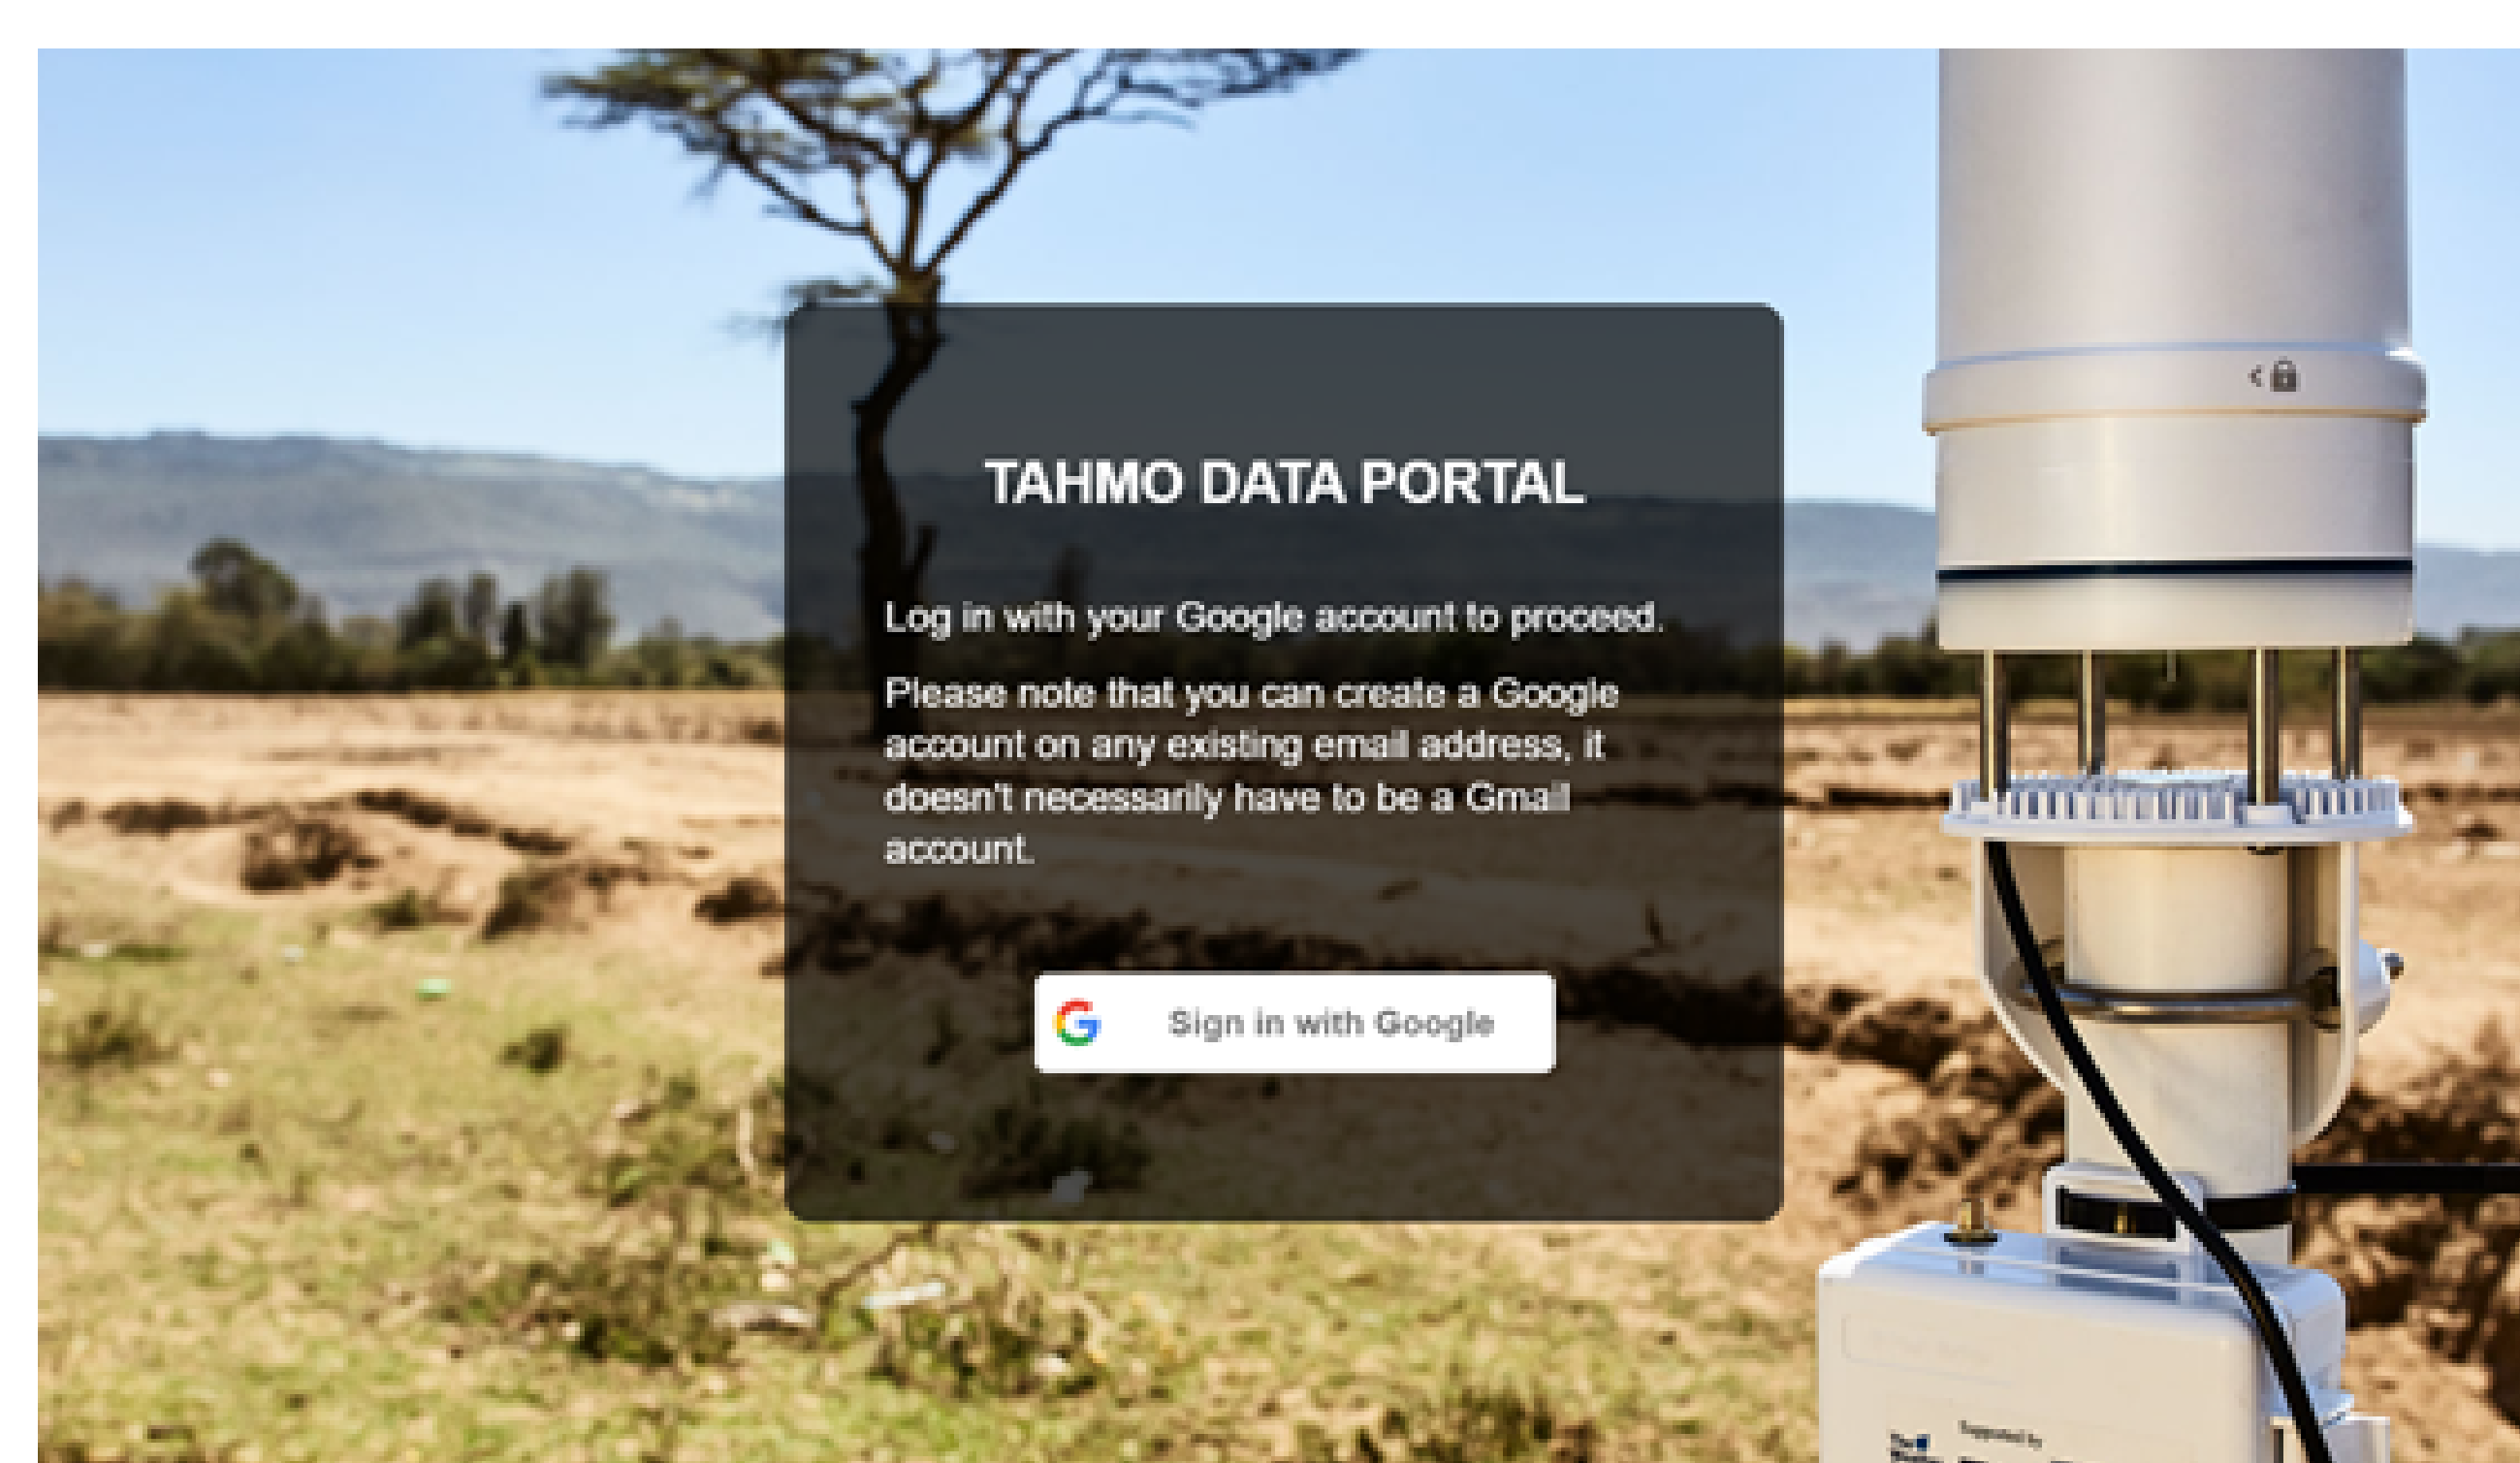

Training for NMHS

TAHMO-RS Hydrological Station

- Free data for research that results in peer-reviewed publications
- Free data for government institutions & NHMSs (**WMO Res. 40**)
- Services focus on platforms, data and models for Agricultural insurance, Early Warning Systems, Deployment of hydro-met stations and reservoir operations and management.
